ABOUT EXTENDED LEARNING

As the academic outreach arm of Cal State San Marcos, Extended Learning is a leading provider of professional and continuing education in San Diego North and Southwest Riverside Counties. Offering degree programs and both academic credit and noncredit professional enrichment courses and career-based certificate programs, we help individuals and organizations achieve their educational and training goals.

ABOUT COLLEGE OF EDUCATION

The College of Education aims to collaboratively transform public education by preparing thoughtful educators and advancing professional practices, and offers a wide range of credentials, several Masters degree options, and an Ed.D. in Educational Leadership in partnership with UC San Diego. For more information on the programs offered by the College of Education, please visit www.csusm.edu/coe or call (760) 750-4277.

Learning

Programs for Educators

CSUSM Extended Learning knows that supporting teachers, administrators and district personnel in all stages of their careers is crucial to student success. Thus, together with the CSUSM College of Education, we are committed to offering programs and courses, both online and face-to-face, to meet teaching credential and prerequisite requirements, as well as a variety of other professional development needs.

For those that hold a teaching credential, we offer additional certificates to develop new skills and move up on the pay scale, including the only completely online CA Supplementary Authorization in Computer Concepts & Applications in California, and the Advanced Placement Summer Institute held on our campus each year.

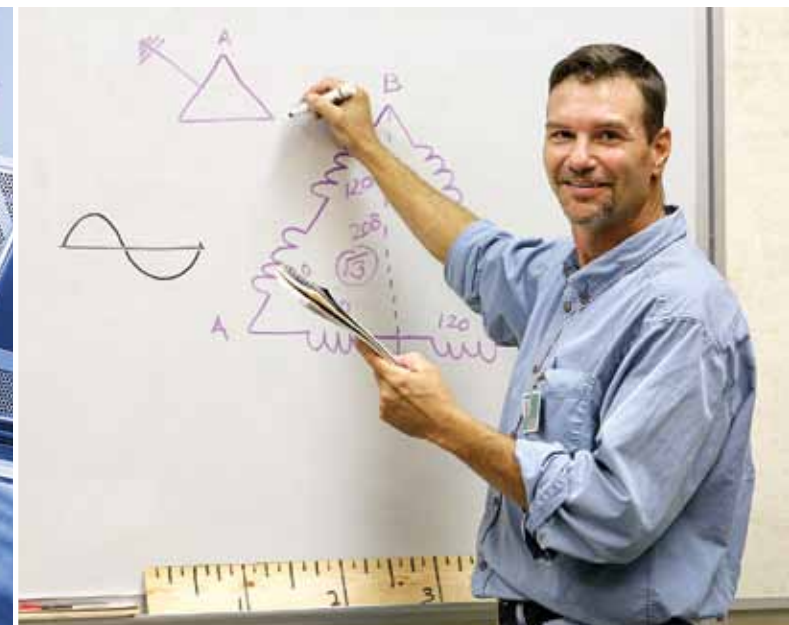

In addition to supporting educators, we also support the growth and development of local high school students through our Test Prep Programs and partnership programs with high schools.

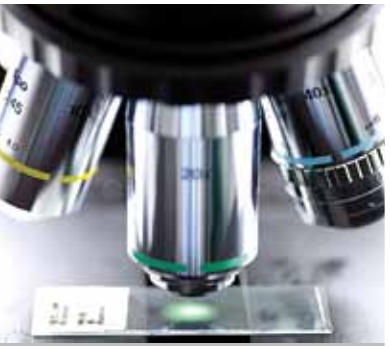

Master of Arts in Education, Option in Communicative Sciences and Disorders

In partnership with the College of Education, Extended Learning now offers a Master of Arts in Education with the Option in Communicative Sciences and Disorders (CSD). This program prepares students for practice in the field of speech-language pathology in public schools while ensuring competencies for the full scope of the profession. Graduate students will develop skills and knowledge in all aspects of practice related to:

- Assessment and treatment of individuals across the lifespan with a broad array of communication and swallowing disorders, including: articulation, phonological, fluency, voice, motor speech, language, dysphagia and cognitive-linguistic disorders.
- Response-to-Intervention and Relationship-based Intervention approaches to treating individuals with communication disorders.
- Counseling, augmentative communication and aural rehabilitation
- Evidenced-based practice in the field

The CSD program is a cohort based with a new cohort beginning each fall. For more information please visit www.csusm.edu/el/csd.

