Computer & Network Security

Definition

This document establishes the computer and network security policy for the California State University San Marcos. The computer and network security policy is intended to protect the integrity of campus networks and to mitigate the risks and losses associated with security threats to campus networks and network resources, while striving to maintain the free and open access to technology which is one of the campus' core values.

Authority

Scope

This policy applies to faculty, staff, students and guests of Cal State San Marcos.

Alexander Gonzalez, President
