### Winter Intersession 2022: Earn Four Units in Four Weeks

For students and individuals in the community who want to speed their progress toward a degree, Cal State San Marcos offers a wide range of courses in key academic areas during Winter Intersession 2022. Compressed timelines make it easy to earn up to four units in four weeks.

College students, qualified high school seniors and community members can register for these courses without being formally admitted to the university. Credits from CSUSM courses are fully transferable to other institutions. In addition, up to 24 undergraduate and nine graduate units taken as a nonmatriculated student may be counted toward a CSUSM degree.

Visit [csusm.edu/winter](http://csusm.edu/winter) for more information.

CREDIT COURSES

To register for credit courses, including Open University, academic credit, special session courses and degree programs, please follow the specific registration procedures outlined on our website: csusm.edu/el.

WHEN AND HOW CAN I PAY FOR A COURSE?

Fees for noncredit courses are due at the time of registration. We accept MasterCard, Visa, Discover, American Express, check, and company purchase orders.

- In person: You may also pay with check or money order at Extended Learning (Monday through Friday only).
- By mail: You can mail a check or money order made payable to Cal State San Marcos Extended Learning. No credit card payments can be accepted by mail.
- Online: Extended Learning accepts MasterCard, Visa, Discover, American Express and e-check payments securely online.

NOTE: Effective January 2021, all Extended Learning credit card transactions will be charged a convenience fee of 2.65%. The convenience fee is subject to change.

WHAT ARE THE CANCELLATION, DROP AND REFUND POLICIES?

Following is a summary. Please visit our website for complete details on these policies: csusm.edu/el/feesandrefunds.

NONCREDIT COURSES

For all noncredit courses, cancellation notifications must be made in writing by e-mail to el.inquiry@csusm.edu; faxed to 760-750-3138; or mailed with postmark date three days before the first day of class to receive a full refund (less a $20 administrative fee and the 2.65% convenience fee).

No refunds will be issued once a course has started. No refunds will be granted for online courses once the online material has been accessed by the student. No-shows are held responsible for payment in full. One transfer or substitution may be allowed in lieu of a refund. For the refund and transfer policy for online programs, please visit: csusm.edu/el/feesandrefunds.

CREDIT COURSES

The Extended Learning refund policy does not necessarily coincide with the university’s add/drop period.

You can drop your credit courses anytime via the MyCSUSM student portal at my.csusm.edu. If you do not know your student ID and password to access the portal, contact the Student Help Desk at 760-750-6505.

Raising the Profession

The field of interpreting has transformed from an ad hoc service into a profession. Maribeth Bandas is on a mission to provide bilingual individuals the professional training they need to succeed and the recognition they deserve.

Following more than a decade as a university-level Spanish instructor in Washington, D.C., Maribeth Bandas moved to Carlsbad, California, where she saw nothing but opportunity.

“We moved to California [in 2008] and I said, ‘I’ll translate. I’ll interpret. I’ll do other things, but I’m not going to teach,’” says Maribeth. “And then I saw a huge resource of bilingual—especially Spanish—speakers in North County San Diego. But there were also Tagalog, Chinese, Arabic—all kinds of bilingual speakers. Many were being used as interpreters in medical settings without being trained, which is so dangerous.”

Maribeth was convinced of the need to bring professional standards, ethics and support to individuals who were tasked—officially or unofficially—to serve as interpreters at work or for family members. She went back East to become licensed to teach The Community Interpreter® training program.

Maribeth trained directly with program founder Marjory Bancroft. After earning her license, she approached Cal State San Marcos and in 2016 found a home in Extended Learning to teach bilingual individuals how to become professional interpreters.

While the training course gave Maribeth the licensing she needed, she had been preparing for this role her entire life.

A LOVE FOR LANGUAGE

Both of Maribeth’s parents were professors who taught English as a foreign language. When she was 10, the family moved to Peru so her mom could gain experience abroad. In a bilingual school for five years, Maribeth was quickly at ease communicating in both English and Spanish. Later at university in the United States, she earned a BA in Liberal Studies, with independent study on the history of the Spanish language; an MA in Spanish and Latin American Studies; and an MPhil (Master of Philosophy) in the Human Sciences, with a focus on translation.

Over the course of her career, Maribeth has served as a bilingual translator and editor, a university Spanish instructor and a consultant in Spanish curriculum development. She
This course is a first step for interpreters in the workforce, and it’s a stepping stone to better work on every level.

Maribeth Bandas
Instructor, Professional Certificate in Interpreting

It takes much more than bilingual skills to become an interpreter, says Maribeth Bandas. Also worked as a translator in the Washington, D.C., Mayor’s Office on Latino Affairs and as director of translation services for the Hispanic Link News Service. Currently, she is the owner and vice president of BEAM Translations.

FROM BILINGUAL TO INTERPRETER

The biggest misunderstanding Maribeth sees is that employers often believe their staff need only be bilingual to interpret. Sometimes, even the staff members believe it. But in fact, they need much more than that.

“If you want to be an interpreter, you need to train to be an interpreter,” she says. “There are ethics you have to follow. It is taxing on the brain, and we talk about what happens when you get tired. There are so many skills that go into interpreting.”

Professional standards in interpreting were recognized in the Affordable Care Act (in Section 1557, effective July 18, 2016), which requires healthcare providers and health insurers to provide qualified translators (for written language) and interpreters (for spoken language) to individuals with limited English proficiency. They need to be professionally trained and they need to follow a strict code of ethics, principles and conduct.

The Professional Certificate in Interpreting at Cal State San Marcos prepares students to become qualified interpreters who can facilitate communication and access to services in schools, healthcare settings, nonprofit agencies, social service agencies, government settings and more. In addition, new technologies are accelerating the opportunities for remote interpreting, allowing interpreters to work from home. Students in the program quickly see its value.

As soon as they understand there’s a structure that supports them and that they are professionals, it changes their perspective,” Maribeth says. “There’s a huge population [of individuals] in the United States who are ad hoc interpreters for their parents, and that’s now illegal. The more people we get qualified as interpreters in the healthcare system, the less that will happen.”

A STEPPING STONE

The two 14-week certificate programs at CSUSM—Community Interpreting and Healthcare Interpreting—share the same core lessons on consecutive and simultaneous interpreting, sight translation, interpreting skills, ethical principles, protocols and more. Lessons in specialized subject-matter knowledge and vocabulary vary between the two programs. Students must have proficiency in English and at least one other language. In addition, students must achieve an advanced mid-level score on an online language proficiency exam.

“This course is a first step for interpreters in the workforce, and it’s a stepping stone to better work on every level,” Maribeth says, noting that students who meet language proficiency standards and complete the course can then go on to take national or industry certification exams.

For Maribeth, finding her way back to teaching through interpreting has been more valuable than she could have imagined.

“To me, teaching students to interpret is more important than interpreting myself,” she says. Through CSUSM, “I’ve put more than 100 students out there who can interpret professionally. My reach is much broader. I saw the resource of bilingual people here and thought, ‘This is great. Let’s get them trained.’”

For more information, visit csusm.edu/el/interpreting.
BACHELOR OF SCIENCE IN
BUSINESS ADMINISTRATION

THEMECULA

"(The cohort format) encouraged me to participate and become more involved in the program. You get a more personal connection with the people around you and we empower each other to move forward.”
– Geanine Lucero, Graduate; Production Operator, CeloNova BioSciences

PROGRAM OVERVIEW

The Bachelor of Science in Business Administration (BSBA) in Temecula provides the skills needed to be successful in the business world and prepares students for entrance into some of the finest companies in the region and abroad. Unique to the program is a high degree of flexibility, including rolling admissions, rolling entry and both full- and part-time options.

The College of Business Administration, in partnership with Extended Learning, offers this rigorous undergraduate program designed to balance theory and application. The curriculum encompasses significant professional training, writing skills, presentation skills and teamwork. In addition, students in this program complete their course of study with the Senior Experience Program, a culminating learning experience unique to CSUSM.

The outstanding faculty and staff for this program are committed to helping students achieve their goals. As part of this commitment, the innovative BSBA is a cohort degree program, providing immediate peer support, individualized attention, guaranteed placement in courses, guaranteed time to completion and small class sizes.

Students in cohorts tend to form a strong support system and professional network because they are accepted into the same program, take their classes together and graduate together.

PROGRAM BENEFITS

• Collaborative cohort-based model: Full-time students work through the curriculum as a cohort to achieve the same academic degree, resulting in consistent peer support throughout the program.
• Guaranteed time to completion: Full-time students can complete the program in five terms.
• Community collaboration: The program emphasizes active, immersive learning through partnerships with local community leaders, businesses and organizations.

ADMISSION REQUIREMENTS

• Completion of the pre-business core courses prior to admission
• Minimum 2.5 cumulative GPA in pre-business core
• Individual pre-business core courses completed with a C or better
• Completion of CSU general education transfer requirements

PROGRAM LOGISTICS

APPLICATION DEADLINE: Visit website for date
START DATE: Cohorts begin every fall and spring semester

PROGRAM OVERVIEW

The College of Business Administration and Extended Learning have partnered to develop a Specialized Master of Business Administration (SMBA) program for recent college graduates. This flexible, innovative program benefits business and non-business graduates and international students interested in pursuing advanced business education.

The unique stackable program consists of three phases: the foundation, the core and the specialization, which offer three entry and exit points into and out of the program. Upon satisfactory completion of each phase of the program, students will receive a certificate. Students have the potential to earn a Certificate of Advanced Study in Business Foundations, a Certificate of Advanced Study in Core Business Knowledge, a Certificate of Advanced Study in Business Intelligence/International Business, and upon completion of the final project/culminating experience, an MBA.

Students begin with a one-unit MBA bridge program focused on basic skills, including career planning, business communication and quantitative methods. All students are required to complete a one-unit career planning program, including career assessment, skills development, interviewing strategies, mentoring and networking.

The program ends in a capstone course and a culminating experience during the final semester. Business intelligence option students will participate in an international experience involving travel to a foreign country with a faculty member to participate in company visits and pursue a project.

