2. After Logging in, select **detect receiver**, and wait for the **Launch Application window.** If you have not installed the Citrix Receiver on your computer, click the **download** button.

 If the window does not come up, and you know Citrix Receiver is installed on the computer (any on campus computers will have it installed) select Already Installed. Otherwise, just select Open link.

4. If you didn't get prompted for the Citrix Receiver, click your name in the top-right corner and click "Change Citrix Receiver"

## 5. Click the 'Apps' tab at the top of the screen

## 6. Search for app and select to launch

.edu/Citrix/Coug

7. If launched correctly, the application will start in its own window, rather than in a browser tab.

While some app do work in the 'Light Version' of CougarApps, using the receiver with this method will ensure the best experience.
