CSUSM OFFERS WINTER INTERSESSION COURSES TO THE COMMUNITY

For students and individuals in the community who want to accelerate their progress toward a degree, Cal State San Marcos is offering a full range of courses in key academic areas during Winter Intersession 2021.

Offered on a compressed timeline, these courses enable students to earn as many as four units in four weeks. The session dates are Monday, Dec. 21, 2020, to Saturday, Jan. 16, 2021.

College students, qualified high school seniors and community members can register for the winter intersession courses without being formally admitted to the university, making it easy to complete requirements in many subject areas.

Credits from CSUSM courses are fully transferable to other institutions. In addition, up to 24 undergraduate and nine graduate units taken as a nonmatriculated student may be counted toward a CSUSM degree.

Visit csusm.edu/winter for more information.

CREDIT COURSES
To register for credit courses, including Open University, academic credit, special session courses and degree programs, please follow the specific registration procedures outlined on our website: csusm.edu/el.

WHEN AND HOW CAN I PAY FOR A COURSE?

Fees for noncredit courses are due at the time of registration. We accept MasterCard, Visa, Discover, American Express, check, and company purchase orders.

- In person: You may also pay with check or money order at Extended Learning (Monday through Friday only)
- By mail: You can mail a check or money order made payable to Cal State San Marcos Extended Learning. No credit card payments can be accepted by mail.
- Online: Extended Learning accepts MasterCard, Visa, Discover, American Express and e-check payments securely online.

NOTE: Effective July 2016, all Extended Learning credit card transactions will be charged a convenience fee of 2.75%. The convenience fee is subject to change.

WHAT ARE THE CANCELLATION, DROP AND REFUND POLICIES?

Following is a summary. Please visit our website for complete details on these policies: csusm.edu/el/faq.

NONCREDIT COURSES
For all noncredit courses, cancellation notifications must be made in writing by e-mail to el@csusm.edu; faxed to 760-750-3138; or mailed with postmark date three days before the first day of class to receive a full refund (less a $20 administrative fee and the 2.75% convenience fee).

No refunds will be issued once a course has started. No refunds will be granted for online courses once the online material has been accessed by the student. No-shows are held responsible for payment in full. One transfer or substitution may be allowed in lieu of a refund.

CREDIT COURSES
The Extended Learning refund policy does not necessarily coincide with the university’s add/drop period.

You can drop your credit courses anytime via the MyCSUSM student portal at my.csusm.edu. If you do not know your student ID and password to access the portal, contact the Student Help Desk at 760-750-6505.

On Oct. 10, 2019, the Saddle Ridge fire erupted in northern Los Angeles just as residents were settling in for the night. Over the next 20 days, the wildfire incinerated 8,799 acres, damaged or destroyed 107 structures, injured eight people and caused one fatality. At its peak, the fire torched 800 acres an hour. Mandatory evacuation orders went out to 100,000 residents. More than 1,000 firefighters fought the blaze, including Mo Khazaal and his crews.

With the Los Angeles County Fire Department for 20 years, Mo is a fire captain who leads six wildland firefighting crews as a camp superintendent. He is also a student in CSUSM’s online BS in Wildfire Science and the Urban Interface. In the midst of the Saddle Ridge fire, he suddenly faced a conflict.

“It got pretty sketchy for me,” Mo says. “I had very minimal downtime and I had finals coming. I remember thinking, I can either sleep, shower or take my finals, but I can’t do all three.”

Fortunately, because the program is structured with firefighters’ needs in mind, Mo was able to defer his finals and get the sleep and shower he desperately needed.

“I’m always one phone call away from leaving for two weeks,” adds Mo, who is in the online program’s first cohort. “The professors have all been so flexible and understanding with our schedules.”

CSUSM’s BS in Wildfire Science and the Urban Interface was developed in response to the increasing fire threat to wildlands and the wildland-urban interface (WUI), spaces where houses and other community structures are in or near undeveloped wildlands.

A 2018 study published in the *Proceedings of the National Academy of Sciences* shows that between 1990 and 2010, the WUI expanded nationally by 46 million acres and nearly 13 million houses. California leads the nation in terms of people (11 million, or 25% of the state’s population) and structures (4.46 million) in the WUI [USDA/U.S. Forest Service].

As the WUI continues to expand, the danger of wildland fires escalates. In every year since 2000, annual averages show that 71,300 wildfires burned a total of 6.9 million acres nationally, double the average 3.3 million acres burned annually in the 1990s [National Interagency Fire Center].
The BS in Wildfire Science emerged from a recommendation among industry leaders to improve research and firefighter education regarding wildfire strategies in the wildland-urban interface.

“I’ve been doing research with fire services for 15 years now,” says Matt Rahn, founding director and research faculty for the degree program, which was developed in partnership with a number of key firefighting agencies, including Cal Fire, San Diego County Fire, the Los Angeles County Fire Department, the U.S. Forest Service and the International Association of Firefighters. “We created the program based on their recommendations and needs. We added a lot to the curriculum that other fire programs simply don’t offer.”

In addition to covering key topics of wildfire science and operations, the curriculum explores critical issues such as firefighter mental and behavioral health, firefighter health and safety, emerging topics and technologies, as well as policy and law.

“The fire service is getting to be more academic,” says Mo, who also serves as a wildland fire lead instructor for the LA County Fire Department. “I wanted to learn from the foremost experts in the field, academia and peer-reviewed journals so I can take that to my classroom.”

A key goal of the program is for students to elevate their skills and build knowledge in the field by developing research. Current research projects focus on firefighting protective gear, contamination risk and personal protective equipment (PPE), sleep deprivation and more.

“The scientific process is about problem-solving. It’s being able to ask a question and work through it to have a defensible response; a scientifically and statistically rigorous response,” says Matt. “If you are getting more advanced degrees in your profession, at some point you will be moving up the ranks to take on a leadership role and you will be making choices about policies and procedures.”

For Mo, who has served as a paramedic, firefighter, engineer, fire captain and camp superintendent, education is about career options and much more. It’s personal.

“We get to marry up the boots-on-the-ground experience with research, all for the purpose of making it safer for my crews and myself when we are out there,” says Mo. “My ultimate goal is to use the research to make fatalities and tragedies less and less frequent, and that’s why I jumped at the chance to take this bachelor’s program specific to wildland fire.”

Mo’s final research project is on accident causation models in aviation and medicine because, like in firefighting, “when they have a bad day, people die,” he says. “I’m applying the models to firefighting to see which ones can help us make the best decisions in the moment and realize as early as possible when something is headed toward a catastrophic event.”

The end goal is always about getting the crew home safely.

“Whether we are on an initial attack or a long strike team, coming back safe with my crew, and knowing we did some really hard things and that we did a lot of good for that incident ... that is the most satisfying part of the job.”

Mo Khazaal, Fire Captain and Camp Superintendent, Los Angeles County Fire Department

BACHELOR OF SCIENCE IN
BUSINESS ADMINISTRATION

THEMECULA | FALL 2020; ONLINE

PROGRAM OVERVIEW
The Bachelor of Science in Business Administration (BSBA) in Temecula provides the skills needed to be successful in the business world and prepares students for entrance into some of the finest companies in the region and abroad. Unique to the program is a high degree of flexibility, including rolling admissions, rolling entry and both full- and part-time options.

The College of Business Administration, in partnership with Extended Learning, offers this rigorous undergraduate program designed to balance theory and application. The curriculum encompasses significant professional training, writing skills, presentation skills and teamwork. In addition, students in this program complete their course of study with the Senior Experience Program, a culminating learning experience unique to CSUSM.

The outstanding faculty and staff for this program are committed to helping students achieve their goals. As part of this commitment, the innovative BSBA is a cohort degree program, providing immediate peer support, individualized attention, guaranteed placement in courses, guaranteed time to completion and small class sizes.

Students in cohorts tend to form a strong support system and professional network because they are accepted into the same program, take their classes together and graduate together.

PROGRAM BENEFITS
• Collaborative cohort-based model: Full-time students work through the curriculum as a cohort to achieve the same academic degree, resulting in consistent peer support throughout the program.
• Guaranteed time to completion: Full-time students can complete the program in five terms.
• Community collaboration: The program emphasizes active, immersive learning through partnerships with local community leaders, businesses and organizations.

ADMISSION REQUIREMENTS
• Completion of the pre-business core courses prior to admission
• Minimum 2.5 cumulative GPA in pre-business core
• Individual pre-business core courses completed with a C or better
• Completion of CSU general education transfer requirements

PROGRAM LOGISTICS
APPLICATION DEADLINE: Visit website for date
START DATE: Cohorts begin every fall, spring and summer semester
DURATION: Five semesters (21 months). A part-time option is available.
LOCATION: CSUSM Temecula Campus
UNITS: 60, not including pre-business core
APPLICATION FEE: $70
TUITION: $499 per unit; $29,940 entire degree (plus university fees)
FUNDING: Eligible for financial aid, VA

PROGRAM OVERVIEW

The College of Business Administration and Extended Learning have partnered to develop a Specialized Master of Business Administration (SMBA) program for recent college graduates. This flexible, innovative program benefits business and non-business graduates and international students interested in pursuing advanced business education.

The unique stackable program consists of three phases: the foundation, the core and the specialization, which offer three entry and exit points into and out of the program. Upon satisfactory completion of each phase of the program, students will receive a certificate. Students have the potential to earn a Certificate of Advanced Study in Business Foundations, a Certificate of Advanced Study in Core Business Knowledge, a Certificate of Advanced Study in Business Intelligence/International Business, and upon completion of the final project, an MBA.

Students begin with a one-unit MBA bridge program focused on basic skills, including career planning, business communication and quantitative methods.

All students are required to complete a one-unit career planning program, including career assessment, skills development, interviewing strategies, mentoring and networking.

The program ends in a capstone course and a culminating experience during the final semester. Business intelligence option students will participate in an international experience involving travel to a foreign country with a faculty member to participate in company visits and pursue a project.

ADMISSION REQUIREMENTS

1. A four-year college course of study or an appropriate baccalaureate degree (or equivalent preparation) from a regionally accredited institution or from an international institution that meets CSUSM accreditation standards.

2. Be in good academic standing at the last college or university attended.

3. A GPA of B (3.0) or better in the last 60 graded semester units from a WASC-equivalent university.

4. A GMAT score of 500 or above, with a minimum 30th percentile score in the verbal section, a minimum 30th percentile score in the quantitative section, a minimum score of 4.0 in the analytical writing section and a minimum score of 4.0 in the integrated reasoning section. The faculty admissions committee will use the best GMAT score taken within the past five years. May submit GRE score report for the GMAT requirement.

5. All graduate applicants, regardless of citizenship, whose preparatory education was principally in a language other than English must demonstrate competence in English. All graduate applicants must have a TOEFL score of 80 iBT or above (213 on computer-based examination; 550 paper-based), or an IELTS score of 6.0, unless they possess a bachelor’s degree from a post-secondary institution where English was the principal language of instruction.

PROGRAM LOGISTICS

APPLICATION DEADLINE: Rolling admissions

START DATE: Cohorts begin every fall and summer semester

TIME: Weekday mornings

DURATION: 15 months with foundation (48 units); 12 months if the foundation is waived (36 units). A part-time option is available.

LOCATION: CSUSM

UNITs: 48 with the foundation courses; 36 if the foundation is waived

APPLICATION FEE: $70

TUITION: $825 per unit; $39,600 total for the 15-month program (plus university fees); $29,700 total for the 12-month program (plus university fees)

FUNDING: Eligible for financial aid, VA
Supply Chain in Demand
Homero Escandón | Professional Certification Exam Preparation

When Homero Escandón left the military in 2008, he had accumulated 11 years of valuable experience in distribution and logistics, and he had earned his first professional certification in manufacturing performance improvement. Today, Homero is vice president of manufacturing—operational excellence and supply chain at Biotix Inc., a San Diego manufacturer of equipment for research labs.

If it’s up to Homero, many others will join the rapidly growing supply chain industry, and education will lead the way, particularly through professional certifications.

“The last figure I saw was that for every six open positions, we have one qualified candidate,” Homero says. “Due to globalization, supply chain management jobs are in demand. One of the main reasons we have a talent shortage is that a lot of young people don’t even know about this career path.”

Homero established a strong base in the field during his military service, and his next career move was to make a commitment to education. In the past dozen years, Homero completed a BS in Organizational Leadership and an MBA as well as seven additional professional certifications in supply chain operations and manufacturing improvement.

Certainly, the two degrees would have been sufficient to fuel his steady rise in supply chain management, so why the certifications?

“Certifications are typically quite focused,” Homero says. “In day-to-day work, I’m able to call back some of the things that have been covered in my certifications and provide some coaching in those areas. And I’m also able to go back and open up a book as a point of reference for something I may not have had as much exposure to but I know we covered in my certifications.”

Homero also uses his expertise to give back generously to the industry as a mentor, an instructor and a volunteer. Not only has he taught a number of the courses in which he holds certifications, he is also president of the APICS San Diego chapter, a professional industry association and supply chain education provider. At CSUSM, he has been an instructor for the APICS-partnered Operations Resource Management program.

Homero encourages others to consider certifications as part of their career growth. “If you can align the right candidate to the right certification, it’s something they can turn around and use immediately,” he says.

A nonprofit organization, APICS works to expand its outreach into the community through partnerships such as with CSUSM on education programs for CPIM (Certified in Production and Inventory Management), CSCP (Certified Supply Chain Professional) and ORM (Operations Resource Management).

As a career to consider, the importance of the global supply chain became immediately evident to the public this year as manufacturers around the world ramped up or pivoted product supply in response to the COVID-19 pandemic.

“Our world is about supply chain nowadays,” Homero says. “A few decades ago, a huge focus was on operations management, or managing what was inside your four walls. Now, one manufacturer can have multiple-tiered suppliers across the globe, so it’s about managing upstream and downstream. And that is where the opportunity for supply chain talent is coming from. Talent is in demand.”