Authorizations and Credentialing Prerequisites

Autism Spectrum Disorder Added Authorization

The Autism Spectrum Disorder (ASD) Added Authorization responds to the need for special educators, who are not yet authorized to teach students with ASD, to obtain this government mandated authorization by the 2013 deadline. The Added Authorization consists of two, 3-unit, graduate level courses (partially-online). The courses will examine characteristics, assessments, instruction and diverse supports for students with ASD. Participants will have the opportunity to learn from one another and share their successes in supporting students on the autism spectrum.

In addition to the regularly scheduled ASD courses held on campus, special sessions may be offered at district or school sites to meet your organization's needs.

Beginning Teacher Support and Assessment (BTSA)

Normally offered during the Spring Term, Beginning Teachers (Year 1 or Year 2) and Support Providers can earn graduate credit for the BTSA program they are already taking. A complete list of local BTSA programs participating in the optional credit is available online.

CSA in Computer Concepts

Satisfy the California Supplementary Authorization (CSA) in Computer Concepts and Applications with a completely online program! Regardless of where you live in the state, you may now fulfill CSA requirements by completing (grade 'C' or better) these four, 3-unit, graduate-level courses in Computer Concepts and Applications, offered collaboratively by the College of Education and Extended Learning. For more information on this program please visit www.csusm.edu/el/csa.

Credential Prerequisites

For students interested in getting a head start on the CSUSM College of Education's Credential Program, the prerequisites can be taken without being formally admitted to the University. Extended Learning offers prerequisite courses each semester for individuals waiting to hear about their acceptance or for those who wish to explore teaching as a career before committing to the full credential program.

Professional Development

Academic Credit and Continuing Education Units

CSUSM Extended Learning works to connect teachers, administrators and school districts with the wide variety of professional development opportunities offered throughout San Diego County. In partnership with the North County Professional Development Federation, the San Diego County Office of Education, local schools and districts, and various educational training organizations, CSUSM offers university credit for participation in a variety of workshops and training sessions. If you are interested in offering academic credit or Continuing Education Units (CEUs) for a workshop, training, or conference, please contact Extended Learning at 760-750-4020.

Test Preparation

CSUSM Extended Learning has teamed up with Bobrow Test Preparation Services, the leaders in the field of test preparation, to offer courses that help educators meet their full test taking potential. Test proven learning techniques include classroom instruction by credentialed instructors, nationally recognized textbook authored by Bobrow faculty, current practice exams, and online diagnostic tests.

Test preparation classes are offered for the following examinations:

- California Basic Education Skills Test (CBEST)
- California Subjects Exam for Teachers (CSET)
- Graduate Management Admissions Test (GMAT)
- Graduate Records Exam (GRE)

For more information and for a current schedule of classes, visit www.csusm.edu/el/testprep.

AP* San Diego North

In collaboration with the College Board*, each summer CSUSM Extended Learning hosts the Advanced Placement Summer Institute. AP* San Diego North invites teachers from around the nation to receive the subject-specific support and training they need to teach Advanced Placement and Pre-AP courses, while experiencing our state of the art classrooms, cutting edge science labs, veteran AP* instructors, the latest in AP* prep, and a variety of evening activities. Learn more at www.csusm.edu/el/apsi.

The AP* Summer Institute has been endorsed by:

Cal State San Marcos College of Education
North County Professional Development Federation
Advanced Placement Consortium Project

High School Partnerships

In conjunction with the colleges and departments on campus, Extended Learning works with local high school teachers to align current higher level high school courses with undergraduate curriculum, and offers high school students the opportunity to obtain optional university credit at a discounted rate. Currently we are offering Academic Credit for courses in Math and Chemistry, but we are always looking to grow this in-demand program.

Examples of course sections offered at local high schools:

Math 260	Calculus D
Math 262	Differential Equations
Math 264	Intro to Linear Algebra
Math 270	Basic Discrete Mathematics
Chemistry 105	Organic & Biochemistry for Life
Chemistry 105L	Organic & Biochemistry for Life Lab

Customized SAT Test Preparation

Our test preparation workshops are designed to prepare students for the SAT by reviewing all question types, including both the writing and essay sections of the Writing portion. Fifty percent of the class will focus on math, including enhanced math question types, and the other 50 percent of the class will be used to analyze Critical Reading, Sentence Completion, and the Writing Sections. The classes are taught by credentialed teachers and both the content and workshop schedule can be customized to meet the needs of your student population.