5. All graduate applicants, regardless of citizenship, whose preparatory education was principally in a language other than English must demonstrate competence in English. All graduate applicants must have a TOEFL score of 80 iBT or above (213 on computer-based examination; 550 paper-based), or an IELTS score of 6.0, unless they possess a bachelor’s degree from a post-secondary institution where English was the principal language of instruction.

ADMISSION REQUIREMENTS

1. A four-year college course of study or an appropriate baccalaureate degree (or equivalent preparation) from a regionally accredited institution or from an international institution that meets CSUSM accreditation standards.
2. Be in good academic standing at the last college or university attended.
3. A GPA of B (3.0) or better in the last 60 graded semester units from a WASC-equivalent university.
4. A GMAT score of 500 or above, with a minimum 30th percentile score in the verbal section, a minimum 30th percentile score in the quantitative section, a minimum score of 4.0 in the analytical writing section and a minimum score of 4.0 in the integrated reasoning section. The faculty admissions committee will use the best GMAT score taken within the past five years. May submit GRE score report for the GMAT requirement.

PROGRAM LOGISTICS

APPLICATION DEADLINE: Rolling admissions
START DATE: Cohorts begin every fall and summer semester
TIME: Weekday mornings
DURATION: 15 months with foundation (48 units); 12 months if the foundation is waived (36 units). A part-time option is available.
LOCATION: CSUSM
UNITS: 48 with the foundation courses; 36 if the foundation is waived
APPLICATION FEE: $70
TUITION: $825 per unit; $39,600 total for the 15-month program (plus university fees); $29,700 total for the 12-month program (plus university fees)
FUNDING: Eligible for financial aid, VA

CAPM (CERTIFIED ASSOCIATE IN PROJECT MANAGEMENT)
CERTIFICATION EXAM PREPARATION

SAN MARCOS  FALL 2021: ONLINE

PROGRAM OVERVIEW
If you are new to project management or have been working as a team member and are seeking additional knowledge to advance your career, then this new project management certification exam preparation program is for you!

The Certified Associate in Project Management (CAPM) certification is designed for project team members and those who want to enhance their project management skills to increase their career and advancement opportunities. You will acquire skills that will enable you to align your work with other project managers and take on increased responsibilities within project teams.

This 15-week program will provide you with foundational knowledge in the key areas of project management, including:

• Project integration and scope
• Managing schedules and budgets
• Project quality
• Human resources
• Communication
• Procurement
• Risk and stakeholder management

Course sessions will include a combination of lecture, discussion and quizzes.

According to Payscale.com, the median salary for a general project manager is $73,349, with pay increasing by experience and location. Project managers earn higher than the national average in Washington D.C. (14.8% more), Houston (10.9%) and Los Angeles (8.5%).

– Payscale.com

PROGRAM BENEFITS
• Materials that are relevant for the novice to the experienced project manager
• Comprehensive learning system with online resources, including quizzes, flashcards and practice exams
• Course content will have immediate applicability to current work projects
• Course format will prepare you to pass the Project Management Institute (PMI) CAPM and PMP exams

CAPM EXAM REQUIREMENTS
(if pursuing certification)
• High school diploma and at least 1,500 hours of project management experience
• High school diploma and at least 23 hours of project management education

PROGRAM OVERVIEW

CSUSM is proud to partner with the ASCM San Diego Chapter to offer the Certified in Production and Inventory Management (CPIM) exam preparation program. CPIM is recognized worldwide as the standard in production and inventory control, one of the most critical functions within an organization for reducing costs and achieving a competitive edge.

Earning the CPIM credential makes you a recognized expert in internal operations for your organization. Your commitment and effort demonstrate your high level of knowledge and skills to your employer and colleagues. Certification makes you a more valuable asset to your organization, boosting your career and keeping your organization more competitive in today’s economy. Wherever your career takes you, your CPIM certification defines you as an expert and leader in internal operations.

To successfully earn the APICS CPIM designation, you must successfully pass two exams:

• CPIM 1 exam covers the basics of supply chain management
• CPIM 2 exam covers internal operations such as strategic management, master planning of resources, detailed scheduling and planning, and execution and control of operations

AUDIENCE

This program serves supply chain professionals with at least two years of experience who are seeking in-depth knowledge of their company’s internal operations, production and inventory management. It is also beneficial for employees looking to secure their career options and for managers who are working to improve operations, customer satisfaction and company profits. This is the next educational opportunity for professionals who have successfully completed the CSUSM/APICS Operations Resource Management Certificate program.

NOTE: These programs are designed to prepare individuals to successfully pass the rigorous CPIM exams and are not intended for new and/or entry level supply chain professionals. (See ORM Certificate on page 16.)

PROGRAM BENEFITS

This program utilizes the APICS CPIM Learning System, providing you with access to the most comprehensive, effective and up-to-date exam preparation tools available.

• Learn from experienced instructors
• Network and learn from a diverse group operations professionals
• Assess your current knowledge with post and practice exams
• Utilize a variety of interactive online study tools to create your own SmartStudy plan
• Stay focused and on track with a structured learning experience

Employment of supply chain professionals—logisticians who analyze and manage the life cycle of a product from supplier to consumer—is expected to grow 5 percent through 2028. The median annual wage for logisticians is $74,600, and the top industries served include the federal government, manufacturing and wholesale trade.

Primary topic areas include:

- **Fundamentals of Supply Chain Management**
  Topics include: broad concepts of supply chain management; key measures for planning and controlling inventories; demand forecasting and management techniques

- **Supply Chain Strategy, Design and Compliance**
  Topics include: globalization effects on inbound and outbound logistics; technologies for design, data, operations and communications in supply chain; and core concepts of CRM

- **Implementation and Operations**
  Topics include: managing supply from internal and external sources; implementation of demand plans; and capturing and communicating point-of-sale data

To successfully earn the APICS CSCP designation, you must pass one exam and also have three years of supply-chain-related work experience, a bachelor’s degree or international equivalent, or CPIM, CFPIM, CIRM, SCOR-P, CPM, CSM or CPSM designations.

**PROGRAM BENEFITS**

This program uses the APICS CSCP Learning System, providing you with access to the most comprehensive, effective and up-to-date exam preparation tools available.

- Learn from experienced instructors
- Network and learn from a diverse group of operations professionals
- Assess your current knowledge with post and practice exams
- Use a variety of interactive online study tools to create your own SmartStudy plan
- Stay focused and on track with a structured learning experience

This program is offered by CSUSM in partnership with the Alliance for Regional Solutions. This series of classes will help you gain an overall understanding of current trends, opportunities and challenges as well as key functional areas and responsibilities within nonprofit organizations.

SERIES OVERVIEW

Are you new to a management position or the nonprofit sector? Do you want to enhance your management skills and explore new techniques to effectively lead your organization or department? If so, then this new series is developed specifically for you!

With case study discussions related directly to current issues and weekly industry guest speakers, you will leave each class with the ability to apply your in-class lessons to your workplace. Class sizes are limited and enable you to establish a network of colleagues and mentors who can provide resources and referrals throughout your career. With the benefit of feedback and input from your peers and instructor, your capstone project enables you to identify and resolve or improve a current workplace issue that you may already be facing.

“North County Lifeline works hard to build on the talents of our long-term employees and give them opportunities for growth in leadership within the organization. The CSUSM Essential Management Skills for Nonprofits has been a successful learning opportunity for helping our emerging leaders to strengthen their understanding of the nonprofit sector and the unique leadership skills required within it!”

– Don Stump, Executive Director, North County Lifeline

SERIES TOPICS INCLUDE

• Overview of the nonprofit sector
• Nonprofit management fundamentals
• Strategic thinking
• Effective staff communication and supervision
• Financial management
• Program development and evaluation
• Building collaborations and partnerships
• Leadership and governance issues

PROGRAM LOGISTICS

OPERATIONS RESOURCE MANAGEMENT
SAN MARCOS

PROGRAM OVERVIEW
Effective operations resource management is key to an organization’s financial success by providing efficient and effective supply chain control to an organization’s products and services. Whether you are looking to update your knowledge of supply chain management and logistics, learn a specific skill or pursue CPIM certification, this program provides the knowledge and skills needed to become better informed and more effective in today’s globally competitive business environment.

AUDIENCE
Operations management professionals who are responsible for or support the effective planning, scheduling, use and control of a manufacturing or service organization.

PROGRAM BENEFITS
• APICS-developed course materials
• Certified industry instructors
• Peer-to-peer learning and networking
• Classroom learning immediately applicable to workplace projects

LEARNING OUTCOMES
• Apply inventory planning principles in strategic and tactical processes
• Prepare effective inventory processes and controls
• Effectively manage activities related to planning, scheduling and controlling the manufacturing process
• Identify and mitigate the challenges of global sourcing and procurement
• Understand the interdependency of all supply chain functions

“Having that certification gives you the knowledge you need to try new things or to put new procedures or programs in place in your position. Also, networking with people in other companies and other industries gives you a lot of different perspectives and experiences that you can use to help solve your problems or make improvements within your operation.”

– Earl Totty, Graduate; Plant Manager, Bostik; Former San Diego Chapter President, APICS

PROGRAM OVERVIEW

Position yourself for a big career move with PMP® certification. A career in project management offers a variety of jobs across industries, incredible growth potential and excellent compensation. Establish yourself as a globally recognized project manager by earning the most sought-after credential in the profession: Project Management Professional® (PMP). PMP certification is a proven way to enhance your résumé, elevate your career potential and boost your earnings.

Utilizing the CertWise® Learning System 15-week program expands and tests your knowledge in areas critical for project management career success. Participants will review the foundations of project management alongside a concentration of the exam structure, grading system and study strategies. Participants will explore the five knowledge domains and 10 knowledge areas addressed in the PMBOK® Guide. Online instruction along with access to a variety of online tools and resources creates a diverse and engaging classroom environment.

AUDIENCE

This program is designed specifically for experienced project managers who are looking to advance their skills and are preparing to take their PMP certification exam. Successful participants should have a minimum of three years of nonoverlapping project management experience and meet the general education requirements (associate degree or higher) to apply for the exam.

