

CC Basics - 3.2 – Making Your Course Visible to Students

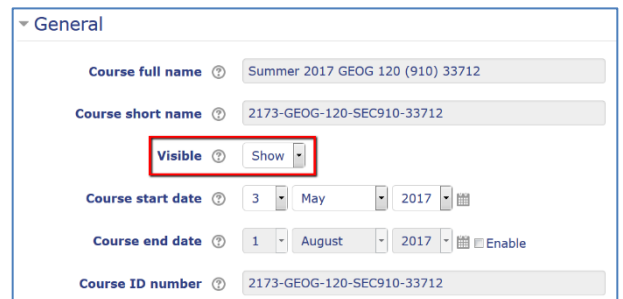

Why Do This?

By default, your course container is hidden from student view. Once you are ready for students to view your course in Cougar Courses, log on to Cougar Courses, locate your course and turn the editing on. Then follow these steps:

1. Click on “Edit Settings” in the **Administration** block.

2. In the **General** section, set **Visible** to “Show”.

3. At the bottom of the page select “Save and display”.
