**Subject:** Re: UCC Curriculum Review - AMD courses and follow-up regarding P-form revisions

Hello Paul,

Please find the responses to the outstanding questions below and attached. Attached you will also find the various course forms, syllabus and the P-Form with notes showing the changes. Aside from the changes you requested regarding the catalogue copy I have changed the GE units to 48 as I understand that executive order 1100 requires that GE units add up to no more than 48. If this is not necessary please let me know. Also some of the C-2 forms were available to me in word documents so I made the changes fully - for others I only have PDF and had to attach notes or text boxes.

If you have any questions don't hesitate to contact me.

Thanks again for all your work and attention.

Best.

Judit

## **9. VSAR 304: / AMD 404**

The committee suggests that the course description be changed to "Advanced video production and post-production including narrative, experimental, documentary and installation. Utilizes digital audio and video tools and software. Development of practical and critical . . .".

[Changes have been added to course form attached](#)

The old description mentions that the course can be repeated for a total of 6 units. This information has been removed from the new description. Is it the intention of the proposer to remove repeatability? If so item # 11 needs to be completed.

Similarly, recommended preparation from the old description has been removed. Is this also intentional?

[#11 on course form completed and recommended preparation has been added – see updated course form attached](#)

Since this is an “Advanced video production” course is there a pre-requisite required?

[We don't require pre-requisites in our courses as students self-select and some have extensive background from before entering CSUSM](#)