PROGRAM BENEFITS

• Comprehensive reading materials provide an in-depth exploration of the five knowledge domains tested on the PMP exam and include a glossary of key PMP terminology and progress-check questions
• Interactive online study tools include pre- and post-tests; SmartStudy tools; chapter quizzes; process group quizzes; flashcards; post–test PMP practice exam; progress report; and an online resource center
• Learn from PMP-certified instructors with a broad range of experience and knowledge
• Structured learning environment that accelerates learning and improves retention
• Meets education prerequisite for the PMP exam (35 contact hours of education). Learn more about PMP certification, prerequisites and exam at PMI.org
• Network with peers from a variety of industries and backgrounds.
• Take advantage of your employer’s tuition reimbursement program
• Earn 3.5 CEU

SHRM-CP/SHRM-SCP
(SOCIETY FOR HUMAN RESOURCE MANAGEMENT)
CERTIFICATION EXAM PREPARATION

PROGRAM OVERVIEW
Establish yourself as a globally recognized human resource expert by earning the standard in HR certification: SHRM Certified Professional (SHRM-CP®) and SHRM Senior Certified Professional (SHRM-SCP®). Ensure you’re prepared by attending this program specifically designed for SHRM credential candidates. Expand and test your knowledge and practical, real-life competencies in areas critical for HR career success. This intensive 12-week program combines expert instruction with the SHRM Learning System® for SHRM-CP/SHRM-SCP, so you will learn faster, retain more knowledge and stay on track for success on the exam.

AUDIENCE
This course is designed primarily for individuals seeking SHRM-CP or SHRM-SCP certification and is a great choice for HR practitioners, staff and professionals seeking advancement in employee relations, benefits, or compensation, training and development. This is an excellent capstone program for those who have completed HR management certificate programs at CSUSM or elsewhere.

PROGRAM BENEFITS
- Expert instruction is combined with the SHRM Learning System for more comprehensive learning and longer retention of information.
- Peer discussion and real-life experiences help reinforce learning materials.
- A structured learning experience keeps you on track and focused.

EXAM ELIGIBILITY REQUIREMENTS
- Applicants must show that they have worked in an HR role for more than 1,000 hours within a calendar year, which equates to one year of experience.
- HR experience may be in an HR-exempt or nonexempt capacity.
- Applicants with a graduate degree in HR (or global equivalency) must be currently employed in an HR role.
- HR experience may be classified directly, as working in an HR role, or indirectly, by consulting, educating or researching HR practices linked specifically to human resource management.
- SHRM membership is not required.

LEARNING OUTCOMES
- Be prepared to assume greater leadership roles that contribute to your organization’s strategic direction.
- Demonstrate that you have mastered the application of HR technical and behavioral competencies.
- Prove that your HR knowledge is current and relevant.
- Demonstrate your ability to put your knowledge into action on the job.
- Expand your scope within the HR field to bring new ideas to your organization.

SUPERVISING EMPLOYEES
SAN MARCOS | FALL 2021: ONLINE

PROGRAM OVERVIEW
You know the realities of today’s workplace—fewer staff are dealing with increasing workloads and more challenging people issues than ever before. As a manager in today’s workplace, you know that you must continue to sharpen your management skills to meet these demands, not only for your own effectiveness, but also for your team’s success and overall organizational performance.

LEARNING OUTCOMES
• Know the differences between a leader and manager
• Know the employment laws that impact you and your employees
• Assess and manage the performance management process
• Effectively communicate with new staff and peers
• Understand how personal cultural values impact perceptions of others
• Conduct positive results-oriented discussions
• Effectively set achievable goals for you and your team

With his CSUSM education in criminology, justice studies and social work, Jordyn Young is preparing to make an impact in child welfare.

As a student of criminology and justice studies, Jordyn Young would likely be interested in law enforcement or correctional work, right? That’s where he would quickly correct you because the program at Cal State San Marcos prepares students for a broad range of careers.

“I was drawn to sociology and to the curriculum,” he says. “I love studying about humanity. Learning about the potential of people and the power in people is fascinating. There is an endless wealth of knowledge, and you can never run out of things to learn about humans.”

The BA in Criminology and Justice Studies at CSUSM at Temecula draws on the study of sociology and criminology to build an understanding of the social processes surrounding both crime and social justice in order to pursue solutions for positive social change.

“The curriculum is so diverse,” Jordyn says. “The first semester, we had a theater class that tied a lot of things together for us. We also had a class about families dealing with economic issues or family violence and the root causes. Every semester, we had a class that focused on one ethnic population, something that was very important to me.”

After graduating in the fall of 2019, Jordyn was interested in graduate studies and he also wanted to stay at CSUSM. On the recommendation of a few professors, he looked into the university’s Master of Social Work (MSW) program and applied. In addition, he applied to the Title IV-E Child Welfare Stipend program at CSUSM, which provides an annual stipend for up to two years and specialized training for students committed to working in public child welfare.

Jordyn was admitted to both programs and started MSW studies in the fall of 2020. As part of the Title IV-E program, Jordyn is committed to working at a county child welfare agency for two years after graduation.

In addition, he is interning at a county child welfare agency for the MSW’s field instruction component each semester. The combination of studies and field internships has clear benefits, he says.

“It makes everything we are learning practical,” he explains. “When you study something, you can imagine how it would work. But if you go out there and you do it, everything clicks. I think that’s why they have such a high success rate in this program.”

During his first year in the MSW program, Jordyn interned in emergency response services with a child welfare agency in North County San Diego. This front-end work involves initial responses to and evaluation of cases of abuse or neglect. For his final two semesters, Jordyn will intern in back-end social work, or the continuing services after a child is placed in the care of the courts.

Along with learning the technical skills needed in social work—from interviewing children and families to working in the CWS/CMS (Child Welfare Services/Case Management System)—Jordyn is developing practical skills such as flexibility.

“In social work, you can have a thousand things planned out for the day, but those things might end up not happening,” he says.

For now, Jordyn is drawn to front-end emergency response work, but he still has another year to go and more to experience. Regardless, he is looking forward to the career he sees developing.

“These degrees give me an opportunity for a career that I can grow with and that I can use to make a difference in the community,” Jordyn says. “Eventually, I would like to be in a leadership position.”

For more information on the BA in Criminology and Justice Studies, visit csusm.edu/el/crim, and on the Master of Social Work, visit csusm.edu/socialwork.
MASTER OF ARTS IN EDUCATIONAL ADMINISTRATION

PROGRAM OVERVIEW
The Master of Arts in Educational Administration qualifies candidates for the Certificate of Eligibility for the Preliminary Administrative Services Credential. This program, offered in partnership between the College of Education, Health and Human Services and Extended Learning, focuses on K-12 education through a lens of cultural proficiency. Candidates also conduct meaningful field experience in school settings.

Candidates will develop skills and knowledge in areas of practice related to:
• Leading 21st century instruction
• Creating a responsive environment and community
• Managing budget, legal issues and personnel
• Understanding and responding to data
• Engaging in sound theoretical and practical leadership philosophies
• Developing a culture of continual school improvement

“I chose the program at CSUSM for its focus on social justice, cultural proficiency and being an equity-driven leader. I wanted to go through a program that would not only prepare me for educational leadership, but one that would prepare me to meet the needs of ALL of the diverse students that I would encounter throughout my career.”

– Jenn Carr, Student; Mathematics Instructional Coach, San Marcos Unified School District

MASTER OF ARTS IN READING, LANGUAGE AND LITERACY

PROGRAM OVERVIEW
The Master of Arts in Reading, Language and Literacy is a fully online degree program that prepares educators to teach literacy in the 21st century classroom and meet Common Core standards. This program is offered as a partnership between Extended Learning and the College of Education, Health and Human Services. Based on a set of 12 guiding principles, the program prepares highly effective teachers to meet the needs of monolingual and multilingual students. In addition to a master’s degree, graduates of the program holding a CTC-approved valid teaching credential (or equivalent) may be eligible for recommendation for the California Reading and Literacy Added Authorization and the California Reading and Literacy Leadership Specialist Credential.

APPLIED BEHAVIOR ANALYSIS
CERTIFICATE: BCBA AND BCABA TRACKS

ONLINE

PROGRAM OVERVIEW
Behavior analysts provide services to individuals, families, group homes, schools, mental health agencies, hospitals, industrial and business settings, and other agencies working with individuals who require intensive behavioral training and/or consultation. Special populations such as individuals with autism spectrum disorder and other developmental disabilities have been shown to benefit greatly from Applied Behavior Analysis (ABA) services. ABA is also frequently used in the field of education for both neurotypical students and students with disabilities. Behavior analyst professionals are strongly encouraged by the Behavior Analyst Certification Board (BACB) to pursue Board Certified Behavior Analyst (BCBA) or Board Certified Assistant Behavior Analyst (BCaBA) certification. BCBA and BCaBA certifications are considered the industry standard in this field and are nationally and internationally recognized. The Applied Behavior Analysis Certificate of Advanced Study program at CSUSM—offered by the College of Education, Health and Human Services in partnership with Extended Learning—provides coursework required by the BACB for those seeking either the BCBA or the BCaBA. All courses are approved by the ABAI as meeting coursework eligibility requirements for certification under the BACB’s Fifth Edition Task List core curriculum standards. Each online course is eight weeks long. Two courses are taken each semester and one course in the summer.

ADMISSION REQUIREMENTS
- BCBA: Possession of graduate degree (e.g., master’s or doctoral) from an accredited institution.
- BCaBA: Possession of a minimum of a bachelor’s degree from an accredited university.

FACTS ABOUT THE PROGRAM
- This is an approved program. Approval was granted by the Behavioral Analysis Certification Board in October 2013.
- CSUSM provides the approved coursework for the BCBA/BCaBA certification. Please go to the Behavior Analyst Certification Board website (bacb.com) for additional requirements for certification.
- All courses for this program must be taken and completed through CSUSM.

PROGRAM LOGISTICS
APPLICATION DEADLINE: Visit website for date
START DATE: Cohorts begin every fall and spring semester
DURATION: Each course is eight weeks. The BCaBA can be completed in 14 months and the BCBA in 16 months
LOCATION: Online

“This is very practical for the teaching I am doing. It gives me more knowledge about how to intervene with specific behaviors so my students can learn most effectively, and it helps me set up support for my students to be successful in any environment.”

