PROGRAM OVERVIEW

Advance your supply chain career by earning the CSCP — the widely respected credential from the Association for Supply Chain Management (ASCM) that often leads to higher pay and faster promotions. CSUSM's 4-month prep course, developed in partnership with ASCM San Diego, is taught by industry-certified instructors who guide you step-by-step toward exam-day success. CSCP is the only supply chain certification that encompasses the entire global supply chain, demonstrating your knowledge and organizational skills for developing streamlined operations.

WHAT YOU'LL LEARN

The CSCP Body of Knowledge provides the tools to effectively manage global supply chain activities and implement best practices that increase efficiency across your organization. Primary topic areas include:

- **Fundamentals of Supply Chain Management**
Core processes, integration methods, inventory planning and control, and demand forecasting and management techniques
- **Supply Chain Strategy, Design and Compliance**
Globalization effects on logistics, supply chain technologies, and CRM strategies, implementation and key concepts
- **Implementation and Operations**
Managing internal and external supply sources, implementing demand plans, and capturing and communicating point-of-sale data

BENEFITS OF THE PROFESSIONAL SUPPLY CHAIN CERTIFICATION PREP COURSE

- **Comprehensive Learning**
Access a mix of lectures, discussions, videos, quizzes and flashcards.
- **Certified Instructors**
Learn from industry-certified CSCP professionals with real-world expertise.
- **Recognized Expertise**
Earn a credential employers seek for comprehensive supply chain leadership roles.
- **Professional Networking**
Build lasting connections with a cohort of supply chain peers.