For more information on certification exam preparation at CSUSM, please visit csusm.edu/el/programs/business.
CAPM (CERTIFIED ASSOCIATE IN PROJECT MANAGEMENT) CERTIFICATION EXAM PREPARATION

PROGRAM OVERVIEW

If you are new to project management or have been working as a team member and are seeking additional knowledge to advance your career, then this new project management certification exam preparation program is for you!

The Certified Associate in Project Management (CAPM) certification is designed for project team members and those who want to enhance their project management skills to increase their career and advancement opportunities. You will acquire skills that will enable you to align your work with other project managers and take on increased responsibilities within project teams.

This 13-week program will provide you with foundational knowledge in the key areas of project management, including:

- Project integration and scope
- Managing schedules and budgets
- Project quality
- Human resources
- Communication
- Procurement
- Risk and stakeholder management

According to Payscale.com, the median salary for a general project manager is $73,349, with pay increasing by experience and location. Project managers earn higher than the national average in Washington D.C. (14.8% more), Houston (10.9%) and Los Angeles (8.5%).

– Payscale.com

Course sessions will include a combination of lecture, discussion and quizzes.

PROGRAM BENEFITS

- Materials that are relevant for the novice to the experienced project manager
- Comprehensive learning system with online resources, including quizzes, flashcards and practice exams.
- Course content will have immediate applicability to current work projects
- Course format will prepare you to pass the Project Management Institute (PMI) CAPM and PMP exams.

CAPM EXAM REQUIREMENTS (if pursuing certification)

- High school diploma and at least 1,500 hours of project management experience
- High school diploma and at least 23 hours of project management education

PROGRAM LOGISTICS

PROGRAM DATES: Sept. 8 - Dec. 15, 2020
TIME: Tuesday/Thursday, 6 - 7:30 p.m.
REGISTRATION: To receive materials prior to class start, please register by Aug. 17
LOCATION: Online (Fall 2020)
DURATION: 13 weeks
CEU: 3.9
FEE: $2,100, including the CertWise Learning System for PMP and online resources

PARTNER

CERTWISE®
BY HOLMES CORPORATION
PROGRAM OVERVIEW

CSUSM is proud to partner with APICS San Diego to offer the Certified in Production and Inventory Management (CPIM) exam preparation program. CPIM is recognized worldwide as the standard in production and inventory control, one of the most critical functions within an organization for reducing costs and achieving a competitive edge.

Earning the CPIM credential makes you a recognized expert in internal operations for your organization. Your commitment and effort demonstrate your high level of knowledge and skills to your employer and colleagues. Certification makes you a more valuable asset to your organization, boosting your career and keeping your organization more competitive in today’s economy. Wherever your career takes you, your CPIM certification defines you as an expert and leader in internal operations.

To successfully earn the APICS CPIM designation, you must successfully pass two exams:

• CPIM 1 exam covers the basics of supply chain management
• CPIM 2 exam covers internal operations such as strategic management, master planning of resources, detailed scheduling and planning, and execution and control of operations

According to PayScale.com, inventory control managers can earn between $39,000 and $84,000. Geographic location and career duration impact pay for this position. Positions in inventory control can lead to roles as warehouse manager, supply chain manager, purchasing manager and more.
– PayScale.com

AUDIENCE

This program serves supply chain professionals with at least two years of experience who are seeking in-depth knowledge of their company’s internal operations, production and inventory management. It is also beneficial for employees looking to secure their career options and for managers who are working to improve operations, customer satisfaction and company profits. This is the next educational opportunity for professionals who have successfully completed the CSUSM/APICS Operations Resource Management Certificate program.

NOTE: These programs are designed to prepare individuals to successfully pass the rigorous CPIM exams and are not intended for new and/or entry level supply chain professionals. (See ORM Certificate on page 17.)

PROGRAM BENEFITS

This program utilizes the APICS CPIM Learning System, providing you with access to the most comprehensive, effective and up-to-date exam preparation tools available.

• Learn from experienced instructors
• Network and learn from a diverse group operations professionals
• Assess your current knowledge with post and practice exams
• Utilize a variety of interactive online study tools to create your own SmartStudy plan
• Stay focused and on track with a structured learning experience

CSUSM is proud to partner with APICS San Diego to offer the Certified Supply Chain Professional (CSCP) exam preparation program. CSCP is the only supply chain certification that encompasses the entire global supply chain and demonstrates your knowledge and organizational skills for developing streamlined operations. From suppliers to the end customer, CSCP covers globalization, logistics, IT enablement, and both supplier and customer relations. Since 2006, more than 25,000 professionals in over 100 countries have earned this designation.

Employment of supply chain professionals—logisticians who analyze and manage the life cycle of a product from supplier to consumer—is expected to grow 5 percent through 2028. The median annual wage for logisticians is $74,600, and the top industries served include the federal government, manufacturing and wholesale trade.

Primary topic areas include:

- **Fundamentals of Supply Chain Management**
  Topics include: broad concepts of supply chain management; key measures for planning and controlling inventories; demand forecasting and management techniques

- **Supply Chain Strategy, Design and Compliance**
  Topics include: globalization effects on inbound and outbound logistics; technologies for design, data, operations and communications in supply chain; and core concepts of CRM

- **Implementation and Operations**
  Topics include: managing supply from internal and external sources; implementation of demand plans; and capturing and communicating point-of-sale data

To successfully earn the APICS CSCP designation, you must pass one exam and also have three years of supply-chain-related work experience, a bachelor’s degree or international equivalent, or CPIM, CFPIM, CIRM, SCOR-P, CPM, CSM or CPSM designations.

**PROGRAM BENEFITS**

This program uses the APICS CSCP Learning System, providing you with access to the most comprehensive, effective and up-to-date exam preparation tools available.

- Learn from experienced instructors
- Network and learn from a diverse group of operations professionals
- Assess your current knowledge with post and practice exams
- Use a variety of interactive online study tools to create your own SmartStudy plan

LEADING AND INFLUENCING WITH 
EMOTIONAL INTELLIGENCE

SAN MARCOS  |  FALL 2020; ONLINE

PROGRAM OVERVIEW
Emotional intelligence (EI) accounts for more than 50 percent of workplace success. Leaders at all levels are required to connect with others and inspire action to achieve results. Key requirements to leading successfully are self-awareness, strong interpersonal skills, resiliency and staying present and focused amid uncertainty. In this course, Leading and Influencing With Emotional Intelligence, you will gain the practical tools and strategies to motivate and engage your team, deepen collaborative relationships and help you act in authentic ways to increase your leadership effectiveness. You will also receive a personalized EQ-I 2.0 assessment and a one-hour individual coaching session to help guide your self-development.

AUDIENCE
This program is ideal for leaders who have at least one direct report or who lead cross-functional teams and have responsibilities for influencing others. The program targets mid-to-director-level leaders who have a foundation in managing others.

COURSE OBJECTIVES
• Understand the key areas of emotional intelligence and how it relates to leadership
• Obtain a baseline EI through the EQ-I 2.0, a leading assessment tool
• Identify strengths and development areas through robust self-reflection and planning

EQ-I 2.0 ASSESSMENT
The emotional intelligence (EI) report has many features to provide you with a snapshot of how your EI compares to that of other leaders as well as insight into your leadership strengths and potential areas for development. The report examines your results on the EQ-i 2.0 through four key dimensions of leadership, including authenticity, coaching, insight and innovation. Fifteen years of research has shown that leaders tend to score higher in EI than the general population. Many leaders find it valuable to focus on improving specific skills that support broader leadership competencies, making the EQ-i 2.0 the perfect building block to reaching your potential.

EI ONE-ON-ONE COACHING SESSION
The Institute of Coaching cites that over 70 percent of individuals who receive coaching benefited from improved work performance, relationships and more effective communication skills. It is no secret that the opportunity to gain insight into EI can close critical performance gaps. In this one-hour coaching session, you will gain valuable feedback and guidance from an executive coach and, together, you will have the opportunity to create an actionable plan.

One of the first activities was a fast-paced conversation with a peer and I listened 20 percent of the time. I zoned out. Conversations are crucial to the employee because they are expecting you to be in the moment with them and for you to understand what they are going through.”
– Oscar Suarez, Senior Operations Manager, Dental Program, Neighborhood Healthcare

“Uncover habitual ways of thinking and being as well as self-limiting patterns
Reframe your thoughts and perspectives for positive relationships
Increase your emotional flexibility and ways of listening

COURSE TOPICS
• Fundamentals of Emotional Intelligence – Why it Matters
• Assessing Your Emotional Intelligence – Establishing a Baseline and Plan
• Increasing Self-Awareness and Demonstrating Authenticity
• Building Social Awareness and Interpersonal Effectiveness
• Enhancing Team Leadership, Collaboration and Performance
• Developing Others, Coaching and Leading as a Way of Being

STAT
A 40-year study of UC Berkeley PhDs concluded that emotional intelligence (EI) was four times more likely than intelligence quotient (IQ) to predict who would achieve success in their field.
CERTIFICATE IN
HUMAN RESOURCE MANAGEMENT

PROGRAM OVERVIEW
The human resource function is a crucial element in your organization’s successful operation. This program focuses on the critical skills you need to manage the day-to-day HR-related responsibilities and strategic HR vision, from recruiting hard-to-find talent to being a strategic partner in guiding your organization’s growth and success.

LEARNING OUTCOMES
• Analyze, select and implement benefit practices
• Identify and design competitive salary structures
• Understand human resources’ purpose in an organization
• Develop appropriate policies and employee handbooks
• Conduct meaningful and accurate performance appraisals
• Prepare a human resource action plan that aligns with a business plan
• Create an effective talent acquisition and retention strategy

AUDIENCE
HR professionals, small-business owners and others who are seeking to enter or support the human resource function.

PROGRAM BENEFITS
• Comprehensive course format for completion within one year
• Evening classes for working professionals
• Industry-certified instructors
• Diverse participants for networking and peer-to-peer learning
• Funding available for individuals in transition and military members and spouses

CERTIFICATE IN NONPROFIT MANAGEMENT AND LEADERSHIP

PROGRAM OVERVIEW
This program will provide a broad overview of how nonprofit organizations are structured and cover the necessary skills to accomplish the agency mission and effectively implement strategic goals and objectives. It will equip emerging nonprofit leaders with the tools to respond to the increasingly complex, dynamic and challenging nonprofit management environment.

AUDIENCE
• Nonprofit professionals seeking to advance to the next level in their career
• Professionals from other industries who are interested in exploring careers in the nonprofit sector
• Human development students who are interested in pursuing careers within the nonprofit sector

COURSES
• Four comprehensive courses to include:
  » Nonprofit Management Principles and Practices
  » Legal and Ethical Issues and Risk Management
  » Financial, MIS Management and Technology
  » Executive and Board Leadership and Governance
• Capstone Project

“Nonprofits account for 12.5 million jobs nationally, or 10.2 percent of private sector employment, with an average annual wage per employee of $53,667. In California, nonprofits account for 1.1 million jobs statewide, or 7.9% of the state’s private sector jobs, with an average annual wage per employee of $62,559.”

PROGRAM INSTRUCTOR
Lead Faculty: Dom Betro, ACSW, teaches Human Service Management, Leadership and Social Entrepreneurship at CSU San Marcos, CSU San Bernardino, Notre Dame University, La Sierra University and UC Riverside. Betro was most recently (1985–2018) the chief executive officer of Family Service Association, a leading nonprofit organization in Riverside/ San Bernardino counties.

Local industry leaders and subject-matter experts will be included as guest lecturers and faculty members.

OPERATIONS RESOURCE MANAGEMENT

PROGRAM OVERVIEW

Effective operations resource management is key to an organization’s financial success by providing efficient and effective supply chain control to an organization’s products and services. Whether you are looking to update your knowledge of supply chain management and logistics, learn a specific skill or pursue CPIM certification, this program provides the knowledge and skills needed to become better informed and more effective in today’s globally competitive business environment.

AUDIENCE

Operations management professionals who are responsible for or support the effective planning, scheduling, use and control of a manufacturing or service organization.

PROGRAM BENEFITS

• APICS-developed course materials
• Certified industry instructors
• Peer-to-peer learning and networking
• Classroom learning immediately applicable to workplace projects

LEARNING OUTCOMES

• Apply inventory planning principles in strategic and tactical processes
• Prepare effective inventory processes and controls
• Effectively manage activities related to planning, scheduling and controlling the manufacturing process
• Identify and mitigate the challenges of global sourcing and procurement
• Understand the interdependency of all supply chain functions

PMP® (PROJECT MANAGEMENT PROFESSIONAL)
CERTIFICATION EXAM PREPARATION

SAN MARCOS  FALL 2020: ONLINE

PROGRAM OVERVIEW
Position yourself for a big career move with PMP® certification. A career in project management offers a variety of jobs across industries, incredible growth potential and excellent compensation. Establish yourself as a globally recognized project manager by earning the most sought-after credential in the profession: Project Management Professional® (PMP). PMP certification is a proven way to enhance your résumé, elevate your career potential and boost your earnings.

Industry projections show that employers will need to fill nearly 2.2 million new project-oriented roles each year through 2027 in the 11 countries analyzed. In addition, as opportunities are growing, much of the available talent is reaching retirement age ... creating an extraordinarily positive job outlook for skilled project professionals.