– Michael Rael, Graduate; Special Education Teacher, Oceanside Unified School District
TEACHING ENGLISH AS A SECOND/FOREIGN LANGUAGE (TESL/TEFL) CERTIFICATE

SAN MARCOS

PROGRAM OVERVIEW
Travel and teach English abroad or in the United States! This 120-hour certificate program focuses on best practices in methods, materials and techniques used to teach English as a second/foreign language. During the program, participants develop essential skills for teaching English-language learners in a domestic or international context.

The curriculum, presented by a team of ALCI master instructors, includes a historical overview of the theories and methodologies that have most impacted modern language-acquisition pedagogy as well as courses focusing on instructional strategies for basic core skills. Participants receive ample opportunities to develop effective lesson plans and syllabi, and to practice classroom management strategies, peer-teaching and classroom facilitation. Participants must also demonstrate an understanding of the concepts covered in class through individual and group projects, as well as written reflections and quizzes.

The six-week summer course runs Monday through Friday for a total of 20 hours per week, and the 15-week spring course is offered Tuesday and Thursday evenings for eight hours per week. Both programs offer the option to participate face-to-face at our San Marcos campus or online.

PROGRAM BENEFITS
• Hands-on training and practice with English-language learners in university setting
• Professional development and guidance in finding employment in the field
• Sessions taught by master teachers with extensive experience in TESL/TEFL, teacher training and curriculum development
• Solid foundation in TESL/TEFL methodology

LEARNING OUTCOMES
By the end of the certificate program, participants will:
• Develop their skills for creating well-structured and effective lesson plans and syllabi
• Develop confidence when presenting instruction to a classroom audience
• Become familiar with cultural conventions and diversity that can impact international educators in their respective teaching environments
• Reflect on their own English-language skills (so as to provide an optimal model of oral and written English communication to future students)

PROGRAM LOGISTICS
APPLICATION DEADLINE:
Rolling admissions
DATE:
Spring 2022: Jan. 25 - May 12 (evening sessions)
Summer 2022: June 27 - Aug. 5 (daytime sessions)
DURATION: One session of 15 weeks (spring) or six weeks (summer)
LOCATION: Options to participate face-to-face at CSUSM or online
TO APPLY: Fill out the application form on the website below and submit the $50 application fee. Qualified applicants will be scheduled for an interview.
FEE: $2,400 entire certificate
FUNDING: WIOA, MyCAA, VA, GI Bill

Add-on Courses Available Year-Round
If you already have a TESL/TEFL certificate, our add-on courses will take you to the next level! Three options are available: Teaching English to Young Learners, Teaching English for Test Preparation, and Teaching Business English. The 12-hour courses are offered online. BACHELOR OF SCIENCE IN
WILDFIRE SCIENCE AND
THE URBAN INTERFACE

“"The fire service is getting to be more academic. I wanted to learn from the foremost experts in the field, academia and peer-reviewed journals so I can take that to my classroom."”
– Mo Khazaal, Graduate; Fire Captain, Camp Superintendent and Wildland Fire Instructor, Los Angeles County Fire Department

PROGRAM OVERVIEW

The growth of housing and other developments in environments at risk for wildfires has called for new methods of fire prevention and response, as well as public safety education, and created the need for a new generation of firefighters expertly skilled in the wildland-urban interface (WUI).

If you have your associate degree or have completed 60 units of relevant undergraduate coursework, you are eligible to earn your BS in Wildfire Science and the Urban Interface in CSUSM’s new, fully online degree completion program. After just two years (five semesters), become a part of this new generation of firefighters, technical experts, decision-makers and scientists ready to meet the evolving and increasing demands of the industry.

Topics include biostatistics for wildfire science, conservation biology, wildland-urban interface, fire science, emerging technologies and topics, ethics and the environment, firefighter health and safety, and more.

Developed in partnership with leading agencies such as Cal Fire, San Diego County Fire, Los Angeles County Fire and the U.S. Forest Service, you will not only earn your bachelor’s degree but stand out among your peers as you become a leader in today’s fire service industry.

PROGRAM BENEFITS

• Fully online program designed for working and aspiring professionals in the fire industry
• Only program of its kind in California

LEARNING OUTCOMES

Students who graduate with a BS in Wildfire Science and the Urban Interface will be able to:

• Provides a clear path to promotion (To advance beyond battalion chief, many fire departments now require applicants to have a bachelor’s degree, preferably in fire science, public administration or a related field.)
• Convenient, eight-week courses including lower-division coursework in mathematics and natural sciences.
• If you are transferring into the program, you need to have completed the requisite 60 CSU transferable units of your undergraduate degree.
• All courses counted toward the major must be completed with a grade of C (2.0) or better.

Finding Her Path

Roxanne Dominguez has discovered a way to blend teaching and speech-language pathology into a career that feeds her passion.

When Roxanne Dominguez set her sights on becoming a speech-language pathologist in a medical facility, she knew the setting would be competitive. Turns out, it was so competitive that she needed to move nine hours away from everyone and everything she knew to begin practicing at a rehabilitation facility in Show Low, Arizona, a small community in the White Mountains.

“I knew it would be a challenge,” says Roxanne, who moved from her hometown of Escondido, California. “After graduation, my mom and my boyfriend helped move me out. And then it was just me and my cat in rural Arizona. The town was very small, and I had elk and wild pigs in my backyard.”

Even so, the experience was invaluable. In less than a year, Roxanne was able to complete her clinical fellowship hours and then move to an SLP position in Escondido, followed by her current position at Temecula Valley Hospital.

Settled into her duties today as a full-time speech-language pathologist, Roxanne’s career path seems predestined. But if you had talked to undergrad Roxanne back in 2011, she was on a very different course.

As a liberal studies major and linguistics minor at CSUSM, Roxanne had planned to become a K-8 teacher, but she eventually realized she did not have the passion required for the field. As she considered new careers, a co-worker pointed her toward speech therapy, which immediately piqued her interest, especially with her undergraduate studies in linguistics.

A NEW COURSE

The Speech-Language Pathology Prep program at CSUSM prepared Roxanne with the prerequisites needed to apply to graduate SLP programs, and she ultimately was admitted to the Master of Science in Speech-Language Pathology at Cal State San Marcos. It was exactly what she had hoped for.

“I really valued that our professors were clinicians first, and it was a diverse group,” Roxanne says. “We had professors who worked with adults, with early intervention, with children with cleft lip and cleft palate, with voice disorders, and in schools. That made it a well-rounded program.”
Roxanne Dominguez moved nine hours from everything she knew to find her future.

“Also, we were put into a clinical setting on day two. The curriculum was set up so we could take what we learned and use it in our clinical setting the next day. That was important to immediately apply what we learned.”

The clinicals help students determine their SLP pathway. With her past interest in teaching, Roxanne was sure she would be on track to become an SLP in a school setting. But in practice, she found that was not a good fit for her. Fortunately, there was time for her to complete a clinical with adults in a medical setting, both inpatient and outpatient, and she loved it.

“That immediately solidified what I want to do,” she says. “That was huge.”

IN PRACTICE
The rigorous MS SLP curriculum at CSUSM prepared Roxanne for her responsibilities today as a speech-language pathologist, a critical function at Temecula Valley Hospital.

“We have to have a speech therapist at the hospital seven days a week; that’s part of what makes us a Comprehensive Stroke Center,” she explains. “Because of the importance of our swallow evaluations, we have to evaluate our acute stroke patients within 24 hours of the order being received.”

Arriving by 6:30 a.m. four days a week, Roxanne works 10-hour shifts. She starts each day prioritizing what needs to get done—from evaluations to treatments—and assigns patients to SLPs. The caseload determines how many SLPs are staffed for the day, and they review charts as well as triage any incoming patients to see who needs immediate attention. Communication with nurses, doctors, dieticians and family members is essential, as is charting notes for each patient before the end of each shift.

FROM PATHWAY TO PASSION
In the midst of patient care, Roxanne has also found a way to incorporate her longtime interest in teaching by accepting a graduate student as part of an externship, which has opened new possibilities for her.

“I’m realizing how much I really enjoy teaching something I’m passionate about,” she says.

In particular, Roxanne has a growing interest in dysphagia (swallowing difficulties), which she first started exploring during graduate studies. She continued building knowledge about dysphagia during her final clinical in grad school and her clinical fellowship in Arizona.

She is also researching becoming a board-certified specialist in swallowing and swallowing disorders, a designation that takes years to accomplish by demonstrating advanced competency through clinical hours, continuing education, leadership roles, scholarship activities and/or education outreach. But she says she is motivated to move forward.

“My passion has grown for dysphagia,” she says. “I realized that this is my calling. My ultimate goal is to teach dysphagia at the college level.”

ADVICE FOR ASPIRING PRACTITIONERS: IN ROXANNE’S WORDS
For anybody who is getting ready to graduate, understand that you’re going to get an excellent foundation and the support to be able to begin as a speech therapist, but that you have to continue learning in order to be successful and to benefit your patients and clients.

We’re in a field that is research-based, and it’s constantly evolving. It’s up to the individual to continue to expand on their knowledge. Our methods should be constantly evolving to meet best practices and to reflect what the evidence and research tells us is best for our patients.

For more information on the SLP Prep program, visit csusm.edu/el/slpprep, and on the MS SLP, visit csusm.edu/el/msslp.
PROGRAM OVERVIEW

The College of Education, Health and Human Services has partnered with Extended Learning to offer the Bachelor of Science in Kinesiology: Health Science Option. Kinesiology, the science of movement, integrates the biological, physical, behavioral and social sciences in the study of physical activity and sport, and their effect on the fitness and quality of life of people across the lifespan. As such, this degree prepares students for a wide variety of careers in the areas of public health, health/fitness education and promotion, wellness coaching, health research, and community health advocacy and programming.

The BS in Kinesiology is one of the fastest-growing degrees at CSUSM. Graduates with the health science option are skilled in promoting positive, personal behavior changes that have an impact on the health of individuals and their communities. In addition, they are well-prepared to pursue graduate programs and/or additional study in public health, nursing, kinesiology and health science.

PROGRAM BENEFITS

• The cohort-based program at the Temecula campus ensures time to graduation with smaller class sizes and guaranteed course placement in the two-year program cycle.

