

Quizzes - 3.2 - Adding Quiz Questions from the Question Bank

Overview

This document explains how to add questions from the Question bank to a quiz, including adding a specified number of questions randomly selected from a category for each quiz attempt. To do this, you must have **previously created the questions** in a category in the question bank **or imported** questions from a publisher's test bank or Respondus. To learn how to create questions and categories, see Creating Quiz Questions.

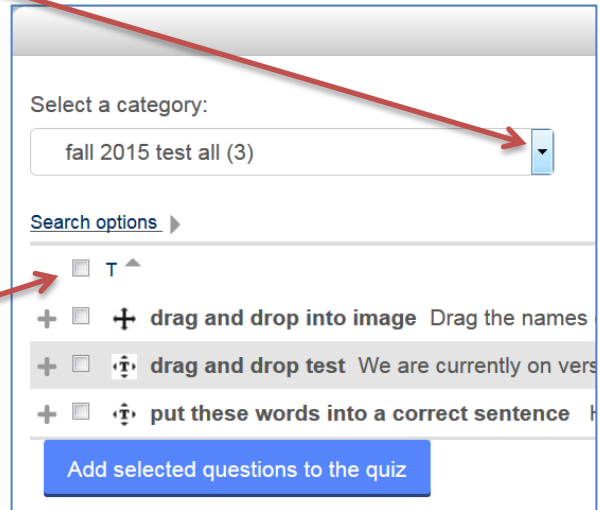

1. Log onto Cougar Courses and go to the main page of your course.
2. Click **Turn editing on**.
3. Click on the quiz name from your course home page.
4. In the Administration block, select **Edit quiz**.

5. Use the **Add** dropdown to select *from question bank*.

6. **Select the category** containing the questions you want to add to the quiz.
7. A list of the questions in that category will display below.

8. Click the box in front of the questions you want to add to the quiz.
 - To add all, click the T box at the top of the list.
9. Click **Add selected questions to quiz** button.

Adding Random Questions from an Existing Category

1. Click on the quiz name from your course home page.
2. In the Administration block, select **Edit quiz**.
3. Use the **Add** dropdown to select *a random question*.

a new question
from question bank
a random question

- Use the category dropdown to select the category from which to add the questions.
- Select the number of random questions to add from that category. This will add a random selection for each attempt at the quiz.
- Click **Add random question**.
- Repeat steps 3-7 to add questions from other categories.
