

MSDSonline
— a velocityEHS solution —

**SAFETY
DATA
SHEETS**

The online Safety Data Sheet (SDS) search system used by CSUSM. It can only be accessed from a **CSUSM networked computer** through this link:

<https://www.csusm.edu/shs/safetyprograms/msdspage.html>

The screenshot shows the MSDSonline website interface. At the top left is the logo "MSDSonline — a velocityEHS solution —". To the right is a navigation menu with links: "Q SDS/MSDS Search", "Solutions", "Industries", "Resources", "News & Events", "EH&S Blog", and "Contact | Login". The main heading is "Free SDS / MSDS Search" with a sub-heading "Try A Search Now". Below this is a text prompt: "To view or print an SDS/MSDS, you must create a free trial account with us." A search box contains the placeholder text "Search by Product Name, Manufacturer, CAS #, and/or Product Code". To the right of the search box is a green button labeled "SEARCH".

To use the online search feature, enter the name of the chemical you are searching for in the "Product" box then click the SEARCH box to the right.

Once you find an SDS, there is a variety of information that you are able to access in addition to the standard safety information, such as precaution statements and chemical concentration.

If for any reason you are not able to access SDS online during your work shift, notify your supervisor immediately or contact the Office of Safety, Health and Sustainability Services at **760-750-4502**.

Stay safe and up to date!