LEARNING OUTCOMES

Graduates with a Bachelor of Science in Kinesiology will be able to:

• Describe fundamental principles of: kinesiology, including anatomy and physiology; how to teach movement-related skills; health promotion; physiological response to exercise; the mechanics and control of movement
• Apply kinesiology-related skills to real-world problems through empirical research, internships, field experience and/or service learning

PREREQUISITES

• Completion of the equivalent of 60 semester units of study at a community college or university
• Minimum 2.5 cumulative GPA from all transfer coursework
• Completion of CSU general education transfer requirements
• Completion of BIOL 104 Principles of Biology: Human Emphasis or its equivalent

PROGRAM LOGISTICS

ACCELERATED BACHELOR OF SCIENCE IN KINESIOLOGY: MOVEMENT SCIENCE OPTION

PROGRAM OVERVIEW
The College of Education, Health and Human Services has partnered with Extended Learning to offer the Accelerated Bachelor of Science in Kinesiology: Movement Science Option. Kinesiology, the science of movement, integrates the biological, physical, behavioral and social sciences into the study of physical activity and sport, and their effect on the fitness and quality of life for people across the lifespan. As such, this degree prepares students for a wide variety of careers in the areas of public health, health/fitness education and promotion, wellness coaching, health research, and community health advocacy and programming.

The cohort-based program ensures time to graduation with smaller class sizes and guaranteed course placement in the 16-month program cycle.

PROGRAM BENEFITS
• This accelerated option allows for students to complete their Bachelor of Science in Kinesiology in as little as 16 months.
• Evidence-based research skills are gained through practical group projects and exercises.

PREREQUISITES
• Completed 60 or more transferable semester (90 transferable quarter) units by the end of spring
• Earned a cumulative transfer GPA of 2.0 or higher

• Oral Communication
• Written Communication
• Critical Thinking
• Mathematics or Quantitative Reasoning

Prerequisites included in the program*:
• BIOL 177: Introduction to Anatomy and Physiology for Kinesiology I
• BIOL 178: Introduction to Anatomy and Physiology for Kinesiology II
• CHEM 150 or 105: General, Organic and Biochemistry for Life
• MATH 125: Pre-Calculus
*You may apply without these or transfer them in if already completed.

Prerequisites not included in the program:
• BIOL 104: Principles of Biology: Human Emphasis
• PSYC 100: Introduction to Psychology
• KINE 200: First Aid and Safety
• KINE 201: CPR and AED
• KINE 202: Introduction to Kinesiology

LEARNING OUTCOMES
• Students completing this program will demonstrate knowledge of fundamental principles of kinesiology and apply kinesiology-related skills to empirical research, internships, field experience and/or service learning.
• Students will evaluate movement science questions through 1) the performance of health, fitness and movement assessment, 2) the acquisition, analysis and interpretation of original data, and 3) the procurement, appraisal and application of information from current research literature.
• Use of oral and written communication that meets appropriate professional and scientific standards in kinesiology.
• Model behavior consistent with that of a kinesiology professional, including advocacy for a healthy, active lifestyle, adherence to professional ethics, service to others, shared responsibility and successful collaboration with peers, and pursuit of learning beyond CSUSM.

PROGRAM LOGISTICS
START DATE: Cohorts begin every fall semester
DURATION: Two years (five semesters)
LOCATION: CSUSM

Bachelor of Science in Kinesiology: Health Science Option, page 28

“This is a great degree if you want to apply science by working with people. Movement science is understanding the human body across the lifespan and then applying basic biological principles, physics and physiology so that we can understand everything from quiet standing and walking through exercise and sports.”
– Deanna Asakawa, Assistant Professor, CSUSM Department of Kinesiology
ACCELERATED BACHELOR OF SCIENCE IN NURSING

SAN MARCOS  TEMECULA

PROGRAM OVERVIEW
The CSUSM School of Nursing and Extended Learning have partnered to offer an Accelerated Bachelor of Science in Nursing program to help fulfill the healthcare needs in our region. This fast-paced, 24-month additional bachelor’s degree program is designed for students who hold a degree in a discipline outside of nursing and who have not completed any LVN or RN coursework. Students will complete approximately 78 semester units of study in both didactic and clinical coursework.

The program starts three times a year: fall, spring and summer. The fall and spring programs each accept one cohort* in San Marcos and the summer program accepts one cohort in Temecula. Completion of the CSUSM Bachelor of Science in Nursing program enables individuals to sit for the NCLEX examination for RN licensure.

“In med-surg (Medical-Surgical Nursing), they put me on the medical-surgical floor of a hospital. It’s great reinforcement because you study it and then you go to the hospital and you are working with patients.”
— Joshua De Jesus, Graduate

PREREQUISITES

• Bachelor’s degree (from a regionally accredited institution, or U.S. equivalent for degree coursework completed outside of the U.S.)
• Minimum 2.5 GPA in the last 60 units completed
• Completion of the pre-nursing core
• Minimum of 2.75 GPA in pre-nursing core (C grades or higher; C-minus grades are not acceptable)
• Completion of additional CSUSM lower-division GE BRN-required courses, and other CSUSM graduation requirements
• Passage of the TEAS exam (version six) with a minimum 71.0 percent composite score

ADDITIONAL PROGRAM REQUIREMENTS
Each student in the ABSN program is required to complete approximately 78 semester units of study within the six academic terms. Approximately 27 units of the program consist of clinical study. Clinical rotations can vary by day and time each month. Please note: classes and clinicals may be scheduled on Saturdays and Sundays.

RN TO BACHELOR OF SCIENCE IN NURSING

PROGRAM OVERVIEW
Completing your Bachelor of Science in Nursing online at Cal State San Marcos will empower you with the practical experience and professional background to help your patients and your community achieve the goal of optimal health.

CSUSM’s online RN to BSN—offered in partnership by Extended Learning and the College of Education, Health and Human Services—also lets you earn your pre-nursing core credits concurrently with your nursing courses. The pre-nursing core courses must be satisfied and can be taken in any order alongside your lower-division nursing courses during your first year of the program. This not only gives you nursing skills and knowledge you can apply immediately to your current nursing practice, but also allows you to graduate sooner.

In order to ensure your transition back to school is successful, in-service RNs prepared at the master’s degree level or above will provide you with personal coaching and assistance throughout the program.

CSUSM’s RN to BSN program has been ranked
#1 online RN to BSN in California
#5 online program in the nation
– registerednursing.org

PROGRAM BENEFITS
• A well-developed professional portfolio of real-world clinical, leadership and case management experience
• Evidence-based research skills gained through practical group projects and exercises
• Ability to apply for California public health nurse certification

PREREQUISITES
• RN-BSN program application
• GPA 2.0
• Paid program application fee
• All official, hard-copy transcripts from all institutions attended
• Associate-level RN degree conferred

LEARNING OUTCOMES
Students who graduate with a Bachelor of Science in Nursing will be able to:
• Apply the nursing process through critical thinking and professional nursing judgment to provide and evaluate nursing care in acute and long-term care, and community settings.
• Utilize the research process, its application to the discipline of nursing and its essential relationship to evidence-based nursing practice.
• Function within the specific professional nursing roles to provide care, coordinate care, deliver health education, and advocate for individuals, families, groups and communities.

PROGRAM LOGISTICS
APPLICATION DEADLINE:
Rolling admissions
START DATE: Cohorts begin four times per year
DURATION: 14 months

BACHELOR OF SCIENCE IN SPEECH-LANGUAGE PATHOLOGY

PROGRAM OVERVIEW
CSUSM offers the Bachelor of Science in Speech-Language Pathology (SLP). This degree provides the foundational coursework necessary for application to graduate programs that lead to a career in speech-language pathology as well as a breadth of curriculum that introduces students to the fields of general and special education, social work and public health. Students who earn the BS in Speech-Language Pathology will be eligible to apply to a number of CSUSM graduate programs, including the Master of Science in Speech-Language Pathology.

The program provides students with a broad education covering content related to speech, language, communication, cognitive and swallowing disorders across the lifespan. It builds important foundational skills in public speaking, professional writing, evidence-based practice and cultural sensitivity. As the coursework has both breadth and depth in related fields, the bachelor’s degree provides preparation in related fields, including communication, counseling, general education, health, human development, rehabilitation, social service and special education.

“I love the cohort format of the BS SLP program at CSUSM. You go through the program with the same set of students and get a chance to build a great rapport with a group of people who are as excited about the subject as you are.”

– Amber Engen, Graduate, BS SLP

PROGRAM BENEFITS
• Prepares students for the MS SLP program
• Taught using the latest technology
• Courses taught by faculty with many years of experience working in their areas of expertise
• Cohort design guarantees a seat in all required courses
• Prepares students for a variety of career paths, including graduate work in speech-language pathology, audiology and related disciplines and careers

SYNTHESIZE KNOWLEDGE ACROSS DISCIPLINES TO DISCERN DIFFERENCES AND DISORDERS IN COMMUNICATION AND SWALLOWING PROCESSES

LEARNING OUTCOMES
• Explain development of communication functions and their breakdown across the lifespan
• Synthesize knowledge across disciplines, including basic science, behavioral science and humanities to apply to speech-language pathology
• Describe the most common speech, language, communication and swallowing disorders that are diagnosed and treated by speech-language pathologists
• Explain basic human communication and swallowing processes, including their biological, neurological, acoustic, psychological, developmental, linguistic and cultural bases

PROGRAM LOGISTICS
APPLICATION DEADLINE: Rolling admissions until full
START DATE: Cohorts begin every fall and spring semester
FALL START: Traditional face-to-face classes. On campus full time.
SPRING START: Online program with evening synchronous chats
DURATION: Five semesters
LOCATION: CSUSM
UNITS: 75, including 15 SLP prep units
APPLICATION FEE: $70
TUITION: $349 per unit; $26,175 entire degree, including 15 prep units (plus university fees)
FUNDING: Eligible for financial aid, VA, GI Bill

MASTER OF SCIENCE IN NURSING
SAN MARCOS

PROGRAM OVERVIEW
The mission of the graduate program in nursing at California State University San Marcos is to provide superior graduate education to qualified San Diego students, leading to the Master of Science in Nursing (MSN) degree. Our objective is to prepare San Diego-area nurses in generalist and advanced-practice roles for positions in the healthcare industry, community or public health agencies, and academia, and for continued study at the doctoral level. The MSN program includes a strong foundation in theory and research inquiry. The School of Nursing acknowledges the responsibility to address the nursing and healthcare needs in populations in San Diego and Riverside counties, as well as communities around the globe.

