Sent on behalf of: FAS Administration

Dear PCBO Community,

Applications are now open for the 2026 BPI Training Program!

Business Process Improvement (BPI) is a structured approach to defining a process, analyzing a predetermined scope of work, and improving its performance.

The Business Process Improvement (BPI) training program aims to encourage a culture of continuous improvement on campus. Participants will learn BPI methodology over an intensive, six-week training program while practicing with actual CSUSM processes.

This program is ideal for employees that are the "do-ers" in their respective areas, such as Administrative Coordinators, Analysts, and Entry-level Managers. **Applications are open through June 30.** More information, including time commitment information, schedule, and application form, may be found at [BPI @ CSUSM](#). This is a FREE program!

If you have any questions regarding the BPI program, please contact Andrea Wilson at awilson@csusm.edu.

Thank you!
FAS Administration
