Subject: California Faculty Association Concerted Activities Update

Yesterday the California Faculty Association announced potential strike dates in April. CSUSM respects the collective bargaining process and we know the California State University remains committed to reaching a solution.

If a strike should occur, our primary goal will be to ensure that our University remains open and student instruction and other student services continue. We remain committed to assuring progress to your degree as scheduled.

We will continue to provide e-mail updates with information as it becomes available. Thank you for your understanding and patience during this time.