The MSN at CSUSM is a part-time program designed for the working registered nurse who holds a baccalaureate degree in nursing. The program—offered in partnership by the College of Education, Health and Human Services and Extended Learning—can be completed in eight semesters.

Students have the option to pursue one of three concentrations that contain several tracks and specialties: advanced practice nursing, nursing education and clinical nurse leader.

• The advanced practice nursing concentration offers two tracks: nurse practitioner, an advanced practice nurse working with populations across the lifespan (specializations in this track are family nurse practitioner and psychiatric mental health nurse practitioner); and clinical nurse specialist, which prepares students for advanced work in assessment, pathophysiology/pharmacology and management of the chronically ill.

• The nursing education concentration covers the theories of adult learning, curriculum design and development, and teaching strategies.

• The clinical nurse leader concentration prepares students to be leaders, managers and educators at the unit level.

PREREQUISITES
• BSN degree from a CCNE- or NLN-accredited program
• Minimum GPA of 3.0 in the last 60 units of undergraduate coursework
• Evidence of satisfactory completion of undergraduate- or graduate-level inferential statistics, health assessment with lab and nursing research with a grade of C or better

• Proof of licensure as a California registered nurse
• A current résumé with one year of recent nursing experience
• Two letters of reference from undergraduate nursing faculty and nursing supervisor
• One- to two-page essay outlining professional and educational goals

PROGRAM LOGISTICS
START DATE: Cohorts begin every fall semester
DURATION: Seven or eight semesters, depending on concentration
LOCATION: CSUSM
UNITS: 49-52 minimum, depending on concentration
APPLICATION FEE: $70
TUITION: $699 per unit; approximately $40,000 total degree
FUNDING: Eligible for financial aid, VA, GI Bill

“I appreciate the small class sizes and cohort format of the MSN program at CSUSM. It allows students the time and space to maximize their education and interact with their peers and instructors.”
– Jennifer Spahr, MSN, RN, CPN, NP-C, Graduate; Instructor, Bachelor of Science in Nursing

PROGRAM OVERVIEW
The 16-month accelerated Master of Public Health (MPH) educates students to recognize and respond to emerging threats to public health in a culturally sensitive manner. This program prepares students to use organized, interdisciplinary efforts to address pressing domestic and global health challenges as well as concerns of communities and populations at risk for disease and injury.

The program’s mission is to enhance wellness and reduce health disparities through community-based interventions and practice by preparing culturally responsive professionals who are engaged locally and abroad.

PROGRAM BENEFITS
The traditional mission of the field of public health is to foster conditions within which people can be healthy. Graduates are prepared to hold positions as public health professionals in local community organizations, hospitals, health management organizations, government agencies, academia, the private sector, and international or multinational organizations.

• Program admits two times per year—fall and spring—keeping class sizes small and promoting greater personal attention
• Hybrid format with courses that start every eight weeks and are conducted on two evenings a week
• Fully online format offered through the Moodle course management system
• Cohort design guarantees a seat in all required courses
• Students choose between two tracks
  » Health Promotion and Education
  » Global Health
• 16-month accelerated program (six units every eight weeks)
• Degree culminates with a field experience (internship) and a capstone project or thesis
• Program accredited by the Council on Education for Public Health (CEPH)
• Demand for professionals with master’s-level public health education grew significantly from 2010 to 2015*

*Relevant regional job postings increased 128 percent from 2010 to 2013 and 76 percent from 2014 to 2015.

PREREQUISITES
• Baccalaureate degree from an institution accredited by a regional accrediting association
• 2.5 GPA in last 60 units of undergraduate coursework or last degree completed
• Evidence of satisfactory completion of statistics or quantitative methods course with a grade of a C or better
• Current professional résumé showing education and work experience
• Two letters of recommendation from persons familiar with the student’s academic qualifications and/or professional experience relevant to the MPH degree. Each letter must be on official letterhead and include the name and title of the referer.
• A narrative statement describing how and why the MPH program relates to applicant’s professional goals (see the MPH website for details)

PROGRAM LOGISTICS
START DATE: Cohorts begin every fall and spring semester
DURATION: Four semesters (16 months)
LOCATION: CSUSM online and hybrid for fall admissions and online-only for spring admissions
UNITS: 42
APPLICATION FEE: $70
TUITION: $599 per unit; $25,158 entire degree (plus university fees)
FUNDING: Eligible for financial aid, VA, GI Bill

“The important thing about the MPH program is that the professors are truly invested in making students successful in real-world public health practice. The support system provided by the cohort also helps students achieve their goals. Members of the cohort not only provide help to one another, but they build real and lasting relationships. I feel blessed to have been a part of this program.”
– Penny Peyton, Graduate; National Diabetes Prevention Program Lifestyle Coach, San Diego Health and Human Services Agency, Aging and Independence Services
PROGRAM OVERVIEW

There is a national demand for highly trained and educated speech-language pathology professionals in many different service settings: schools, hospitals, skilled nursing facilities and private practices. CSUSM offers a Master of Science in Speech-Language Pathology to meet this workforce need.

The Master of Science in Speech-Language Pathology at CSUSM trains students to assess and treat individuals with a broad array of communicative and swallowing disorders, including language, articulation, phonology, fluency, voice, motor speech, dysphagia and cognitive-linguistic.

After successfully completing our program, candidates will be eligible for a temporary state licensure, preliminary CTC credentialing and initiation of their clinical fellowship year toward applying for the ASHA CCC.

PROGRAM BENEFITS

• Focus on skill development in each content area
• Community-based clinics used for four clinical rotations across the program
• Prepares graduates to be critical thinkers

“My first (clinical) placement was at a high school. It was really special to me because it’s what fostered my confidence as a clinician and as a future speech therapist. In our field, everything is application at the end of the day and I was happy to get all of that experience so soon.”

– Nianna Ocampo, Graduate

LEARNING OUTCOMES

• Use of simulation and standardized patients across the curriculum
• Cohort design, which guarantees classes and promotes building collaborative student-faculty relationships
• Training to work as an SLP across the lifespan in a variety of employment settings

PROGRAM LOGISTICS

START DATE: Cohorts begin every fall semester
TIME: Monday – Friday, 8 a.m. – 5 p.m., typically. Occasional weekends and evenings required for special program events and training.

CERTIFIED MEDICAL ADMINISTRATIVE ASSISTANT (CMAA) WITH MEDICAL BILLING AND CODING
CERTIFICATE

ONLINE

PROGRAM OVERVIEW
Earn two distinct skill sets—medical assistant and medical billing and coding—to set yourself apart from your peers.

This course will teach you how administrative medical assistants are versatile and valuable healthcare team members who handle a broad range of duties. You will also be prepared for the Certified Medical Administrative Assistant (CMAA) national certification exam offered by the National Healthcareer Association (NHA).

Administrative medical assistants are skilled multitaskers who direct the flow of patients through an office. Effective patient flow allows the practice to operate efficiently, increase revenue and provide a positive patient experience.

Medical billers and coders are also in high demand. In addition to providing the knowledge and skills you will need to become a certified medical administrative assistant, this course also offers valuable training in legal, ethical and regulatory concepts central to this field, including HIPAA compliance, official coding guidelines, and third-party payer requirements. You will understand all phases of the revenue cycle—from patient registration through medical coding, claims submission, reimbursement and collections. You will also learn medical terminology as you study word parts and the structures and functions of the human body. Also presented are the disorders and medical procedures common to each body system, including musculoskeletal, cardiovascular, respiratory, digestive, nervous, endocrine, integumentary, genitourinary, lymphatic and immune.

Employment of medical assistants is projected to grow 23 percent from 2018 to 2028, much faster than the average for all occupations. As an aging baby-boom population seeks more preventive medical services, often provided by physicians, more assistants will be needed to handle administrative and clinical duties in medical offices.

PROGRAM BENEFITS

• Upon completion of this program, you’ll be well prepared to find your place in this rewarding healthcare career
• You will be prepared for the Certified Medical Administrative Assistant (CMAA) national certification exam offered by the National Healthcareer Association (NHA)

You will also be able to choose a voucher for the professional certification that best aligns with your interests and career goals related to medical billing and coding:

» Certified Professional Coder (CPC) exam offered by the American Academy of Professional Coders (AAPC) or

» Certified Coding Associate (CCA) exam offered by the American Health Information Management Association (AHIMA) or

PROGRAM OVERVIEW
Vista Community Clinic (VCC) and CSUSM have developed a new certificate program to train medical assistants. This low-cost program will enable you to learn the skills necessary to enter the healthcare field and excel as a medical assistant. Training is focused on specific job skills and is designed to accommodate working professionals.

PROGRAM BENEFITS
- Classes held on weeknight evenings and Saturdays to accommodate working professionals
- Classes taught by an experienced medical assistant educator
- Successful completion of this program enables you to sit for the California certified medical assistant exam
- Program combines classroom training and clinical experience to ensure you are equipped with the necessary skills to become a successful medical assistant
- Job placement assistance available for those who successfully complete the program

WHAT IS THE ROLE OF MEDICAL ASSISTANTS?
- Certified medical assistants most often work in a doctor’s office, a nursing care center or another medical facility such as a hospital, nursing home or pharmacy. Responsibilities include providing continuing patient care, working with doctors and nurses to meet the needs of patients, and performing administrative and clerical duties in an office environment.
- Working directly with patients, medical assistants help with everything from taking vital signs and explaining treatment protocols to administering injections and scheduling lab tests.
- Medical assistants communicate directly with physicians, stepping in to help with procedures, providing translation services for non-English-speaking patients and more.
- Medical assistants may also assist with administrative duties, including scheduling appointments, maintaining medical records, billing and coding for insurance purposes.