– Project Management Job Growth and Talent Gap Report, 2017-2027, Project Management Institute

PROGRAM BENEFITS
• Comprehensive reading materials provide an in-depth exploration of the five knowledge domains tested on the PMP exam and include a glossary of key PMP terminology and progress-check questions
• Interactive online study tools include pre- and post-tests; SmartStudy tools; chapter quizzes; process group quizzes; flashcards; post-test PMP practice exam; progress report; and an online resource center
• Learn from PMP-certified instructors with a broad range of experience and knowledge
• Structured learning environment that accelerates learning and improves retention
• Meets education prerequisite for the PMP exam (35 contact hours of education). Learn more about PMP certification, prerequisites and exam at PMI.org
• Network with peers from a variety of industries and backgrounds.
• Take advantage of your employer’s tuition reimbursement program
• Earn 3.5 CEU

SHRM-CP/SHRM-SCP (SOCIETY FOR HUMAN RESOURCE MANAGEMENT)
CERTIFICATION EXAM PREPARATION

SAN MARCOS  FALL 2020: ONLINE

PROGRAM OVERVIEW
Establish yourself as a globally recognized human resource expert by earning the standard in HR certification: SHRM Certified Professional (SHRM-CP®) and SHRM Senior Certified Professional (SHRM-SCP®). Ensure you’re prepared by attending this program specifically designed for SHRM credential candidates. Expand and test your knowledge and practical, real-life competencies in areas critical for HR career success. This intensive 12-week program combines expert instruction with the SHRM Learning System® for SHRM-CP/SHRM-SCP, so you will learn faster, retain more knowledge and stay on track for success on the exam.

AUGUSTINE
This course is designed primarily for individuals seeking SHRM-CP or SHRM-SCP certification and is a great choice for HR practitioners, staff and professionals seeking advancement in employee relations, benefits, or compensation, training and development. This is an excellent capstone program for those who have completed HR management certificate programs at CSUSM or elsewhere.

PROGRAM BENEFITS
• Expert instruction is combined with the SHRM Learning System for more comprehensive learning and longer retention of information.
• Peer discussion and real-life experiences help reinforce learning materials.
• A structured learning experience keeps you on track and focused.
• Utilize the SHRM Learning System, historically ranked the No. 1 HR certification prep tool.
• Acquire the knowledge and understand the behavioral competencies to help you prepare for the exam.
• Demonstrate that you have mastered the application of HR technical and behavioral competencies.
• Prove that your HR knowledge is current and relevant.
• Demonstrate your ability to put your knowledge into action on the job.
• Expand your scope within the HR field to bring new ideas to your organization.

EXAM ELIGIBILITY REQUIREMENTS
• Applicants must show that they have worked in an HR role for more than 1,000 hours within a calendar year, which equates to one year of experience.
• HR experience may be in an HR-exempt or nonexempt capacity.
• Applicants with a graduate degree in HR (or global equivalency) must be currently employed in an HR role.
• HR experience may be classified directly, as working in an HR role, or indirectly, by consulting, educating or researching HR practices linked specifically to human resource management.
• SHRM membership is not required.

LEARNING OUTCOMES
• Be prepared to assume greater leadership roles that contribute to your organization’s strategic direction.

PARTNER
PROGRAM OVERVIEW
You know the realities of today’s workplace—fewer staff are dealing with increasing workloads and more challenging people issues than ever before. As a manager in today’s workplace, you know that you must continue to sharpen your management skills to meet these demands, not only for your own effectiveness, but also for your team’s success and overall organizational performance.

LEARNING OUTCOMES
• Know the differences between a leader and manager  
• Know the employment laws that impact you and your employees  
• Assess and manage the performance management process  
• Effectively communicate with new staff and peers  
• Understand how personal cultural values impact perceptions of others  
• Conduct positive results-oriented discussions  
• Effectively set achievable goals for you and your team

MASTER OF ARTS IN EDUCATIONAL ADMINISTRATION
MASTER OF ARTS IN READING, LANGUAGE AND LITERACY

California is the No. 2 employment center for elementary and secondary school education administrators nationally, with 22,950 employed at an annual mean wage of $124,500, the fourth-highest pay rate in the nation.
— Bureau of Labor Statistics, Occupational Employment and Wages

MASTER OF ARTS IN EDUCATIONAL ADMINISTRATION
PROGRAM OVERVIEW
The Master of Arts in Educational Administration qualifies candidates for the Certificate of Eligibility for the Preliminary Educational Administration Services credential. This program, offered in partnership between the College of Education, Health and Human Services and Extended Learning, focuses on K-12 education through a lens of cultural proficiency. Candidates also conduct meaningful field experience in school settings.

Candidates will develop skills and knowledge in areas of practice related to:
• Leading 21st century instruction
• Creating a responsive environment and community
• Managing budget, legal issues and personnel
• Understanding and responding to data
• Engaging in sound theoretical and practical leadership philosophies
• Developing a culture of continual school improvement

MASTER OF ARTS IN READING, LANGUAGE AND LITERACY
PROGRAM OVERVIEW
The Master of Arts in Reading, Language and Literacy is a fully online degree program that prepares educators to teach literacy in the 21st century classroom and meet Common Core standards. This program is offered as a partnership between Extended Learning and the College of Education, Health and Human Services. Based on a set of 12 guiding principles, the program prepares highly effective teachers to meet the needs of monolingual and multilingual students. In addition to a master’s degree, graduates of the program holding a CTC-approved valid teaching credential (or equivalent) may be eligible for recommendation for the California Reading and Literacy Added Authorization and the California Reading and Literacy Leadership Specialist Credential.

**APPLIED BEHAVIOR ANALYSIS**

**CERTIFICATE: BCBA AND BCaBA TRACKS**

**PROGRAM OVERVIEW**

Behavior analysts provide services to individuals, families, group homes, schools, mental health agencies, hospitals, industrial and business settings, and other agencies working with individuals who require intensive behavioral training and/or consultation. Special populations such as individuals with autism spectrum disorder and other developmental disabilities have been shown to benefit greatly from Applied Behavior Analysis (ABA) services. ABA is also frequently used in the field of education for both neurotypical students and students with disabilities. Behavior analyst professionals are strongly encouraged by the Behavior Analyst Certification Board (BACB) to pursue Board Certified Behavior Analyst (BCBA) or Board Certified Assistant Behavior Analyst (BCaBA) certification. BCBA and BCaBA certifications are considered the industry standard in this field and are nationally and internationally recognized. The Applied Behavior Analysis Certificate of Advanced Study program at CSUSM—offered by the College of Education, Health and Human Services in partnership with Extended Learning—provides coursework required by the BACB for those seeking either the BCBA or the BCaBA. All courses are approved by the ABAI as meeting coursework eligibility requirements for certification under the BACB’s Fifth Edition Task List core curriculum standards. Each online course is eight weeks long. Two courses are taken each semester and one course in the summer.

**ADMISSION REQUIREMENTS**

- **BCBA:** Possession of graduate degree (e.g., master’s or doctoral) from an accredited institution.
- **BCaBA:** Possession of a minimum of a bachelor’s degree from an accredited university.

**FACTS ABOUT THE PROGRAM**

- This is an approved program. Approval was granted by the Behavioral Analysis Certification Board in October 2013.
- CSUSM provides the approved coursework for the BCBA/BCaBA certification. Please go to the Behavior Analyst Certification Board website (bacb.com) for additional requirements for certification.
- All courses for this program must be taken and completed through CSUSM.

**PROGRAM LOGISTICS**

**APPLICATION DEADLINE:** Visit website for date

TEACHING ENGLISH AS A SECOND/FOREIGN LANGUAGE (TESL/TEFL) CERTIFICATE

PROGRAM OVERVIEW

Travel and teach English abroad or in the United States! This 120-hour certificate program focuses on best practices in methods, materials and techniques used to teach English as a second/foreign language. During the program, participants develop essential skills for teaching English-language learners in a domestic or international context.

The curriculum, presented by a team of ALCI master instructors, includes a historical overview of the theories and methodologies that have most impacted modern language-acquisition pedagogy as well as courses focusing on instructional strategies for basic core skills. Participants receive ample opportunities to develop effective lesson plans and syllabi, and to practice classroom management strategies, peer-teaching and classroom facilitation. Participants must also demonstrate an understanding of the concepts covered in class through individual and group projects, as well as written reflections and quizzes.

The six-week summer course runs Monday through Friday on the CSUSM campus for a total of 20 hours per week, and the 15-week spring course is offered Tuesday and Thursday evenings for eight hours per week.

PROGRAM BENEFITS

• Hands-on training and practice with English-language learners in university setting
• Professional development and guidance in finding employment in the field
• Sessions taught by master teachers with extensive experience in TESL/TEFL, teacher training and curriculum development
• Solid foundation in TESL/TEFL methodology

LEARNING OUTCOMES

By the end of the certificate program, participants will:

• Understand the historical progression of theories and methodologies that have impacted current approaches for instructing English-language learners
• Explore and analyze a wide variety of strategies, materials and best practices used to teach English as a second or foreign language
• Develop their skills for creating well-structured and effective lesson plans and syllabi
• Develop confidence when presenting instruction to a classroom audience
• Become familiar with cultural conventions and diversity that can impact international educators in their respective teaching environments
• Reflect on their own English-language skills (so as to provide an optimal model of oral and written English communication to future students)

BACHELOR OF SCIENCE IN
WILDFIRE SCIENCE AND
THE URBAN INTERFACE

ONLINE

PROGRAM OVERVIEW
The growth of housing and other developments in environments at risk for wildfires has called for new methods of fire prevention and response, as well as public safety education, and created the need for a new generation of firefighters expertly skilled in the wildland-urban interface (WUI).

If you have your associate degree or have completed 60 units of relevant undergraduate coursework, you are eligible to earn your BS in Wildfire Science and the Urban Interface in CSUSM’s new, fully online degree completion program. After just two years (five semesters), become a part of this new generation of firefighters, technical experts, decision-makers and scientists ready to meet the evolving and increasing demands of the industry.

Topics include biostatistics for wildfire science, conservation biology, wildland-urban interface, fire science, emerging technologies and topics, ethics and the environment, firefighter health and safety, and more.

Developed in partnership with leading agencies such as Cal Fire, San Diego County Fire, Los Angeles County Fire and the U.S. Forest Service, you will not only earn your bachelor’s degree but stand out among your peers as you become a leader in today’s fire service industry.

PROGRAM BENEFITS
• Fully online program designed for working and aspiring professionals in the fire industry
• Only program of its kind in California

As the wildland-urban interface continues to expand, the danger of wildland fires escalates. In every year since 2000, annual averages show that 71,300 wildfires burned a total of 6.9 million acres nationally, double the average 3.3 million acres burned annually in the 1990s.

– National Interagency Fire Center

• Provides a clear path to promotion (To advance beyond battalion chief, many fire departments now require applicants to have a bachelor’s degree, preferably in fire science, public administration or a related field.)
• Convenient, eight-week courses

LEARNING OUTCOMES
Students who graduate with a BS in Wildfire Science and the Urban Interface will be able to:
• Identify issues and risks related to firefighter health and safety, emphasizing wildland and wildland-urban interface environments
• Identify and apply appropriate practices, tools and strategies to avoid, minimize and mitigate the risks of fires in the wildland and wildland-urban interface
• Apply scientific methods and statistical/mathematical concepts to demonstrate problem-solving and leadership skills within their field of study
• Communicate wildfire and urban interface perspectives, concepts and theories related to societal problems, threats, risks and safety impacts

ONLINE CAREER TRAINING AND PROFESSIONAL DEVELOPMENT

NEW PROGRAMS ADDED MONTHLY!

Whether you are looking for classes to increase your current job knowledge, prepare for industry certification or explore new career opportunities, there is a class for you!

• Start anytime
• Many programs completed in six to 12 months
• In-depth study; all learning materials provided
• Personal instructor assistance
• Certificate of completion awarded with passing score
• Earn continuing education units

CHOOSE FROM HUNDREDS OF COURSES, SUCH AS:

• Certified Clinical Medical Assistant
• Certified Medical Administrative Assistant with Billing and Coding
• CompTIA A+, Network+ and Security+ Certification Prep
• Lean Six Sigma
• Paralegal Training
• Pharmacy Technician
• Software and Web Development, and much more!

MyCAA Approved

LIFE ON THE RUN

Megan Hansen | BS in Kinesiology: Health Science Option

Megan Hansen began envisioning life as a physical therapist very early. At a martial arts class one morning a dozen years ago, she watched her mom spar with the instructor and in throwing a roundhouse kick, her mom tore her ACL, a major ligament in the knee.

“It was really bad,” says Megan, who adds that the injury required three surgeries. “She also messed up her meniscus (cartilage between the shinbone and the thighbone). We’ve been in and out of physical therapy clinics for years. It’s something that bothers her every day.”

Megan’s family does not simply aspire to an active life. Rather, it is their way of life. The family lives and homeschools in Menifee, California, where Megan, her two sisters, Natalie and Tara, and parents, Celoa and Kevin, have all trained and competed for years in martial arts, tennis and running. Kevin—a tennis and cross country/track athlete in high school and college—is their tennis and running coach.

Without an organized team, the sisters started competing in community races like the Mission Inn Run in downtown Riverside. Megan has taken first place for females overall in the half marathon for each of the three years she has run that distance.

As a third-degree black belt in taekwondo and a second-degree black belt in both karate and kobudo, Megan not only competed in tournaments but also taught classes, which she loved. Ultimately, though, she realized that her passion is in working with athletes as a physical therapist. That made undergraduate studies in kinesiology at CSUSM Temecula Campus a natural fit for Megan.

“I wanted to study kinesiology to help athletes like myself,” she says. “One of the worst things to deal with is an injury and then to have something you’re passionate about taken away from you.”

Megan and her sister, Natalie, have had some short-term experience with recuperation from stress fractures, but have healed and continued competing. Turns out, the kinesiology coursework is benefiting the entire family.

“It’s a universal thing we can all talk about,” Megan says, explaining that her nutrition, anatomy and physiology lessons have informed the family’s prevention, training and recovery routines. “I love learning the mechanics behind everything in the body. Movement anatomy was one of my favorite classes ever. It was amazing.”

With the Temecula campus less than 30 minutes from home, it’s an easy commute and Megan is able to save on rent while she continues to train with her family. The guaranteed classes and time to graduation are the perfect complement for this natural planner, who also trains an average of two hours a day and was working most nights as a restaurant hostess until COVID-19 affected operations.

Less than a year to earning her bachelor’s degree, Megan is considering a master’s degree or a PhD program as her next step, still with the ultimate goal of becoming a physical therapist.

“It’s something I’ve wanted to do since I was 10,” she says. “This degree is a huge stepping stone to be able to get into the field I’ve aspired to my entire life. It will be such a reward. All of that hard work truly pays off.”

