The Management Information Systems (MIS) option trains business-oriented, technically proficient professionals for managing and building management information systems. Students will learn how to define organizational information requirements and use information technologies to meet them. They will also learn how to lead and manage information systems projects, especially those related to Internet applications. The major themes of the option include fundamentals of information systems, system analysis and design, and database management. The option also addresses subjects such as networking and telecommunications, computer programming, and electronic commerce. These topics provide students with not only knowledge and skills essential for management information systems development but also a variety of career opportunities in areas such as consulting, financial services, high technology, manufacturing, retail and entrepreneurial ventures.