PROGRAM LOGISTICS
START DATE: Visit website for application deadlines
TIME: Classes meet three times per week: two weekday evenings and Saturdays
DURATION: Six months
LOCATION: Vista Community Clinic: 4700 N. River Road (second floor), Oceanside, California, and online
FEE: $3,000 entire certificate, including textbooks
FUNDING: WIOA; MyCAA; financial aid available as well as financial support for child care and transportation

Healthcare Interpreting, page 45
PROGRAM OVERVIEW
Pharmacy technicians have become indispensable to the healthcare industry, and it’s a great time to join this growing field. In this pharmacy technician program, you will get started on this fulfilling career path. You’ll gain the skills and knowledge to qualify for entry-level positions in pharmacies and be prepared for national certification. The program pairs you with an instructor for one-on-one assistance and you will also have the opportunity to apply for a 100-hour externship.

The pharmacy technician program will give you hands-on practice in retail pharmacy procedures through an online lab module. You’ll learn the information necessary to process prescriptions and physician orders and apply that knowledge to fill mock prescriptions. The curriculum also includes the ethics of pharmacy practice and education about prescription medications, patient care and interaction, and charges and reimbursement. All materials are included in the cost of the program. Upon completion of this program, you will be prepared to sit for the national certification exam, which is the Pharmacy Technician Certification Exam (PTCE) offered by Pharmacy Technician Certification Board (PTCB). The registration fee for this exam is included with the program.

PROGRAM BENEFITS
• You will learn to function as an important member of the pharmacy team by providing excellent customer service and distributing medical prescriptions.

By 2028, the number of jobs for pharmacy technicians is projected to have grown by 31,500 over 10 years.

• You’ll learn everything you need to know to pass the national certification exam offered by the Pharmacy Technician Certification Board.
• This program is entirely online and is completed at your own pace.
• Includes a hands-on 100-hour clinical externship.
• When you register, you have 12 months to complete this program.
• No prerequisites or application. Open to the community.
• Textbooks and exam voucher are included with this program.
• We’ll be there every step of the way with individualized career coaching and 24-hour access to all course materials.

• Discuss the HIPAA requirements and their application to the pharmacy
• Interpret physician orders and prescriptions, and prepare and distribute medications
• Define medical and pharmaceutical terms and common abbreviations
• Understand the pharmacology of medications in relation to the anatomy affected
• Perform pharmaceutical calculations
• Process insurance billing or collect payments
• Communicate successfully with patients and medical professionals

PROGRAM LOGISTICS
START DATE: Open enrollment
TIME: Self-paced
DURATION: 400 clock hours, plus 40- to 100-hour clinical externship; up to 12 months to complete the program
LOCATION: Online
CEU: 40
FEE: $2,595; study materials and exam voucher included

FUNDING: MyCAA, Employer Training Benefit, Workers’ Comp, TAA, EDD, Education Loan, Department of Rehabilitation, Military COOL, Military TA

Master’s-prepared registered nurses have salaries averaging 19 percent higher than registered nurses with bachelor’s degrees. In addition, employment for nurse practitioners is projected to grow by 53,300 jobs, or 28 percent, between 2018 and 2028.

PROGRAM OVERVIEW
The Post MSN certificates are part-time programs designed for the working registered nurse who holds a Master of Science in Nursing degree. The certificates consist of five semesters. Students can pursue one of five concentrations: clinical nurse leader, clinical nurse specialist, psychiatric mental health nurse practitioner, family nurse practitioner or transitions of care management.

• The clinical nurse leader concentration prepares students to be leaders, managers and educators at the unit level through courses in health systems leadership, quality improvement, evaluation and accreditation in nursing organizations, financial resource management and management of patients in the acute care setting.

• The clinical nurse specialist concentration prepares students for advanced practice nursing through courses in advanced assessment, advanced pathophysiology/pharmacology and advanced practice management of the chronically ill in the acute care and community settings.

• The psychiatric mental health nurse practitioner concentration prepares students for advanced practice nursing in clinical practice with individuals, families or populations across the lifespan at risk for developing and/or having a diagnosis of psychiatric disorders or mental health problems.

• The family nurse practitioner concentration develops advanced practice registered nurses who deliver healthcare to individuals of all ages and their families throughout the lifespan. Family nurse practitioners serve as primary healthcare providers in a variety of settings.

• The transitions of care management concentration prepares nurses to care for patients with multiple chronic conditions who are transitioning from one level of care to another, and provides training that reduces healthcare costs and improves quality and timeliness of care.

ADMISSION REQUIREMENTS
• MSN degree conferred
• Résumé
• Personal essay explaining your career goals and why you would like to obtain a Post MSN certificate
• Evidence of satisfactory completion (grade of C, 2.0 or better) of:
  » Advanced health assessment course
  » Advanced pathophysiology course
  » Advanced pharmacology course

UNITS: Up to 38; varies depending on concentration
APPLICATION FEE: $70
TUITION: Up to $26,562; varies depending on concentration
FUNDING: Eligible for financial aid, VA
PROGRAM OVERVIEW
CSUSM offers an intensive pre-health professions post-baccalaureate that provides students with the science and math courses they need to prepare for entrance into health professions programs. Many post-baccalaureate individuals decide to change their careers and enter the expanding health industry. This program prepares students who have completed a non-life-science degree in areas such as anthropology or English to gain the knowledge base required to become competitive applicants to health professional schools such as dental school, medical school or veterinary school. However, this goal is not easily realized because courses in mathematics, physics, chemistry and biology are heavily impacted at nearly every university. At CSUSM, the cohort design of the pre-health professions program helps alleviate this problem, and meets student needs for preparation to competitively qualify for admissions into health professions programs.

ADMISSION REQUIREMENTS
• You must have earned a non-science bachelor’s degree with a minimum overall GPA of 3.0 in the last 60 units completed
• CHEM 101 or CHEM 105 (or equivalent) completed with a C or better
• MATH 125 (or equivalent) completed with a C or better. Conditional admission may be granted for students who do not possess MATH 125 on the basis that they complete an equivalent course from a regionally accredited institution or complete a two-week precalculus readiness boot camp offered at CSUSM in August.

FACTS ABOUT THE PROGRAM
• Comprises 51 credit/units of biology, chemistry, math and physics
• 13 courses, including eight with labs, to be completed in two years
• Classes are held weekday evenings over five semesters, part time (fall, spring, summer, fall, spring)
• Cohort structure guarantees classes
• Up-to-date courses help prepare for MCAT, etc.
• Financial aid eligible for the first year only through unsubsidized federal loans and outside sources

NON-COHORT COURSES
Select pre-health courses are available to students who are not members of a pre-health professions cohort. Course offerings vary each semester and are subject to availability. Visit the website for more information.

PROGRAM OVERVIEW

This fully online SLP preparation program is a cohort program that prepares students for application to a Master of Science in Speech-Language Pathology. The courses are offered during the spring, summer and fall terms in order to prepare students for the January priority master’s application deadline. Each course is taught 100 percent online, including mandatory synchronous live chat sessions conveniently scheduled in the early evening (PST). Fall and spring classes are provided in eight-week sessions. Summer classes are in five- or 10-week sessions. This program is open to anyone interested in obtaining the prerequisite foundational knowledge required for most master’s programs in CSD/SLP.

PROGRAM BENEFITS

- Cohort design guarantees a seat in available classes
- Upon completion, student gains the prerequisites needed to apply for the Master of Science in Speech-Language Pathology program
- Courses are taught by faculty with many years of experience working in the field
- Non-cohort (open enrollment) option is available for individuals who only need some classes

LEARNING OUTCOMES

- Fully online program with synchronous virtual class meetings in the evenings
- Foundational knowledge in communication sciences that can be applied to a variety of fields and careers
- Convenitely scheduled live chats allow interaction with faculty
- Explain development of communication functions and their breakdown across the lifespan
- Synthesize knowledge across disciplines, including basic science, behavioral science and humanities to apply to speech-language pathology
- Describe the most common speech, language, communication and swallowing disorders that are diagnosed and treated by speech-language pathologists

PROGRAM LOGISTICS

APPLICATION DEADLINE:
Rolling admissions until full

START DATE: Cohorts begin every spring and summer semester

DURATION: 12 months

LOCATION: Online

UNITS: 33

TUITION: $349 per unit; $11,517 entire program

FUNDING: Cohort students eligible for financial aid. All students eligible for federal VA benefits.

“Throughout my experience in the SLP Prep program, I saw firsthand how the SLP lecturers were invested in their online students. They emphasized the importance of clarification and took time to re-explain theories and/or concepts. I was also fortunate to see their passion in the field of speech-language pathology. Their enthusiasm was contagious and helped to affirm my career goal of becoming an SLP.”

COMING IN 2022!

SPEECH-LANGUAGE PATHOLOGY ASSISTANT (SLPA)

In just one semester, you can be prepared to work in a clinical setting as a speech-language pathology assistant. Under the direction of a certified and licensed speech-language pathologist, SLP assistants implement treatment plans for communicative disorders, assist the SLP during assessments and provide support duties such as documenting patient progress, scheduling activities and preparing charts.

Launching in Spring 2022, the CSUSM SLPA program will equip you for this in-demand field with online instruction from outstanding faculty and a 120-hour practicum component. The curriculum qualifies you to apply for licensure with the state of California and prepares you to sit for the national ASHA SLPA certification exam.

PROGRAM HIGHLIGHTS

START DATE: Spring 2022
PREREQUISITE: SLP or CSD* bachelor’s degree
FORMAT: Online lectures and in-person practicum (120 hours)
ASHA SLPA EXAM: Exam prep built into the program
LICENSURE: Curriculum qualifies you to apply for California licensure
DURATION: One semester
UNITS: 16

*Speech-language pathology or communication sciences and disorders

To receive priority notifications for application deadlines and more, please email el.inquiry@csusm.edu.
AMERICAN LANGUAGE AND CULTURE INSTITUTE

PROGRAM OVERVIEW
The American Language and Culture Institute (ALCI) of California State University San Marcos has provided quality international education programs for more than 25 years and is globally recognized by language schools, universities, ministries of education, governmental bodies, sponsorship agencies and top educational organizations.