For more information about the BS in Kinesiology: Health Science Option, please visit csusm.edu/el/kines.
BACHELOR OF SCIENCE IN
KINESIOLOGY: HEALTH SCIENCE OPTION

PROGRAM OVERVIEW
The College of Education, Health and Human Services has partnered with Extended Learning to offer the Bachelor of Science in Kinesiology: Health Science Option. Kinesiology, the science of movement, integrates the biological, physical, behavioral and social sciences in the study of physical activity and sport, and their effect on the fitness and quality of life of people across the lifespan. As such, this degree prepares students for a wide variety of careers in the areas of public health, health/fitness education and promotion, wellness coaching, health research, and community health advocacy and programming.

The BS in Kinesiology is one of the fastest-growing degrees at CSUSM. Graduates with the health science option are skilled in promoting positive, personal behavior changes that have an impact on the health of individuals and their communities. In addition, they are well-prepared to pursue graduate programs and/or additional study in public health, nursing, kinesiology and health science.

PROGRAM BENEFITS
- The cohort-based program at the Temecula campus ensures time to graduation with smaller class sizes and guaranteed course placement in the two-year program cycle.
- Our new human performance laboratory provides students a state-of-the-art facility in which to learn and conduct hypothesis-driven research for projects in several kinesiology classes.
- Evaluate movement science questions through the performance of health, fitness and movement assessment; the acquisition, analysis and interpretation of original data; and the appraisal and application of information from current literature.
- Use oral and written communication that meets appropriate professional and scientific standards in kinesiology.
- Model behavior consistent with that of a kinesiology professional, including advocacy for a healthy, active lifestyle; adherence to professional ethics; service to others; shared responsibility and successful collaboration with peers; and pursuit of learning beyond CSUSM.

LEARNING OUTCOMES
Graduates with a Bachelor of Science in Kinesiology will be able to:
- Describe fundamental principles of kinesiology, including anatomy and physiology; how to teach movement-related skills; health promotion; physiological response to exercise; the mechanics and control of movement.
- Apply kinesiology-related skills to real-world problems through empirical research, internships, field experience and/or service learning.
- Evaluate movement science questions through the performance of health, fitness and movement assessment; the acquisition, analysis and interpretation of original data; and the appraisal and application of information from current literature.
- Use oral and written communication that meets appropriate professional and scientific standards in kinesiology.
- Model behavior consistent with that of a kinesiology professional, including advocacy for a healthy, active lifestyle; adherence to professional ethics; service to others; shared responsibility and successful collaboration with peers; and pursuit of learning beyond CSUSM.

PREREQUISITES
- Completion of the equivalent of 60 semester units of study at a community college or university
- Minimum 2.5 cumulative GPA from all transfer coursework
- Completion of CSU general education transfer requirements
- Completion of BIOL 104 Principles of Biology: Human Emphasis or its equivalent

PROGRAM LOGISTICS
PRIORITY APPLICATION DEADLINE: Please visit website for date
START DATE: Cohorts begin every fall semester
DURATION: Five semesters (21 months)
LOCATION: CSUSM Temecula Campus
UNITS: 71 with pre-kines core; 55 without pre-kines core
APPLICATION FEE: $70
TUITION: $449 per unit; $31,879 entire degree (plus university fees)
FUNDING: Eligible for financial aid, VA, GI Bill

ACCELERATED BACHELOR OF SCIENCE IN
KINESIOLOGY:
MOVEMENT SCIENCE OPTION

“...If you want to apply science by working with people. Movement science is understanding the human body across the lifespan and then applying basic biological principles, physics and physiology so that we can understand everything from quiet standing and walking through exercise and sports.”

– Deanna Asakawa, Assistant Professor, CSUSM Department of Kinesiology

PROGRAM OVERVIEW

The College of Education, Health and Human Services has partnered with Extended Learning to offer the Accelerated Bachelor of Science in Kinesiology: Movement Science Option. Kinesiology, the science of movement, integrates the biological, physical, behavioral and social sciences into the study of physical activity and sport, and their effect on the fitness and quality of life for people across the lifespan. As such, this degree prepares students for a wide variety of careers in the areas of public health, health/fitness education and promotion, wellness coaching, health research, and community health advocacy and programming.

The cohort-based program ensures time to graduation with smaller class sizes and guaranteed course placement in the 16-month program cycle.

PROGRAM BENEFITS

• This accelerated option allows for students to complete their Bachelor of Science in Kinesiology in as little as 16 months.
• Evidence-based research skills are gained through practical group projects and exercises.

PREREQUISITES

• Completed 60 or more transferable semester (90 transferable quarter) units by the end of spring
• Earned a cumulative transfer GPA of 2.0 or higher

LEARNING OUTCOMES

• Students will evaluate movement science questions through 1) the performance of health, fitness and movement assessment, 2) the acquisition, analysis and interpretation of original data, and 3) the procurement, appraisal and application of information from current research literature.
• Use of oral and written communication that meets appropriate professional and scientific standards in kinesiology.
• Model behavior consistent with that of a kinesiology professional, including advocacy for a healthy, active lifestyle, adherence to professional ethics, service to others, shared responsibility and successful collaboration with peers, and pursuit of learning beyond CSUSM.

PREREQUISITES included in the program*:

• BIOL 177: Introduction to Anatomy and Physiology for Kinesiology I
• BIOL 178: Introduction to Anatomy and Physiology for Kinesiology II
• CHEM 150 or 105: General, Organic and Biochemistry for Life
• MATH 125: Pre-Calculus
*You may apply without these or transfer them in if already completed.

PREREQUISITES not included in the program:

• BIOL 104: Principles of Biology: Human Emphasis
• PSYC 100: Introduction to Psychology
• KINE 200: First Aid and Safety
• KINE 201: CPR and AED
• KINE 202: Introduction to Kinesiology

APPLICATION FEE: $70
TUITION: $449 per unit; $23,797 entire degree (plus university fees)
FUNDING: Eligible for financial aid, VA, GI Bill

College of Education, Health and Human Services
ACCELERATED BACHELOR OF SCIENCE IN NURSING

PROGRAM OVERVIEW
The CSUSM School of Nursing and Extended Learning have partnered to offer an Accelerated Bachelor of Science in Nursing program to help fulfill the healthcare needs in our region. This fast-paced, 24-month additional bachelor’s degree program is designed for students who hold a degree in a discipline outside of nursing and who have not completed any LVN or RN coursework. Students will complete approximately 78 semester units of study in both didactic and clinical coursework.

The program starts three times a year: fall, spring and summer. The fall and spring programs each accept one cohort in San Marcos and the summer program accepts one cohort in Temecula.

Completion of the CSUSM Bachelor of Science in Nursing program enables individuals to sit for the NCLEX examination for RN licensure.

“A cohort is a group of students who work through a curriculum together to achieve the same academic degree. Because they are accepted into the same program, take their classes together and graduate together, students in cohorts tend to form a strong support system and professional network that benefit them during their degree program and beyond.”

– Joshua De Jesus, Graduate

PREREQUISITES
• Bachelor’s degree (from a regionally accredited institution, or U.S. equivalent for degree coursework completed outside of the U.S.)
• Minimum 2.5 GPA in the last 60 units completed
• Completion of the pre-nursing core
• Minimum of 2.75 GPA in pre-nursing core (C grades or higher; C-minus grades are not acceptable)
• Completion of additional CSUSM lower-division GE BRN-required courses, and other CSUSM graduation requirements
• Passage of the TEAS exam (version six) with a minimum 71.0 percent composite score

ADDITIONAL PROGRAM REQUIREMENTS
Each student in the ABSN program is required to complete approximately 78 semester units of study within the six academic terms. Approximately 27 units of the program consist of clinical study. Clinical rotations can vary by day and time each month. Please note: classes and clinicals may be scheduled on Saturdays and Sundays.

PROGRAM LOGISTICS
PRIORITY APPLICATION DEADLINE:
Rolling admissions; qualified admissions will continue on a space-available basis.

START DATE:
Cohorts begin every fall and spring semester at the San Marcos campus and every summer semester at the Temecula campus

DURATION:
Six semesters (two years)

LOCATION:
CSUSM; CSUSM Temecula Campus

UNITS:

RN TO BACHELOR OF SCIENCE IN NURSING

ONLINE

PROGRAM OVERVIEW
Completing your Bachelor of Science in Nursing online at Cal State San Marcos will empower you with the practical experience and professional background to help your patients and your community achieve the goal of optimal health.

CSUSM’s online RN to BSN—offered in partnership by Extended Learning and the College of Education, Health and Human Services—also lets you earn your pre-nursing core credits concurrently with your nursing courses. The pre-nursing core courses must be satisfied and can be taken in any order alongside your lower-division nursing courses during your first year of the program. This not only gives you nursing skills and knowledge you can apply immediately to your current nursing practice, but also allows you to graduate sooner.

In order to ensure your transition back to school is successful, in-service RNs prepared at the master’s degree level or above will provide you with personal coaching and assistance throughout the program.

CSUSM’s RN to BSN program has been ranked #1 online RN to BSN in California #5 online program in the nation – registerednursing.org

PROGRAM BENEFITS
- A well-developed professional portfolio of real-world clinical, leadership and case management experience
- Evidence-based research skills gained through practical group projects and exercises
- Ability to apply for California public health nurse certification
- Utilize the research process, its application to the discipline of nursing and its essential relationship to evidence-based nursing practice.
- Function within the specific professional nursing roles to provide care, coordinate care, deliver health education, and advocate for individuals, families, groups and communities.

PREREQUISITES
- RN-BSN program application
- GPA 2.0
- Paid program application fee
- All official, hard-copy transcripts from all institutions attended
- Associate-level RN degree conferred

LEARNING OUTCOMES
Students who graduate with a Bachelor of Science in Nursing will be able to:
- Apply the nursing process through critical thinking and professional nursing judgment to provide and evaluate nursing care in acute and long-term care, and community settings.
- Stat
  - The average salary for an RN with an ADN is $69,000 and for an RN with a BSN is $85,000.
  - Payscale.com

APPLICATION DEADLINE:
Rolling admissions

START DATE: Cohorts begin five times per year

DURATION: 14 months

LOCATION: Online

UNITS: 38

APPLICATION FEE: $70

TUITION: $313 per unit; $11,894 entire degree (plus university fees)

FUNDING: Eligible for financial aid, VA, GI Bill

NOTE: This is a cohort-based, non-impacted program. Extended Learning uses a rolling admissions process. The admissions committee evaluates completed files and makes decisions on a continual basis.
PROGRAM OVERVIEW

CSUSM offers the Bachelor of Science in Speech-Language Pathology (SLP). This degree provides the foundational coursework necessary for application to graduate programs that lead to a career in speech-language pathology as well as a breadth of curriculum that introduces students to the fields of general and special education, social work and public health. Students who earn the BS in Speech-Language Pathology will be eligible to apply to a number of CSUSM graduate programs, including the Master of Science in Speech-Language Pathology.

The program provides students with a broad education covering content related to speech, language, communication, cognitive and swallowing disorders across the lifespan. It builds important foundational skills in public speaking, professional writing, evidence-based practice and cultural sensitivity. As the coursework has both breadth and depth in related fields, the bachelor’s degree provides preparation in related fields, including communication, counseling, general education, health, human development, rehabilitation, social service and special education.

“I love the cohort format of the BS SLP program at CSUSM. You go through the program with the same set of students and get a chance to build a great rapport with a group of people who are as excited about the subject as you are.”

– Amber Engen, Graduate, BS SLP

PROGRAM BENEFITS

• Prepares students for the MS SLP program
• Taught using the latest technology
• Courses taught by faculty with many years of experience working in their areas of expertise
• Cohort design guarantees a seat in all required courses
• Prepares students for a variety of career paths, including graduate work in speech-language pathology, audiology and related disciplines and careers
• Explain basic human communication and swallowing processes, including their biological, neurological, acoustic, psychological, developmental, linguistic and cultural bases
• Synthesize knowledge across disciplines to discern differences and disorders in communication and swallowing processes
• Demonstrate knowledge of processes used in research and of the integration of research principles into evidence-based decision-making

LEARNING OUTCOMES

• Explain development of communication functions and their breakdown across the lifespan
• Synthesize knowledge across disciplines, including basic science, behavioral science and humanities to apply to speech-language pathology
• Describe the most common speech, language, communication and swallowing disorders that are diagnosed and treated by speech-language pathologists

PROGRAM LOGISTICS

APPLICATION DEADLINE: Rolling admissions until full
START DATE: Cohorts begin every fall and summer semester
FALL START: Traditional face-to-face classes. On campus full time.
SUMMER START: Hybrid program. Classes two to three days a week. Each class is face-to-face with an online component.
DURATION: Five semesters
LOCATION: CSUSM
UNITS: 75, including 15 SLP prep units
APPLICATION FEE: $70
TUITION: $349 per unit; $26,175 entire degree, including 15 prep units (plus university fees)
FUNDING: Eligible for financial aid, VA, GI Bill

FALL 2020 | CSUSM EXTENDED LEARNING | CSUSM.EDU/EL/CATALOG
MASTER OF SCIENCE IN NURSING

PROGRAM OVERVIEW

The mission of the graduate program in nursing at California State University San Marcos is to provide superior graduate education to qualified San Diego students, leading to the Master of Science in Nursing (MSN) degree. Our objective is to prepare San Diego-area nurses in generalist and advanced-practice roles for positions in the healthcare industry, community or public health agencies, and academia, and for continued study at the doctoral level. The MSN program includes a strong foundation in theory and research inquiry. The School of Nursing acknowledges the responsibility to address the nursing and healthcare needs in populations in San Diego and Riverside counties, as well as communities around the globe.

The MSN at CSUSM is a part-time program designed for the working registered nurse who holds a baccalaureate degree in nursing. The program—offered in partnership by the College of Education, Health and Human Services and Extended Learning—can be completed in eight semesters.

Students have the option to pursue one of three concentrations that contain several tracks and specialties: advanced practice nursing, nursing education and clinical nurse leader.

