CC Basics - 3.2 - Customize Course List on Dashboard

Why Do This

The courses on your Dashboard in Cougar Courses may not be displayed in a convenient or logical order. Your list may have grown to include courses you no longer need to see listed. You can customize your course list to re-order your list of courses and determine how you may want to see on that page or hide.

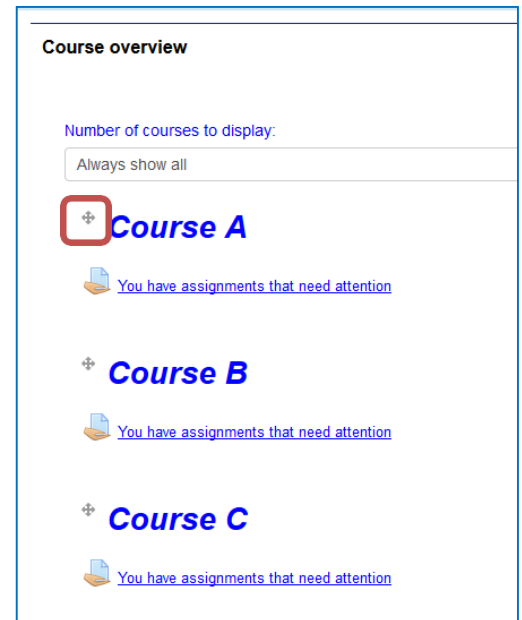

Reorder Courses

1. Login to Cougar Courses.
2. Select **My courses** from the top menu and choose **Dashboard** at the top of the drop down list.
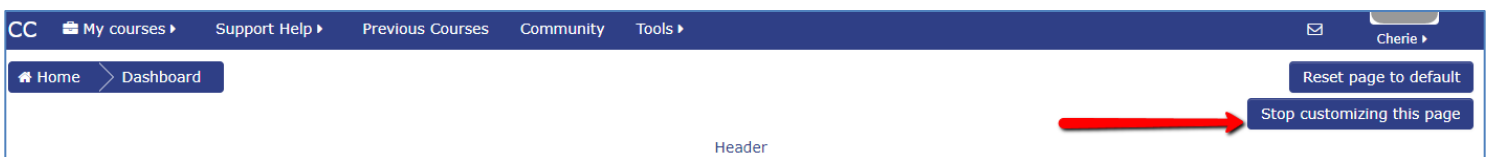

3. Select **Customize this page**.

4. Select the **move icon** next to the course to be moved.
5. Hold the **move icon** and drag the course to a new order.
6. Repeat until courses are in the desired order.

Course overview

Number of courses to display:

Always show all

⊕ *Course A*

📄 You have assignments that need attention

⊕ *Course B*

📄 You have assignments that need attention

⊕ *Course C*

📄 You have assignments that need attention

7. Select **Stop customizing this page**, or continue to the next steps to hide unused courses.

Hiding Courses

8. Make sure the course(s) you don't want displayed is at the bottom of the list. Using the drag and drop method practiced in steps 1 – 7.

9. From the **Number of courses to display** dropdown, select the appropriate number of courses to display. (In my case, the appropriate number is 4.)

10. Notice which courses are now displayed and the statement of how many courses are now hidden.

11. When your dashboard looks the way you want it, select "Stop Customizing this Page.
