

Office for Training, Research & Education in the Sciences

Louis Stokes Alliance for Minority Participation (LSAMP) Program

Freshman, Sophomore, Junior & Senior STEM Majors
(Biology, Chemistry, Physics, Computer Science & Math)

Research Initiative for Scientific Enhancement (RISE) Program

Junior, Senior and graduate students in Psychology, Biology,
Chemistry, Physics, Computer Science & Math

Minority Access to Research Careers (MARC) Program

Junior students in Psychology, Biology, Chemistry, Physics, Computer Science & Math

Bridges to the Future Program

At Palomar and MiraCosta Community Colleges: Students in Psychology,
Biology, Chemistry, Physics, Computer Science & Math

Supplemental Instruction Program

Academic support program to help students in historically difficult classes master course
content while they develop and integrate learning and study strategies

OTRES

The Office for Training, Research & Education in the Science (OTRES) provides a supportive multicultural environment for student and faculty career development in the biomedical sciences and related disciplines. The OTRES sponsors programs that focus on science education, student support services, research training, and research participation.

Our Programs

The RISE, MARC, Bridges and LSAMP programs are designed for talented and motivated students interested in developing professional careers as research scientists. These programs provide financial support (\$500-\$11,000 per year) and specialized training for academically qualified undergraduates committed to pursuing careers in the biomedical and behavioral sciences. Students must be fulltime, and committed to pursuing graduate training (PhD).

Student Benefits

- Access to seminars & workshops in various aspects of research.
- Priority Registration & Academic Advising
- Research opportunities with CSUSM faculty
- Help in preparing for the GRE & graduate school application.
- Support of attendance and participation in scientific conferences.
- Opportunities to network with working scientist & research faculty from top graduate programs.
- Access to information about paid summer research opportunities.