• The advanced practice nursing concentration offers two tracks: nurse practitioner, an advanced practice nurse working with populations across the lifespan (specializations in this track are family nurse practitioner and psychiatric mental health nurse practitioner); and clinical nurse specialist, which prepares students for advanced work in assessment, pathophysiology/pharmacology and management of the chronically ill.

• The nursing education concentration covers the theories of adult learning, curriculum design and development, and teaching strategies.

• The clinical nurse leader concentration prepares students to be leaders, managers and educators at the unit level.

PREREQUISITES

• BSN degree from a CCNE- or NLN-accredited program

• Minimum GPA of 3.0 in the last 60 units of undergraduate coursework

• Evidence of satisfactory completion of undergraduate- or graduate-level inferential statistics, health assessment with lab and nursing research with a grade of C or better

• Proof of licensure as a California registered nurse

• A current résumé with one year of recent nursing experience

• Two letters of reference from undergraduate nursing faculty and nursing supervisor

• One- to two-page essay outlining professional and educational goals

PROGRAM LOGISTICS

START DATE: Cohorts begin every fall semester

DURATION: Seven or eight semesters, depending on concentration

LOCATION: CSUSM

UNITS: 49-52 minimum, depending on concentration

APPLICATION FEE: $70

TUITION: $699 per unit; approximately $40,000 total degree

FUNDING: Eligible for financial aid, VA, GI Bill

“I appreciate the small class sizes and cohort format of the MSN program at CSUSM. It allows students the time and space to maximize their education and interact with their peers and instructors.”

– Jennifer Spahr, MSN, RN, CPN, NP-C, Graduate; Instructor, Bachelor of Science in Nursing
MASTER OF
PUBLIC HEALTH
SAN MARCOS  ONLINE

PROGRAM OVERVIEW
The 16-month accelerated Master of Public Health (MPH) educates students to recognize and respond to emerging threats to public health in a culturally sensitive manner. This program prepares students to use organized, interdisciplinary efforts to address pressing domestic and global health challenges as well as concerns of communities and populations at risk for disease and injury.

The program’s mission is to enhance wellness and reduce health disparities through community-based interventions and practice by preparing culturally responsive professionals who are engaged locally and abroad.

PROGRAM BENEFITS
The traditional mission of the field of public health is to foster conditions within which people can be healthy. Graduates are prepared to hold positions as public health professionals in local community organizations, hospitals, health management organizations, government agencies, academia, the private sector, and international or multinational organizations.

- Program admits two times per year—fall and spring—keeping class sizes small and promoting greater personal attention
- Hybrid format with courses that start every eight weeks and are conducted on two evenings a week
- Fully online format offered through the Moodle course management system with courses that start every eight weeks
- Cohort design guarantees a seat in all required courses
- Students choose between two tracks
  » Health Promotion and Education
  » Global Health
- 16-month accelerated program (six units every eight weeks)
- Degree culminates with a field experience (internship) and a capstone project or thesis
- Demand for professionals with master’s-level public health education grew significantly from 2010 to 2015*
  *Relevant regional job postings increased 128 percent from 2010 to 2013 and 76 percent from 2014 to 2015.

PREREQUISITES
- Baccalaureate degree from an institution accredited by a regional accrediting association
- 2.5 GPA in last 60 units of undergraduate coursework or last degree completed
- Evidence of satisfactory completion of statistics or quantitative methods course with a grade of a C or better
- Current professional résumé showing education and work experience
- Two letters of recommendation from persons familiar with the student’s academic qualifications and/or professional experience relevant to the MPH degree. Each letter must be on official letterhead and include the name and title of the referer.
- A narrative statement describing how and why the MPH program relates to applicant’s professional goals (see the MPH website for details)

PROGRAM LOGISTICS
START DATE: Cohorts begin every fall and spring semester
DURATION: Four semesters (16 months)
LOCATION: CSUSM (hybrid) and online
UNITS: 42
APPLICATION FEE: $70
TUITION: $599 per unit; $25,158 entire degree (plus university fees)
FUNDING: Eligible for financial aid, VA, GI Bill

“The important thing about the MPH program is that the professors are truly invested in making students successful in real-world public health practice. The support system provided by the cohort also helps students achieve their goals. Members of the cohort not only provide help to one another, but they build real and lasting relationships. I feel blessed to have been a part of this program.”
– Penny Peyton, Graduate; National Diabetes Prevention Program Lifestyle Coach, San Diego Health and Human Services Agency, Aging and Independence Services
PROGRAM OVERVIEW

There is a national demand for highly trained and educated speech-language pathology professionals in many different service settings: schools, hospitals, skilled nursing facilities and private practices. CSUSM offers a Master of Science in Speech-Language Pathology to meet this workforce need.

The Master of Science in Speech-Language Pathology at CSUSM trains students to assess and treat individuals with a broad array of communicative and swallowing disorders, including language, articulation, phonology, fluency, voice, motor speech, dysphagia and cognitive-linguistic.

After successfully completing our program, candidates will be eligible for a temporary state licensure, preliminary CTC credentialing and initiation of their clinical fellowship year toward applying for the ASHA CCC.

PROGRAM BENEFITS

- Focus on skill development in each content area
- Community-based clinics used for four clinical rotations across the program
- Prepares graduates to be critical thinkers
- Use of simulation and standardized patients across the curriculum
- Cohort design, which guarantees classes and promotes building collaborative student-faculty relationships
- Training to work as an SLP across the lifespan in a variety of employment settings

LEARNING OUTCOMES

- Describe the nature of typical and disordered communication and swallowing across the lifespan
- Integrate theory, research and evidence-based principles into prevention, assessment and intervention practices
- Interact and communicate in ways that promote wellness and reflect respect for diversity, collaboration and ethics
- Demonstrate summative knowledge and skills necessary for entry-level practice within the field of speech-language pathology through defense of a culminating experience

PROGRAM LOGISTICS

START DATE: Cohorts begin every fall semester
TIME: Monday – Friday, 8 a.m. – 5 p.m., typically. Occasional weekends and evenings required for special program events and training.

CERTIFIED PROFESSIONAL CODER (CPC) AND CERTIFIED MEDICAL ADMINISTRATIVE ASSISTANT (CMAA) CERTIFICATES

ONLINE

PROGRAM OVERVIEW
Earn two distinguished medical certifications: Certified Professional Coder (CPC) and Certified Medical Administrative Assistant (CMAA).

Administrative medical assistants are skilled multitaskers who direct the flow of patients through an office. Effective patient flow allows the practice to operate efficiently, increase revenue and provide a positive experience for the patient.

This program offers valuable training in medical office management and legal, ethical and regulatory concepts that are central to this field, including HIPAA compliance and third-party guidelines for filing insurance claims. You will gain hands-on, practical experience in medical billing and coding and work with the main coding manual ICD-10-CM, ICD-10-PCS, CPT and HCPCS Level II. You will learn how to code diagnoses, services and procedures for all systems of the body.

Medical terminology is the language of medicine. You will study word parts and the structures and functions of the human body. You will also study disorders and medical procedures common to each body system, including musculoskeletal, cardiovascular, respiratory, digestive, nervous, endocrine, integumentary, genitourinary, lymphatic and immune.

You’ll also have the option to complete the all-new career roadmap lesson for medical billing and coding. This lesson will help you find, land and keep a job in your new field. These job-finding and job-landing skills will serve you now and throughout the rest of your career.

PROGRAM BENEFITS
• Upon completion of this program, you’ll be well prepared to find your place in this rewarding healthcare career
• Be prepared to sit for the Certified Professional Coder (CPC) exam, offered by the American Academy of Professional Coders, and the Certified Medical Administrative Assistant (CMAA) exam, offered by the National Healthcareer Association
• Registration fees for both exams and course materials included
• Also prepares students to sit for the Certified Billing and Coding Specialist (CBCS) and the Certified Coding Associate (CCA) exams
• Entirely online and completed at your own pace
• No prerequisites or applications. Open to the community.

CAREERS
• Medical administrative assistant
• Medical receptionist
• Front office coordinator
• Insurance claims specialist
• Medical coder
• Patient access representative

PROGRAM OVERVIEW
Vista Community Clinic (VCC) and CSUSM have developed a new certificate program to train medical assistants. This low-cost program will enable you to learn the skills necessary to enter the healthcare field and excel as a medical assistant. Training is focused on specific job skills and is designed to accommodate working professionals.

PROGRAM BENEFITS
• Classes held on weeknight evenings and Saturdays to accommodate working professionals
• Classes taught by an experienced medical assistant educator
• Successful completion of this program enables you to sit for the California certified medical assistant exam
• Program combines classroom training and clinical experience to ensure you are equipped with the necessary skills to become a successful medical assistant
• Job placement assistance available for those who successfully complete the program

WHAT IS THE ROLE OF MEDICAL ASSISTANTS?
• Certified medical assistants most often work in a doctor’s office, a nursing care center or another medical facility such as a hospital, nursing home or pharmacy. Responsibilities include providing continuing patient care, working with doctors and nurses to meet the needs of patients, and performing administrative and clerical duties in an office environment.
• Working directly with patients, medical assistants help with everything from taking vital signs and explaining treatment protocols to administering injections and scheduling lab tests.
• Medical assistants communicate directly with physicians, stepping in to help with procedures, providing translation services for non-English-speaking patients and more.
• Medical assistants may also assist with administrative duties, including scheduling appointments, maintaining medical records, billing and coding for insurance purposes.

PROGRAM LOGISTICS
START DATE: Visit website for application deadlines
TIME: Classes meet three times per week: two weekday evenings and Saturdays
DURATION: Six months
LOCATION: Vista Community Clinic: 4700 N. River Road (second floor), Oceanside, CA
FEE: $3,000 entire certificate, including textbooks
FUNDING: WIOA; MyCAA; financial aid available as well as financial support for child care and transportation

Healthcare Interpreting, page 46
Pharmacy technicians have become indispensable to the healthcare industry, and it’s a great time to join this growing field. In this pharmacy technician program, you will get started on this fulfilling career path. You’ll gain the skills and knowledge to qualify for entry-level positions in pharmacies and be prepared for national certification. The program pairs you with an instructor for one-on-one assistance and you will also have the opportunity to apply for a 100-hour externship. The pharmacy technician program will give you hands-on practice in retail pharmacy procedures through an online lab module. You’ll learn the information necessary to process prescriptions and physician orders and apply that knowledge to fill mock prescriptions. The curriculum also includes the ethics of pharmacy practice and education about prescription medications, patient care and interaction, and charges and reimbursement. All materials are included in the cost of the program. Upon completion of this program, you will be prepared to sit for the national certification exam, which is the Pharmacy Technician Certification Exam (PTCE) offered by Pharmacy Technician Certification Board (PTCB). The registration fee for this exam is included with the program.

By 2028, the number of jobs for pharmacy technicians is projected to have grown by 31,500 over 10 years. – Bureau of Labor Statistics, Occupational Outlook Handbook

• You’ll learn everything you need to know to pass the national certification exam offered by the Pharmacy Technician Certification Board.
• This program is entirely online and is completed at your own pace.
• When you register, you have 12 months to complete this program.
• No prerequisites or application.
• Textbooks and exam voucher are included with this program.
• We’ll be there every step of the way with individualized career coaching and 24-hour access to all course materials.

PROGRAM BENEFITS
• You will learn to function as an important member of the pharmacy team by providing excellent customer service and distributing medical prescriptions.

CAREERS
• Pharmacy technician
• Certified pharmacy technician

CERTIFICATION
• Pharmacy Technician Certification Exam (PTCE)

LEARNING OUTCOMES
Upon completing this program, you will know how to:
• Understand the laws that govern the pharmacy, whether federal- or state-mandated
• Discuss the HIPAA requirements and their application to the pharmacy
• Interpret physician orders and prescriptions, and prepare and distribute medications
• Define medical and pharmaceutical terms and common abbreviations
• Understand the pharmacology of medications in relation to the anatomy affected
• Perform pharmaceutical calculations
• Process insurance billing or collect payments
• Communicate successfully with patients and medical professionals

PROGRAM LOGISTICS

POST MASTER OF SCIENCE
IN NURSING
CERTIFICATES

PROGRAM OVERVIEW

The Post MSN certificates are part-time programs designed for the working registered nurse who holds a Master of Science in Nursing degree. The certificates consist of five semesters. Students can pursue one of five concentrations: clinical nurse leader, clinical nurse specialist, psychiatric mental health nurse practitioner, family nurse practitioner or transitions of care management.

• The clinical nurse leader concentration prepares students to be leaders, managers and educators at the unit level through courses in health systems leadership, quality improvement, evaluation and accreditation in nursing organizations, financial resource management and management of patients in the acute care setting.

• The clinical nurse specialist concentration prepares students for advanced practice nursing through courses in advanced assessment, advanced pathophysiology/pharmacology and advanced practice management of the chronically ill in the acute care and community settings.

• The psychiatric mental health nurse practitioner concentration prepares students for advanced practice nursing in clinical practice with individuals, families or populations across the lifespan at risk for developing and/or having a diagnosis of psychiatric disorders or mental health problems.

• The family nurse practitioner concentration develops advanced practice registered nurses who deliver healthcare to individuals of all ages and their families throughout the lifespan. Family nurse practitioners serve as primary healthcare providers in a variety of settings.

• The transitions of care management concentration prepares nurses to care for patients with multiple chronic conditions who are transitioning from one level of care to another, and provides training that reduces healthcare costs and improves quality and timeliness of care.

Master’s-prepared registered nurses have salaries averaging 19 percent higher than registered nurses with bachelor’s degrees. In addition, employment for nurse practitioners is projected to grow by 53,300 jobs, or 28 percent, between 2018 and 2028.

