18. Reason(s) for changing this course:

The change requested is the addition of Psyc 220 (Statistics) and Psyc 230 (Research Methods) as course prerequisites. According to the Psychology Program Student Learning Outcomes (PSLOs), required upper-division core lecture courses in the major are designed to reinforce understanding in "the scientific approach to psychology and apply basic research methods in psychology, including research design, quantitative analysis, interpretation and reporting in APA format." Consistent with this PSLO, upper-division core lecture courses in the major include class activities and assignments that require students to read, evaluate, and synthesize empirical research. Therefore, the addition of Statistics and Research Methods as course prerequisites will ensure these topics are being reinforced (i.e., not introduced) in upper-division core lecture courses and increase the likelihood that students are prepared for these tasks.
