

**Dining**

For all on-campus events, all COVID-19-related in-person event restrictions will be lifted as of Tuesday, July 13. This includes all events being able to occur with any number of attendees, no capacity limits, and no restrictions in place for event location.

In addition, all post-event cleaning requirements have been eliminated for on-campus events, including those that occur in residence halls.

Mandatory Student Testing

COVID-19 Symptom Screening

Cleaning and Disinfection

Mask Requirements

Occupancy and Social Distancing

Dining

dear CSUSM employees,

as we transition to a new phase of the pandemic, we are making some modifications to our COVID-19 protocols. We are committed to maintaining a safe and healthy campus environment, and we appreciate your continued cooperation and understanding as we work through this process.

All cleaning and disinfection protocols will return to pre-pandemic status. The exception to this will be for areas where we have implemented additional measures, such as customer facing workspaces. In these areas, enhanced cleaning will continue to be performed if the space in which a COVID-19-positive person was present will be occupied within 24 hours following the positive case being in the space. (For example, a COVID-19-positive person spent time in a work area in a building, and the area will be occupied within 24 hours following the positive case being in the space.)

Under the newly revised OSHA Emergency Temporary Standard (ETS), fully vaccinated employees do not need to wear face coverings indoors or outdoors, except in the following circumstances:

- In healthcare settings
- In K-12 schools
- In the military

Employees who are not fully vaccinated or who have not volunteered to self-attest to their vaccination status will continue to be required to wear face coverings indoors at work and outdoors when 6 feet of distance from others cannot be maintained. Employees may request a mask or N95 respirator (which requires training) by submitting a request through the campus app.

OSHA requires that employers provide training to all employees on the effective use of face coverings, including the importance of wearing face coverings in areas where 6 feet of distance cannot be maintained. Employees who voluntarily self-attest to their vaccination status will no longer be required to submit daily symptom screening or to complete the COVID-19 Symptom Screening process.

For more information about the newly revised OSHA ETS, please visit the CSU Student Health Center website.

Employee Training

Employees interested in purchasing their own N95 respirators can do so through the CSU Vaccination Requirement website.

Lots X, Y and Z will remain free through Aug. 23. The cost of a Lots X, Y and Z parking permit for lots X, Y and Z will also be available for purchase (no overnight parking allowed).

Any person wishing to perform additional cleaning or disinfecting of their personal workspace should notify their manager.

Please continue to communicate what we know when we know it. In addition to timely email updates, the health, well-being and success of our community remain our top priority, and we will continue to work through this process.

Thank you for your patience and flexibility as we continue to work through the complex and ever-changing landscape of COVID-19.

Dr. Harry Kirsch

President