ADMISSION REQUIREMENTS

• MSN degree conferred
• Résumé
• Personal essay explaining your career goals and why you would like to obtain a Post MSN certificate
• Evidence of satisfactory completion (grade of C, 2.0 or better) of:
  » Advanced health assessment course
  » Advanced pathophysiology course
  » Advanced pharmacology course

PRE-HEALTH PROFESSIONS
CERTIFICATE

SAN MARCOS    FALL 2020: HYBRID

PROGRAM OVERVIEW

CSUSM offers an intensive pre-health professions post-baccalaureate that provides students with the science and math courses they need to prepare for entrance into health professions programs.

Many post-baccalaureate individuals decide to change their careers and enter the expanding health industry. This program prepares students who have completed a non-life-science degree in areas such as anthropology or English to gain the knowledge base required to become competitive applicants to health professional schools such as dental school, medical school or veterinary school. However, this goal is not easily realized because courses in mathematics, physics, chemistry and biology are heavily impacted at nearly every university. At CSUSM, the cohort design of the pre-health professions program helps alleviate this problem, and meets student needs for preparation to competitively qualify for admissions into health professions programs.

“I need to work 40 hours to support myself, so this program solidified my options because you’re in and out in two years, classes are all at night and they are all guaranteed so you don’t have to crash. You can work during the day and make sure that you still get in all the units that you need to apply to (health professions) schools. It’s very convenient.”

– Shannon Gargas, Student; Medical Scribe for Private Physician and Research Assistant, CSUSM Immunology Lab

ADMISSION REQUIREMENTS

• You must have earned a non-science bachelor’s degree with a minimum overall GPA of 3.0 in the last 60 units completed
• CHEM 101 or CHEM 105 (or equivalent) completed with a C or better
• MATH 125 (or equivalent) completed with a C or better. Conditional admission may be granted for students who do not possess MATH 125 on the basis that they complete an equivalent course from a regionally accredited institution or complete a two-week precalculus readiness boot camp offered at CSUSM in August.

NON-COHORT COURSES

Select pre-health courses are available to students who are not members of a pre-health professions cohort. Course offerings vary each semester and are subject to availability. Visit the website for more information.

FACTS ABOUT THE PROGRAM

• Comprises 51 credit/units of biology, chemistry, math and physics
• 13 courses, including eight with labs, to be completed in two years
• Classes are held weekday evenings over five semesters, part time (fall, spring, summer, fall, spring)
• Cohort structure guarantees classes
• Up-to-date courses help prepare for MCAT, etc.
• Financial aid eligible for the first year only through unsubsidized federal loans and outside sources

SPEECH-LANGUAGE PATHOLOGY
PREPARATION PROGRAM

“Throughout my experience in the SLP Prep program, I saw firsthand how the SLP lecturers were invested in their online students. They emphasized the importance of clarification and took time to re-explain theories and/or concepts. I was also fortunate to see their passion in the field of speech-language pathology. Their enthusiasm was contagious and helped to affirm my career goal of becoming an SLP.”

– Narmine Grace Abugan, Completed SLP Prep Program in 2015

PROGRAM OVERVIEW
This fully online SLP preparation program is a cohort program that prepares students for application to a Master of Science in Speech-Language Pathology. The courses are offered during the spring, summer and fall terms in order to prepare students for the January priority master’s application deadline. Each course is taught 100 percent online, including mandatory synchronous live chat sessions conveniently scheduled in the early evening (PST). Fall and spring classes are provided in eight-week sessions. Summer classes are in five- or 10-week sessions. This program is open to anyone interested in obtaining the prerequisite foundational knowledge required for most master’s programs in CSD/SLP.

PROGRAM BENEFITS
• Cohort design guarantees a seat in available classes
• Upon completion, student gains the prerequisites needed to apply for the Master of Science in Speech-Language Pathology program
• Courses are taught by faculty with many years of experience working in the field
• Non-cohort (open enrollment) option is available for individuals who only need some classes
• Fully online program is flexibly designed for working individuals
• Foundational knowledge in communication sciences that can be applied to a variety of fields and careers
• Conveniently scheduled live chats allow interaction with faculty

LEARNING OUTCOMES
• Explain development of communication functions and their breakdown across the lifespan
• Synthesize knowledge across disciplines, including basic science, behavioral science and humanities to apply to speech-language pathology
• Describe the most common speech, language, communication and swallowing disorders that are diagnosed and treated by speech-language pathologists

PROGRAM LOGISTICS

FALL 2020 | CSUSM EXTENDED LEARNING | CSUSM.EDU/EL/CATALOG
“During my time at CSUSM, I was able to join clubs and other campus organizations that gave me wonderful experiences to meet new people, feel like part of the local community and experience the American culture.”
— Adrien Domoison, Student, Study@CSUSM

PROGRAM OVERVIEW
The American Language and Culture Institute (ALCI) of California State University San Marcos has provided quality international education programs for more than 20 years and is globally recognized by language schools, universities, ministries of education, governmental bodies, sponsorship agencies and top educational organizations.

UNIVERSITY ENGLISH PATHWAY
The University English Pathway program is the premier intensive English program at CSU San Marcos that accepts students of varying levels of English ability and offers qualified students a pathway option to take English-language courses along with university courses.

Program features include:
• Opportunity to take university courses for credit toward a degree for qualified, advanced-level students
• Six proficiency levels
• 24 class hours per week
• Small classes
• Group activities such as beach picnics, cultural celebrations and other trips
• Academic courses in reading, vocabulary, academic writing, grammar, public speaking, study skills, test preparation and enrichment classes
• Certificates of completion and certificate ceremony

STUDY @ CSU SAN MARCOS
Study @ CSU San Marcos is a non-degree program for visiting/fee-paying international students who want to enroll in university classes for credit for one or two semesters at California State University San Marcos.

• Earn university course credits that transfer to your home university
• Study and experience campus life with American students
• Choose to join one of more than 100 recognized student organizations
• Participate in CSUSM recreation activities such as intramural sports and outdoor adventures

SHORT-TERM PROGRAMS
These are customized short-term programs designed to meet the needs of small groups who want to study English and enjoy a memorable Southern California cultural experience.

Past programs have included:
• Language travel
• Business English
• English for medical purposes
• High school/university preparation
• Leadership, service learning and community engagement

TEACHER TRAINING
These programs are for American and international students preparing to teach English abroad or in the U.S. The ALCI offers two teacher training programs for teachers of English. The Teaching English as a Second/Foreign Language (TESL/TEFL) Certificate is designed for those with minimal or no English language teaching experience who are interested in teaching English abroad (EFL) or in the United States (ESL). The TEFL Certificate for International Teachers of English is designed to meet the needs of groups of teachers with previous English-language teaching experience or students in English teacher programs in their home countries.

UNDERGRADUATE AND GRADUATE CONDITIONAL ADMISSION
This program grants undergraduate conditional admission for students wanting to study for a bachelor’s degree and graduate conditional admission for students wanting to study for a master’s degree. Students have the opportunity to be recommended for university admission without a TOEFL or IELTS score if they successfully complete this program.

STAT
CSUSM is home to approximately 380 international and exchange students and enrolls 135 students in the American Language and Culture Institute.

CERTIFICATE IN
COMMUNITY INTERPRETING

PROGRAM OVERVIEW
The Professional Certificate in Community Interpreting allows a dual-language participant with no prior interpreting skills to become a community interpreter in just 14 weeks. The skills developed are applicable to a variety of industry-based environments in the community, including business, education and human services settings. Participants will learn how to conduct the three major types of interpreting and will gain valuable skills that can help start or advance career pathways.

LEARNING OUTCOMES
• Consecutive interpreting, simultaneous interpreting and sight translation
• Interpreting protocols such as positioning, professional introductions in more than one language, direct speech and turn-taking management
• Demonstrate an understanding and application of ethical principles for community interpreters
• Strategies to acquire specialized subject-matter knowledge
• Enhanced short-term memory skills for faster translation
• Effective note-taking for interpreting
• Develop techniques to perform intervention and mediation in common community interpreting situations

CAREER OPPORTUNITIES
According to the Bureau of Labor Statistics, employment for interpreters and translators is projected to increase by 14,600 positions between 2018 and 2028, growth that is driven by globalization. Interpreters work in a variety of settings. The top industries for employment are professional, scientific and technical services; self-employed professionals; government; state, local and private hospitals; and state, local and private educational services.

Use your bilingual skills to advance your career in a broad range of community-based environments and position yourself for potential in-demand career changes or advances.

PROGRAM BENEFITS
• Interpreting skills learned through this program can be applied to a variety of industries
• Licensed industry professionals teach the program and facilitate interactive exercises as well as lectures
• Even evening classes to accommodate working professionals’ busy schedules
• Comprehensive materials and class structure enable faster transfer of knowledge to the workplace
• Certificate of completion indicates that classroom and language proficiency knowledge has been verified

BACHELOR OF ARTS IN
CRIMINOLOGY AND JUSTICE STUDIES
TEMECULA  FALL 2020: ONLINE

“If you are focused on your degree and have a career goal in mind, this campus has an advantage because you are guaranteed seating in every class, the professors know you on a personal level and you become friends with your classmates because you are always together.”

– Joseph Arellano, Student

PROGRAM OVERVIEW
The Criminology and Justice Studies program in Temecula draws on the intellectual traditions of sociology and critical criminology to understand the social correlates of crime and justice. The major provides students with a theoretical and practical foundation for building a lifelong understanding of crime and social justice and the myriad social processes surrounding both. Graduates of the criminology and justice studies program will be able to evaluate critical issues of crime and justice to pursue solutions for positive social change. The degree—offered in partnership by Extended Learning and the College of Humanities, Arts, Behavioral and Social Sciences—prepares students in Southwest Riverside County to pursue careers in criminal justice and social service agencies, as well as graduate study in such fields as criminology, law, criminal justice and justice studies. The program culminates in a capstone seminar in community service, in which students are placed in organizations that provide service to the local community.

LEARNING OUTCOMES
Students with a bachelor’s degree in criminology and justice studies can pursue a wide variety of job opportunities, which include government as well as community service agencies geared toward youth and families, law enforcement and correctional agencies, and nonprofit organizations that examine social and legal justice practices both at home and abroad.

STUDENTS IN THIS PROGRAM WILL BE ABLE TO:
• Analyze and interpret the diversity of social experience associated with criminology and social justice issues, especially as they relate to race, class, gender, age, sexual preference, religion and nationality.
• Assess competing theoretical approaches to criminology and social justice issues of publics with differing and multiple interests; specify structural or institutional sources of these criminology and social justice issues; and propose and assess policies, interventions and/or modes of advocacy that will enact positive change.
• Locate, analyze, assess and communicate criminology and social justice scholarship.
• Articulate the applicability of and demonstrate ability to employ a range of research strategies.
• Articulate the ethical and social justice implications of criminology and justice studies.

ADMISSION REQUIREMENTS
• Completion of the equivalent of 60 semester units of study at a community college or university
• Minimum 2.0 cumulative GPA from all transfer coursework
• Completion of CSU general education transfer requirements (for articulated classes, visit the Assist.org website)
• Official, hard-copy transcripts from all institutions attended

PROGRAM LOGISTICS
APPLICATION DEADLINE: Rolling admissions
START DATE: Cohorts begin every fall and spring semester
DURATION: Fall starts: five semesters; spring starts: four semesters

ACCELERATED BACHELOR OF ARTS IN SOCIOLOGY

PROGRAM OVERVIEW

Through our fully online Accelerated Bachelor of Arts in Sociology, students develop the knowledge and analytical skills necessary to understand social life in an increasingly complex world. The program is designed to produce practitioners who can examine and address large- and small-scale social problems through constructive empirical inquiry, critical analysis and strategic action; and who can implement the key insights and analytical methods of sociology to improve the social conditions in our communities.

The accelerated format of this program enables students to complete their degree in 16 months, with eight-week semesters in the summer and fall, and a five-week session during the summer.

Individuals with sociology degrees have the ability to apply sociological knowledge to careers in market research, public-opinion polling, law enforcement and criminal justice, city planning, social work, community relations and a range of other occupations in the public and private sectors.

PROGRAM BENEFITS

- Collaborative cohort-based model: students work through the curriculum as a group to achieve the same academic degree
- Guaranteed time to completion: full-time students can complete the program in 16 months

LEARNING OUTCOMES

- How to analyze and interpret the diversity of social experience using a sociological perspective
- How to locate, analyze, assess and communicate sociological scholarship

ADMISSION REQUIREMENTS

- Completed at least 60 lower-division transferable units
- Minimum 2.0 cumulative GPA in all transferable units attempted
- Successful completion of SOC 101 and SOC 201
- Successful completion of the following courses with a C-minus or better (12 units)
  » Oral Communication (A1)
  » Written Communication (A2)
  » Critical Thinking (A3)
  » Mathematics/Quantitative Reasoning (B4)

California leads the nation in employment of sociologists, with 1,070 practitioners, more than triple the number found in the next-highest state. Sociologists in California earn an annual mean wage of $98,560, the fourth-highest in the nation.

• The program’s internship and service-learning components provide the opportunity to gain practical experience in the field
• Courses are led by faculty within the College of Humanities, Arts, Behavioral and Social Sciences
• How to articulate the ethical and social justice implications of sociological inquiry
• How to demonstrate the ability to employ a range of research strategies—quantitative and qualitative—to particular research questions, theoretical orientations and social contexts
• How to assess competing theoretical approaches to societal problems of publics with differing and multiple interests; specify structural or institutional sources of these social problems; and propose and assess policies, interventions and/or modes of advocacy that will enact positive change

MASTER OF
SOCIAL WORK
SAN MARCOS

PROGRAM OVERVIEW
The Master of Social Work (MSW) program at CSUSM is designed to develop culturally competent, ethical and effective professionals for direct social work practice with diverse populations. The MSW program will prepare students for direct practice in a variety of settings, including public, private and nonprofit agencies and organizations, in social services, child welfare services, human services, healthcare and mental/behavioral health.

The MSW degree requires the completion of 60 graduate units and may be completed in two or three years. Students will complete a field practicum in a regional agency or organization.

