

Computer Science Summer Institute

CSU San Marcos is partnering with Google to host Google's Computer Science Summer Institute Extension program. CSSI-Extension is a 3 week on-campus introduction to computer science for incoming freshmen students in Computer Science, Software Engineering, Electrical Engineering, or related fields with a passion for technology - especially students from historically underrepresented groups in tech.

Program Includes:

- Technical and soft skill development
- Group project work culminating in app creation
- Opportunities to interact with Google engineers
- Field trip to a Google office
