Subject: UCC's review of the NURS curriculum

Importance: High

Hi Susan,

I hope you are well. UCC has just completed its first review of NURS 518, 602 and 604. UCC has the following requests/comments:

NURS 518:

1. The title needs to imply (or state) nursing or healthcare. Can you advise as it is currently vague and would benefit from greater clarity.
2. The syllabus needs to be updated to match the course description on the C form.
3. Line # 21 on the C form needs to be checked 'yes' as this is being proposed as an elective to the MSN

NURS 602:

- ~~1.~~ Line # 21 – same as above – needs to say 'yes'
- ~~2.~~ Given the content, UCC has requested review by Ethnic Studies and Kinesiology.
- ~~3.~~ UCC would like to know if there should be prerequisites, or is questioning if there is an order in which the courses should be taken as they are graduate level courses. Also, why is one of the proposed courses a 500-level course and the other two 600-level courses?
4. UCC is recommending the following minor-edited course description to conform with catalog style. This solely requires your approval: **Prepares the advanced practice nurse practitioner to provide care to underserved populations across the lifespan. Includes content on underserved populations; health disparities; determinants of health; common behavioral, acute, and chronic illnesses/conditions; and health promotion and maintenance with limited resources.**

NURS 604:

1. Line # 21- same as above – it should say 'yes'
2. UCC is recommending the following minor-edited course description to conform with catalog style. This solely requires your approval: **Introduces the history and foundations of a transdisciplinary model of evidence-based integrative healthcare that includes the influence of the environment on healthcare. Presents an overview of nutrition and health, spirituality, mind body practice, and traditional whole body practices used to affect positive health-related changes.**

Please let me know if you have any questions. We look forward to hearing back from you.

Best,
Sue