PROGRAM BENEFITS
• The MSW is the most desired degree in the social service field
• The program is accredited by the Council on Social Work Education (CSWE)
• In-person classroom instruction by MSW faculty members
• Focus on applied learning in the classroom
• Intensive field practicum internships in local agencies
• Cohort design guarantees classes are available as needed

“An internship that is part of the program was such a great experience that it turned into my job!”
– Nancy Nguyen, MSW, Graduate

LEARNING OUTCOMES
Student learning outcomes are defined by the accrediting body, the Council on Social Work Education and encompass the following nine competencies:
• Demonstrate ethical and professional behavior
• Engage diversity and difference in practice
• Advance human rights and social, economic and environmental justice
• Engage in practice-informed research and research-informed practice
• Engage in policy practice
• Engage with individuals, families, groups, organizations and communities
• Assess individuals, families, groups, organizations and communities
• Intervene with individuals, families, groups, organizations and communities
• Evaluate practice with individuals, families, groups, organizations and communities

PARALEGAL AND ADVANCED PARALEGAL CERTIFICATES

PROGRAM OVERVIEW
This fully online, nationally acclaimed program is designed to educate those who seek to assist trial attorneys, interview witnesses, investigate complex fact patterns, research the law and assist in preparing cases for courtroom litigation. The instruction is practice-oriented and related to those areas of the law in which paralegals are most in demand. The paralegal certificate program will teach you how to work as a full-time or part-time paralegal, or how to open your own freelance business.

This program is open to the community, has no prerequisites and requires no application.

AUDIENCE
This program is designed for beginning as well as advanced legal workers or those interested in pursuing career options in this field.

REQUIRED COURSES
Paralegal Certificate Course
Advanced Paralegal Certificate Course

Both the introductory and advanced paralegal certificate must be completed to be recognized as a paralegal by the state of California.

“...This course was most definitely the most organized, well-instructed and helpful course I’ve taken. It was easy to understand the requirements, deadlines and expectations. The instructor did a great job responding to questions and was readily available. Thank you!”
– Adele Frankovich, Paralegal Graduate; Legal Assistant, Diamond Environmental Services LP

PARALEGAL CERTIFICATE COURSE (90 HOURS/9 CEU)
An introduction to paralegal studies, providing the foundation for the study of becoming a paralegal. During the seven-week course, you will gain an understanding of the American legal system and learn how you can be of assistance in the field of law.

ADVANCED PARALEGAL CERTIFICATE COURSE (270 HOURS/27 CEU)
This course will provide you with a working knowledge of legal authority: how it is used in the litigation process and how to locate it through legal research. You will also learn the basics of law office management, substantive law (such as criminal law, domestic relations, real property law and bankruptcy), and informal and formal advocacy.

OTHER LEGAL CERTIFICATES
Advanced Legal Research and Writing Certificate Course
Certified Paralegal (open enrollment and voucher included)
Legal Investigation
Legal Nurse Consultant Training
Software Essentials for the Law Office
Victim Advocacy

PROGRAM LOGISTICS
START DATE: Cohorts begin six times per year; Fall 2020: Aug. 24 - Oct. 9; Oct. 19 - Dec. 4

PROGRAM OVERVIEW

The Master of Biotechnology: A Professional Science Master’s degree is designed to meet the needs of the biotechnology industry and associated organizations. The program combines advanced study of related science, professional preparation, business and real-world experience for biotechnology-oriented students. The purpose of the degree is to prepare students for careers in technology-related organizations with a breadth of workplace knowledge.

Designed to accommodate the schedules of working professionals, the program may be completed part time in five semesters with evening classes. The program includes: 1) laboratory/technology-rich exposure in biotechnology, 2) MBA-level business core courses and 3) industry-related fundamentals. In addition to dedicated faculty, the program provides leading-edge and real-world exposure from guest lecturers and instructors who are industry/business leaders in the San Diego biotechnology community.

PREREQUISITES

Admission to the program requires an undergraduate degree with a major in a bioscience, chemistry or related area. Alternatively, applicants with BA/BS degree in a related field or equivalent work/certification experiences may be considered for conditional admission. While a minimum of a bachelor’s degree is required, admissions will consider pertinent background, prerequisite courses and opportunity for successful completion.

Generally, applicants should have courses or experience in:

- Molecular cell biology or molecular/cellular biotechnology
- Microbiology or biology of microorganisms
- Statistics
- Chemistry and biochemistry

Applicants who have not completed an upper-division biochemistry course may be required to take CHEM 341 or 351.

ADMISSION REQUIREMENTS

- Official score report of the General GRE
- Two letters of recommendation
- A one-page personal statement describing reasons for pursuing this program
- Résumé/curriculum vitae
- One official transcript from each academic institution attended
- An undergraduate grade point average in all completed science and math courses of at least 2.75 or a GPA of at least 3.0 in the last 35 semester units of science and math

PROGRAM LOGISTICS

APPLICATION DEADLINE: Rolling admissions
START DATE: Cohorts begin every fall semester
TIME: Weekday evenings
DURATION: Five semesters; 21 months
LOCATION: CSUSM
UNITS: 39
APPLICATION FEE: $70
TUITION: $825 per unit; $32,175 entire degree (plus university fees)
DISCOUNT: Application fee waived for sponsored employees
FUNDING: Eligible for financial aid, VA

Note: Visit the website for the most current program information, as additions are being sought to better suit international and veteran students as well as those who need greater lab experience and/or preparation for the program, industry and employment readiness.

“This program gets you thinking about more than just science or lab work. One of the classes involved Excel. I realized that I like analytics and this showed me a door that I could step into.”
– Dillon Howarth, Illumina

YOUR FUTURE IN CYBERSECURITY STARTS NOW

Cybersecurity is one of the fastest-growing fields in the global marketplace and demand for trained professionals far outpaces supply. A recent industry study estimates that 4 million cybersecurity professionals are needed globally—an increase of 145%—to close the current skills gap.

Interested in finding your role in this burgeoning field? No matter where you are in your career, we have the program to get you started.

NO DEGREE?
This path gives you the courses you need to get a foothold in this rapidly expanding field.

NO CYBER DEGREE?
From an introductory course to your choice of certificate programs, this plan will help you take your career to new heights.

CYBER PROFESSIONAL?
Establish yourself as a leader in the industry with our unique master’s degree that combines scientific and technical expertise with business acumen. This is the only program of its kind in California.

Why wait? Check out your options at csusm.edu/el/sciencetech

Now fully online!

The National Security Agency (NSA) and the Department of Homeland Security (DHS) have designated CSUSM as a National Center of Academic Excellence in Cyber Defense Education.
MASTER OF SCIENCE IN CYBERSECURITY
A PROFESSIONAL SCIENCE MASTER’S

ONLINE

PROGRAM OVERVIEW
With a rapid rise in the incidence of cyberattacks, former President Barack Obama characterized cyberthreats as “one of the gravest national security dangers facing the country.” To compound this issue, there exists a tremendous gap of both adequately skilled workforce professionals and education programs designed to meet the exponentially growing need.

The Professional Science Master’s degree adeptly addresses the documented need for management-trained professionals “for technology-based companies, governmental agencies and nonprofit organizations” (NPSMA.org).

CSUSM has launched the Master of Science in Cybersecurity: A Professional Science Master’s to meet this workforce need. The goal of the program is to train an expertly skilled workforce to fulfill the imminent needs of the emerging and evolving cybersecurity industry.

PROGRAM BENEFITS
• No prior knowledge of cybersecurity required
• Prepares those with a strong background in computer science for management positions in cybersecurity
• Combination of technical science and business courses addresses the need for advanced technical and business acumen in the field of cybersecurity

“ If your goal is to become an information security officer, you need to be able to understand the business side of the house and to be able to communicate with the C-suite about security. You need to know what is important to them and how to frame the conversations with that in mind. The ability to convey technical concepts with nontechnical language is an asset in this field.”
– Chelsea Power, Graduate; Information Security Analyst, CSUSM

• Designed for working adults with classes in the evening
• Cohort design guarantees classes are available as needed
• A semester-long capstone project includes onsite experience within the cybersecurity industry

ADMISSION REQUIREMENTS
• Bachelor’s degree in computer science or equivalent education background
• Applicants with a baccalaureate degree in a related field may be able to meet prerequisites with equivalent work experience in computer science and will be considered for conditional admission
• Admission requires a minimum 3.0 grade point average in upper-division computer science courses and at least a 2.5 undergraduate GPA in the last 60 semester units (or last 90 quarter units) attempted
• One official transcript from each academic institution attended
• A personal statement describing reasons for pursuing this program
• Résumé/curriculum vitae
• Two letters of recommendation

PROGRAM LOGISTICS
APPLICATION DEADLINE: Rolling admissions
START DATE: Cohorts begin every fall semester
DURATION: Five semesters (21 months)
LOCATION: Online
UNITS: 38
APPLICATION FEE: $70
TUITION: $825 per unit; $31,350 entire degree (plus university fees)
FUNDING: Eligible for financial aid. VA

Note: Select cybersecurity courses are available to the public. Please visit our website for further information.

NEW FEDERAL DESIGNATION
The National Security Agency (NSA) and the Department of Homeland Security (DHS) have designated CSUSM as a National Center of Academic Excellence in Cyber Defense Education for its MS in Cybersecurity. The agencies examined all facets of the program in a stringent review process that places CSUSM among an elite group of universities addressing a critical shortage of cybersecurity professionals.
Employment of computer and information technology occupations is projected to grow 12 percent from 2018 to 2028 – adding about 546,200 new jobs – faster than the average for all occupations. Employment of information security analysts is projected to grow 32 percent from 2018 to 2028 – adding about 35,500 new jobs – much faster than the average for all occupations.  

PROGRAM OVERVIEW

Begin or advance your career in IT! These online instructor-led courses will prepare you to pass the CompTIA A+, Network+ and Security+ certification exams. In addition, these courses will provide you with hands-on experience in these subject areas using online simulation resources.

Upon completion of each program, you will be provided an exam voucher to schedule at any Pearson VUE testing center.

NEW! A+ CERTIFICATION PREP

A+ certifies skills in entry-level PC technology. It is a vendor-neutral certification with an emphasis on the expertise needed to work as a computer service technician troubleshooting and repairing PCs. This 16-week online instructor-led course will prepare you to pass the latest CompTIA A+ certification exams. Gain hands-on experience in these subject areas using online simulation resources.

NETWORK+ CERTIFICATION PREP

Learn about networking concepts; infrastructure; network operations; network security; and troubleshooting and tools.

Prepare for careers such as network field technician, network administrator, network analyst and tech support.

SECURITY+ CERTIFICATION PREP

Topics include: threats, attacks and vulnerabilities; technologies and tools; architecture and design; identity and access management; risk management; and cryptography and PKI. This certification helps pave the way to careers such as security architect, security, consultant, security or systems analyst.

PROGRAM BENEFITS

• Fully online
• Earn certification that is recognized by leading technology companies
• Use coursework and learning support materials developed by industry experts
• Reinforce instructor-led lessons and prepare for the certification exams with CompTIA study guides
• Cumulative project reinforces the practical concepts the exam covers
• No prerequisites or application. Open to the community!
• Gain valuable experience in the fields of computer networking and information security through this business-focused coursework featuring real-world scenarios
• Exam vouchers and materials included

EQUIPMENT REQUIREMENTS

• Computer sufficient to run virtual machines
• Webcam for synchronous discussions
• Internet connection

PROGRAM LOGISTICS

DURATION: A+, 16 weeks; Network+ and Security+, eight weeks each

LOCATION: Online, instructor-led

FEE: A+, $1,995; Network+ and Security+, $1,595 each. Bundle and save: Network+ and Security+, $2,995; all three courses, $4,990. Includes all textbooks and certification vouchers.

DISCOUNT: Military, CSU Students, Staff, Alumni, Group Discount

FUNDING: WIOA, MyCAA, Workers’ Comp, TAA, Employer Training Benefit, Department of Rehabilitation, Amazon Career Choice, Payment Plan. Email bramos@csusm.edu for details.

In 2020, Blockchain was ranked the No. 1 hard skill—or technical ability—in demand by companies globally, according to an annual LinkedIn report of skills most likely to lead to hiring. The report notes that blockchain technology is growing in wide-ranging industries, including farming, healthcare, shipping and entertainment. A blockchain developer, the highest-paid role in software development, can earn a salary as high as $150,000 to $175,000 in the United States. — LinkedIn Learning and Blockchain Council

PROGRAM OVERVIEW
Blockchain technology was widely introduced through cryptocurrencies and today more companies are embracing the technology’s applications in fields such as financial services, healthcare and insurance. As more industries outside of the tech sphere recognize the potential of this revolutionary technology, blockchain developers are increasingly in demand to lead the way.

Begin building your career in this emerging field with our fully online course, Blockchain Fundamentals I: The Birth of Blockchain, featuring a blend of real-time online instruction and interactive lesson modules.

This course:
• Presents a working knowledge of the history of blockchain technology
• Provides hands-on experience with blockchain explorers and Web 3.0 tools
• Shows how the decentralized, distributed and public ledger offers security and transparency in business transactions
• Examines real-world applications of blockchain technology

COURSE OBJECTIVES
The primary objective of this course is to provide a working knowledge of the history of the blockchain since the core concepts were developed and implemented with the birth of cryptocurrencies. Lessons show how the decentralized, distributed, and largely public ledger offers the security and transparency highly sought in the financial marketplace—and others—where integrity is of the utmost importance.

While cryptocurrencies are currently the largest application for blockchain, many industries are beginning to incorporate a decentralized ledger into their business operations. As adoption of the technology grows, more industries understand the attributes that make the technology truly revolutionary.

LEARNING OUTCOMES
Upon course completion, students will be able to answer:
• What are blockchain technologies?
• What applicability did blockchain have at various stages of adoption in 1991, 2009 and today?
• Why is decentralization in the storage of files and ledger entries important to the integrity of a network?
• Why does the use of trustless technology benefit the ecosystem that it’s deployed in?
• How does Bitcoin incentivize users to ensure the integrity of the decentralized ledger?
• How do cryptocurrencies make use of blockchain technology?
• How do major corporations like IBM and Microsoft use blockchain technology?
• How does the blockchain revolution differ from the personal computing or internet revolutions?

