

**MSDSonline**  
— a velocityEHS solution —

**SAFETY  
DATA  
SHEETS**

The online Safety Data Sheet (SDS) search system used by CSUSM can only be accessed from a **CSUSM networked computer** through this link:

<http://hq.msdsonline.com/csuedus/>

The screenshot shows the MSDSonline website interface. At the top, there is a navigation bar with the MSDSonline logo and a velocityEHS solution tagline. To the right of the logo are several menu items: "Q SDS/MSDS Search", "Solutions", "Industries", "Resources", "News & Events", "EH&S Blog", and "Contact | Login". Below the navigation bar, the main heading is "Free SDS / MSDS Search" in blue, followed by a green button that says "Try A Search Now". Below this, a line of text states: "To view or print an SDS/MSDS, you must create a free trial account with us." At the bottom of the search area, there is a search input field with the placeholder text "Search by Product Name, Manufacturer, CAS #, and/or Product Code" and a green "SEARCH" button to its right.

To use the online search feature, enter the name of the chemical you are searching for in the "Product" box then click the SEARCH box to the right.

Once you find an SDS, there is a variety of information that you can access in addition to the standard safety information, such as precaution statements and chemical concentration.

If for any reason you are not able to access SDS online during your work shift, notify your supervisor immediately or contact Safety, Health & Sustainability at **760-750-4502**.

Stay safe and up to date!