BENEFITS
• Program instructor has been teaching the subject, attending conferences, writing code and actively developing applications in the space for years
• Comprehensive walk-throughs of multistep processes keep you on track as you experiment with blockchain explorers and Web 3.0 tools
• Vibrant visuals, videos and demonstrations help you comprehend difficult concepts
• Course topics include the birth of blockchain, altcoin adoption, securing the blockchain, privacy vs. vulnerability, tokenization and more

The median annual wage for information security analysts is $98,350 and employment for this group is expected to grow 32 percent by 2028, much faster than the average for all occupations.

PROGRAM OVERVIEW

Cybersecurity is one of the fastest-growing technology sectors and demand for jobs is expected to grow 18 percent annually through 2024. With an increased need for cyber professionals having the necessary technical and business skills, this is the perfect time to start or grow your career in cybersecurity.

If you have an undergraduate degree, but it’s not in cybersecurity, we can get you on the fast track toward a cyber career with one or both of our certificate programs.

AUDIENCE

• Students and individuals currently employed in business, government or other entities who want to develop expertise in the management side of cybersecurity but do not want to enroll in a full master’s program
• Individuals with any undergraduate degree who seek a career in cybersecurity
• Individuals with a strong background in computer science or information technology who seek a leadership position in the cybersecurity industry

PROGRAM BENEFITS

• Curriculum incorporates current real-world developments in the industry
• Students get hands-on experience on a secure network
• Evening classes accommodate working professionals
• Class availability is guaranteed through the cohort design

CYBERSECURITY TECHNOLOGIES

The Cybersecurity Technologies Certificate program focuses on security issues with technology configuration and management. Topics include operating system security, network security, secure software development and cryptography.

This certificate comprises four graduate-level courses, including Introduction to Cybersecurity. If you already completed the introductory course as part of the Cybersecurity Management, Risk and Governance Certificate, you must complete either Topics in Cybersecurity or Cryptography (MATH 503) with this certificate.

PREREQUISITES

• Fundamental Technologies in Cybersecurity Boot Camp as a refresher course
• Computer science degree or related work experience

CYBERSECURITY MANAGEMENT, RISK AND GOVERNANCE

• The Cybersecurity Management, Risk and Governance Certificate program focuses on developing and implementing an information security program. Topics covered include policy, governance, risk and organization.

PREREQUISITES

• Fundamental Technologies in Cybersecurity Boot Camp as a refresher course, or
• Related work experience in business or technology
• Degree in computer science not required

PROGRAM LOGISTICS

START DATE: Cohorts begin every fall semester
DURATION: Each certificate can be completed in one year
LOCATION: Online
UNITS: 12 for each certificate (or 13 with MATH 503)
FEE: $9,900 for each certificate, or $10,725 with MATH 503 ($825 per unit)

SOFTWARE AND WEB DEVELOPMENT
CERTIFICATES

PROGRAM OVERVIEW
Through our online IT Academy, you can develop the skills and experience you need to begin or advance your career in information technology, web development, cybersecurity, networking and more. Learn at your own pace and at times that work with your schedule.

PROGRAM DETAILS
- Instructor-facilitated options
- Video lesson presentations
- Mobile-ready
- National certification opportunity
- All textbooks and materials
- Laptops available
- 24/7 learner support
- Certificate of completion
- Clinical externship opportunity

OTHER IT CERTIFICATES:
- Agile Development Specialist
- AWS Certified Cloud Administrator
- Certified Information Systems Security Professional (CISSP)
- CISCO Certified Entry Level Network Technician
- CompTIA A+, Network+ and Security+ Certifications, page 54
- Data Science Fundamentals
- Linux Systems Administrator
- MEAN Stack Developer
- Ruby on Rails Developer

From 2018 to 2028, employment of software developers is projected to grow 21 percent (284,100 positions) and employment of web developers is projected to grow 13 percent (20,900 positions), both much faster than the average for all occupations.

FRONT-END WEB DEVELOPER
The front-end web developer content introduces you to front-end, or client-side, web development technologies, including HTML, CSS and JavaScript. You learn how to make interactive applications that run inside a web browser and can communicate with a web server running remotely. You also learn how to use the version control program Git and collaboration website GitHub.

The front-end web developer program is designed to prepare you with the basic skills necessary to function as a front-end web developer in multiple technical, business and healthcare settings. Web developers serve in roles such as web site developer, web designer or webmaster. This course is designed to fully prepare you to sit for and pass the Microsoft MTA 98-375 exam. You are eligible for an optional externship with a local employer after successful course completion.

FULL-STACK WEB DEVELOPER WITH RUBY ON RAILS
The full-stack web developer content introduces you to front-end, or client-side, web development technologies, including HTML, CSS and JavaScript. In addition to attaining the necessary skills to work as a front-end web developer, you will learn Ruby on Rails so you can build dynamic, database-backed web applications with the Rails web framework. You receive hands-on experience planning, designing, coding, securing, testing and deploying dynamic web applications. You also learn how to use Rails-flavored Ruby language features, Git, Heroku and other valuable development tools.

This program prepares you to design and develop websites and web applications so users can perform specific tasks, and to maintain websites that continue to meet user needs. This course is designed to fully prepare you to sit for and pass the Microsoft MTA 98-375 exam. You are also eligible for an optional externship with a local employer after successful course completion.

ONLINE EDUCATION

CSUSM STAND-ALONE COURSES

The following CSUSM credit courses are offered online through Extended Learning for the Fall 2020 semester. These courses are open to students from other colleges and universities, qualified high school seniors and community members. Courses are fully transferable to other academic institutions, and up to 24 units taken as a nonmatriculated student can be counted toward a CSUSM degree.

For a full list of Fall 2020 credit courses offered through Extended Learning, visit csusm.edu/el/courses.

BIOL 104: PRINCIPLES OF BIOLOGY: HUMAN EMPHASIS
Principles of cellular, organismal and population biology with primary representation relating to the human organism. Includes study of cells, tissues and mammalian organ systems. Enrollment restricted to kinesiology majors. Three hours of lecture and three hours of laboratory.

DATE: Aug. 31 - Dec. 12, 2020
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

BIOL 160: MICROBIOLOGY FOR HEALTH SCIENCES
Basic concepts of microbiology, including classification, metabolic activity and the effect of physical and chemical agents on microbial populations. Host parasite interactions, infectious agents, methods of transmission and control are also discussed. Three hours of lecture and three hours of laboratory. This is a pre-nursing core course and enrollment is restricted to approved pre-health science students based on the nursing science impaction criteria.

DATE: Aug. 31 - Dec. 12, 2020
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

No Time to Take a Class During Fall?
Try Winter Intersession 2021!

CSUSM offers a full range of courses in key academic areas during Winter Intersession 2021: Dec. 21, 2020 – Jan. 16, 2021. Earn as many as four units in just four weeks. Classes are open to college students, qualified high school seniors and community members without requiring admission to the university. Credits are fully transferable to other institutions. Visit csusm.edu/winter for more information.

BIOL 175: INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY I
The first in a two-course series designed to introduce the principles of human anatomy and physiology for students in health and human services, including nursing. Taught from a systems perspective where students will learn basic physiological principles and mechanisms along with their associated anatomical basis. Material includes anatomical terminology, cell and tissue structure and function, basic biochemical and metabolic pathways and the integumentary, skeletal, muscular, digestive and excretory systems. Three hours of lecture and three hours of laboratory. This is a pre-nursing core course and enrollment is restricted to approved pre-health science students based on the nursing science impaction criteria.

DATE: Aug. 31 - Dec. 12, 2020
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

BIOL 176: INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY II
The second in a two-course series designed to introduce the principles of human anatomy and physiology for students in health and human services, including nursing. Taught from a systems perspective where students will learn basic physiological principles and mechanisms along with their associated anatomical basis. Material includes nervous system and the senses, and the endocrine, reproductive, cardiovascular and respiratory systems. Three hours of lecture and three hours of laboratory. This is a pre-nursing core course and enrollment is restricted to approved pre-health science students based on the nursing science impaction criteria. Prerequisite: BIOL 175.

DATE: Aug. 31 - Dec. 12, 2020
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses
CHEM 101: PREPARATORY CHEMISTRY
Prepares students for CHEM 105 or CHEM 150. Introduces students to fundamental chemical concepts and quantitative problem-solving skills in chemistry. Topics include atomic theory, chemical nomenclature, the periodic table, stoichiometry, atomic structure and chemical bonding. Intended for students who have not successfully completed high school chemistry or other preparatory courses within the last five years, or those students who need additional preparation before taking CHEM 105 or CHEM 150. Enrollment restriction: Students must be a declared major in BIOL, BIOC, BIOT, CHEM, KINE, MATH, NURS, PHYS.

DATE: Aug. 31 - Dec. 12, 2020
UNITS: 3
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

ACCOUNTING FUNDAMENTALS SERIES
Demand for accounting professionals currently exceeds supply. If you're interested in increasing your financial awareness while also gaining a marketable skill, this series of courses is perfect for you.

DATE: Open enrollment
DURATION: Six to 12 weeks
FEE: $115 per class or $199 series
REGISTER: csusm.edu/el/courses

CERTIFICATE IN GERONTOLOGY
This certificate course provides you with the knowledge and skills to effectively meet the needs of the aging population in a wide range of careers. There are opportunities in nursing, teaching, service, administration and research that focus on the needs and interests of older adults. These opportunities also exist within government programs and agencies; public and private institutions that provide health, education and social services; research centers; special interest groups; colleges and universities; and corporate human resources divisions.

DATE: Open enrollment
DURATION: Six weeks
FEE: $150
REGISTER: csusm.edu/el/courses

CREATING WEB PAGES
Learn the basics of HTML so you can design, create, and post your very own website. This course will help you plan the content, structure, and layout of your website, create neatly formatted text, build links, and add color, graphics and tables, as well as understand no-cost web marketing strategies and SEO.

DATE: Open enrollment
DURATION: Six weeks
FEE: $115
REGISTER: csusm.edu/el/courses

FUNDAMENTALS OF SUPERVISION AND MANAGEMENT
You will learn how to make a successful transition from employee to manager and you'll learn how to manage your time so that you can deal with the constant demands of a managerial job. You will learn the skills required to delegate responsibility and motivate your employees. A large part of a manager's job involves getting things done through other people, and this course will help you understand how to influence and direct other people's performance.

DATE: Open enrollment
DURATION: Six to 12 weeks
FEE: $115 per class or $199 series
REGISTER: csusm.edu/el/courses

GRANT WRITING SUITE
A TO Z GRANT WRITING
This course speaks mainly to nonprofit organizations, schools, religious institutions and municipalities seeking grants from foundation, corporate, government and individual donors.

ADVANCED GRANT PROPOSAL WRITING
Gain a full understanding of the criteria funders use to determine whether your grant proposal gets funded or rejected.

BECOMING A GRANT WRITING CONSULTANT
Learn how you can use a basic knowledge of grant or proposal writing to become an expert in the red-hot grant consulting field.

DATE: Open enrollment
DURATION: Six to 18 weeks
FEE: $115 per class or $299 series (three classes)
REGISTER: csusm.edu/el/courses
HUMAN ANATOMY AND PHYSIOLOGY
Gain a greater appreciation and understanding of the complexity of the human body. This course provides in-depth knowledge of the principles of genetics, how the body’s systems work together and how the human body fights off diseases (noncredit/certificate program).
DATE: Open enrollment
DURATION: Six weeks
FEE: $115 per class or $199 series
REGISTER: csusm.edu/el/courses

JAVA PROGRAMMING SUITE

INTRO TO JAVA PROGRAMMING
Start with the basics of programming and go on to write your own programs and integrate input and output, calculations, decision-making and loops.

INTERMEDIATE JAVA PROGRAMMING
Deepen your understanding of Java programming and start writing programs that are more sophisticated and professional.

MICROSOFT EXCEL
These lessons will teach you dozens of shortcuts and tricks for setting up fully formatted worksheets quickly and efficiently. You’ll also learn the secrets behind writing powerful mathematical formulas and discover how to use the function wizard to quickly and automatically calculate statistics, loan payments, future value and more.
DATE: Open enrollment
DURATION: Six weeks
FEE: $129
REGISTER: csusm.edu/el/courses

MICROSOFT OFFICE VALUE SUITE
Each course within the value suite will introduce you to the features and functionality of Microsoft’s latest software. Includes Microsoft Word, Excel, and PowerPoint 2016. Now open for enrollment: Microsoft Office 2019/365!
DATE: Open enrollment
DURATION: Six to 18 weeks
FEE: $129 per course or $329 series
REGISTER: csusm.edu/el/courses

PHOTOSHOP
Photoshop is the world’s most popular photo editing program. Artists, photographers, designers and hobbyists all rely on Adobe Photoshop for image creation and editing. Discover the fastest and most effective ways to use Photoshop. Whether you want to use Photoshop to edit photos, design scrapbook pages or do original artwork, this class will give you the building blocks you need. You’ll take a giant leap forward in creativity and productivity, and you’ll also have a lot of fun!

ABOUT CALIFORNIA STATE UNIVERSITY SAN MARCAS AT TEMECULA

Known for its innovative and entrepreneurial approach to higher education, CSUSM Temecula Campus provides a premier education hub for Southwest Riverside County at its two locations in Temecula. The educational experience is tailored to the unique needs of its students and includes undergraduate degrees in business, nursing, kinesiology, and criminology and justice studies as well as certificate programs for working professionals and lifelong learning classes for adults age 50+.

ABOUT CALIFORNIA STATE UNIVERSITY SAN MARCAS

Building on an innovative 30-year history, California State University San Marcos is a forward-focused institution, dedicated to preparing future leaders, building great communities and solving critical issues. Located on a 306-acre hillside overlooking the city of San Marcos, CSUSM is the only public four-year comprehensive university serving North San Diego, Southwest Riverside and South Orange counties.