UNIVERSITY ENGLISH PATHWAY
The University English Pathway program is the premier intensive English program at CSU San Marcos that accepts students of varying levels of English ability and offers qualified students a pathway option to take English-language courses along with university courses.

Program features include:
- Fall 2021: Live and Online
- Opportunity to take university courses for credit toward a degree for qualified, advanced-level students
- Five proficiency levels
- 18-24 class hours per week
- Small classes
- Academic courses in reading, vocabulary, academic writing, grammar, public speaking, test preparation and note-taking
- Certificates of completion and certificate ceremony

“During my time at CSUSM, I was able to join clubs and other campus organizations that gave me wonderful experiences to meet new people, feel like part of the local community and experience the American culture.”
— Adrien Domoison, Student, Study@CSUSM

STUDY @ CSU SAN MARCOS
Study @ CSU San Marcos is a non-degree program for visiting/fee-paying international students who want to enroll in university classes for credit for one or two semesters at California State University San Marcos.
- Fall 2021: Hybrid
- Earn university course credits that transfer to your home university
- Study and experience campus life with American students
- Choose to join one of more than 100 recognized student organizations
- Participate in CSUSM recreation activities such as intramural sports and outdoor adventures

SHORT-TERM PROGRAMS
These are customized short-term programs designed to meet the needs of small groups who want to study English and enjoy a memorable Southern California cultural experience.

Past programs have included:
- Language travel
- Business English
- English for medical purposes
- High school/university preparation
- Leadership, service learning and community engagement

TEACHER TRAINING
These programs are for American and international students preparing to teach English abroad or in the U.S. The ALCI offers two teacher training programs for teachers of English. The Teaching English as a Second/Foreign Language (TESL/TEFL) Certificate is designed for those with minimal or no English language teaching experience who are interested in teaching English abroad (EFL) or in the United States (ESL). The TEFL Certificate for International Teachers of English is designed to meet the needs of groups of teachers with previous English-language teaching experience or students in English teacher programs in their home countries. Spring 2022: Live and Online

UNDERGRADUATE AND GRADUATE CONDITIONAL ADMISSION
This program grants undergraduate conditional admission for students wanting to study for a bachelor’s degree and graduate conditional admission for students wanting to study for a master’s degree. Students have the opportunity to be recommended for university admission without a TOEFL or IELTS score if they successfully complete this program.
CERTIFICATE IN COMMUNITY INTERPRETING

PROGRAM OVERVIEW
The Professional Certificate in Community Interpreting allows a dual-language participant with no prior interpreting skills to become a community interpreter in just 14 weeks. The skills developed are applicable to a variety of industry-based environments in the community, including business, education and human services settings. Participants will learn how to conduct the three major types of interpreting and will gain valuable skills that can help start or advance career pathways.

LEARNING OUTCOMES
• Consecutive interpreting, simultaneous interpreting and sight translation
• Interpreting protocols such as positioning, professional introductions in more than one language, direct speech and turn-taking management
• Demonstrate an understanding and application of ethical principles for community interpreters
• Strategies to acquire specialized subject-matter knowledge
• Enhanced short-term memory skills for faster translation
• Effective note-taking for interpreting
• Develop techniques to perform intervention and mediation in common community interpreting situations

CAREER OPPORTUNITIES
According to the Bureau of Labor Statistics, employment for interpreters and translators is projected to increase by 14,600 positions between 2018 and 2028, growth that is driven by globalization. Interpreters work in a variety of settings. The top industries for employment are professional, scientific and technical services; self-employed professionals; government; state, local and private hospitals; and state, local and private educational services.

Use your bilingual skills to advance your career in a broad range of community-based environments and position yourself for potential in-demand career changes or advances.
PROGRAM OVERVIEW
The Professional Certificate in Healthcare Interpreting allows a dual-language participant with no prior interpreting skills to become a qualified community interpreter in just 14 weeks. The program focuses on healthcare terminology and the skills developed can be transferred to a variety of healthcare industry settings. Participants will learn how to conduct the three major types of interpreting and will gain valuable skills that can help start or advance career pathways.

LEARNING OUTCOMES
• Consecutive interpreting, simultaneous interpreting and sight translation
• Interpreting protocols such as positioning, professional introductions in more than one language, direct speech and turn-taking management
• Strategies to acquire specialized subject-matter knowledge and terminology with a focus on healthcare
• Enhanced short-term memory skills for faster translation
• Effective note-taking for interpreting

CAREER OPPORTUNITIES
According to the Bureau of Labor Statistics, employment for interpreters and translators is projected to increase by 14,600 positions between 2018 and 2028, growth that is driven by globalization. Interpreters work in a variety of settings. The top industries for employment are professional, scientific and technical services; self-employed professionals; government; state, local and private hospitals; and state, local and private educational services.

“I train the (new interpreters), and I learned a lot about how to do it professionally by getting the certificate. This class improved my skills and gave me the tools and guidelines to follow.”
– May Zidan, Graduate

PROGRAM BENEFITS
• Interpreting skills learned through this program can be applied to a variety of industries, including healthcare
• Licensed industry professionals teach the program and facilitate interactive exercises as well as lectures
• Evening classes to accommodate working professionals’ busy schedules
• Comprehensive materials and class structure enable faster transfer of knowledge to the workplace

BACHELOR OF ARTS IN CRIMINOLOGY AND JUSTICE STUDIES

TEMECULA

PROGRAM OVERVIEW
The Criminology and Justice Studies program in Temecula draws on the intellectual traditions of sociology and critical criminology to understand the social correlates of crime and justice. The major provides students with a theoretical and practical foundation for building a lifelong understanding of crime and social justice and the myriad social processes surrounding both. Graduates of the criminology and justice studies program will be able to evaluate critical issues of crime and justice to pursue solutions for positive social change.

The degree—offered in partnership by Extended Learning and the College of Humanities, Arts, Behavioral and Social Sciences—prepares students in Southwest Riverside County to pursue careers in criminal justice and social service agencies, as well as graduate study in such fields as criminology, law, criminal justice and justice studies. The program culminates in a capstone seminar in community service, in which students are placed in organizations that provide service to the local community.

LEARNING OUTCOMES
Students with a bachelor’s degree in criminology and justice studies can pursue a wide variety of job opportunities, which include government as well as community service agencies geared toward youth and families, law enforcement and correctional agencies, and nonprofit organizations that examine social and legal justice practices both at home and abroad.

“It means a lot to me to give back to others and I believe this degree and this career will allow me to serve the community.”
– Tatiana Peña, Student

STUDENTS IN THIS PROGRAM WILL BE ABLE TO:
• Analyze and interpret the diversity of social experience associated with criminology and social justice issues, especially as they relate to race, class, gender, age, sexual preference, religion and nationality.
• Assess competing theoretical approaches to criminology and social justice issues of publics with differing and multiple interests; specify structural or institutional sources of these criminology and social justice issues; and propose and assess policies, interventions and/or modes of advocacy that will enact positive change.
• Locate, analyze, assess and communicate criminology and social justice scholarship.
• Articulate the applicability of and demonstrate ability to employ a range of research strategies.
• Articulate the ethical and social justice implications of criminology and justice studies.

ADMISSION REQUIREMENTS
• Completion of the equivalent of 60 semester units of study at a community college or university
• Minimum 2.0 cumulative GPA from all transfer coursework
• Completion of CSU general education transfer requirements (for articulated classes, visit the Assist.org website)
• Official, hard-copy transcripts from all institutions attended

ACCELERATED BACHELOR OF ARTS IN
SOCIOLOGY

ONLINE

PROGRAM OVERVIEW

Through our fully online Accelerated Bachelor of Arts in Sociology, students develop the knowledge and analytical skills necessary to understand social life in an increasingly complex world. The program is designed to produce practitioners who can examine and address large- and small-scale social problems through constructive empirical inquiry, critical analysis and strategic action; and who can implement the key insights and analytical methods of sociology to improve the social conditions in our communities.

The accelerated format of this program enables students to complete their degree in 16 months, with eight-week semesters in the summer and fall, and a five-week session during the summer.

Individuals with sociology degrees have the ability to apply sociological knowledge to careers in market research, public-opinion polling, law enforcement and criminal justice, city planning, social work, community relations and a range of other occupations in the public and private sectors.

PROGRAM BENEFITS

• Collaborative cohort-based model: students work through the curriculum as a group to achieve the same academic degree
• Guaranteed time to completion: full-time students can complete the program in 16 months

California leads the nation in employment of sociologists, with 1,070 practitioners, more than triple the number found in the next-highest state. Sociologists in California earn an annual mean wage of $98,560, the fourth-highest in the nation.

• The program’s internship and service-learning components provide the opportunity to gain practical experience in the field
• Courses are led by faculty within the College of Humanities, Arts, Behavioral and Social Sciences
• How to articulate the ethical and social justice implications of sociological inquiry
• How to demonstrate the ability to employ a range of research strategies—quantitative and qualitative—to particular research questions, theoretical orientations and social contexts
• How to assess competing theoretical approaches to societal problems of publics with differing and multiple interests; specify structural or institutional sources of these social problems; and propose and assess policies, interventions and/or modes of advocacy that will enact positive change

ADMISSION REQUIREMENTS

• Completed at least 60 lower-division transferable units
• Minimum 2.0 cumulative GPA in all transferable units attempted
• Successful completion of SOC 101 and SOC 201
• Successful completion of the following courses with a C-minus or better (12 units)
  » Oral Communication (A1)
  » Written Communication (A2)
  » Critical Thinking (A3)
  » Mathematics/Quantitative Reasoning (B4)

LEARNING OUTCOMES

• How to analyze and interpret the diversity of social experience using a sociological perspective
• How to demonstrate the ability to employ a range of research strategies—quantitative and qualitative—to particular research questions, theoretical orientations and social contexts
• How to assess competing theoretical approaches to societal problems of publics with differing and multiple interests; specify structural or institutional sources of these social problems; and propose and assess policies, interventions and/or modes of advocacy that will enact positive change

MASTER OF
SOCIAL WORK
SAN MARCOS

PROGRAM OVERVIEW
The Master of Social Work (MSW) program at CSUSM is designed to develop culturally competent, ethical and effective professionals for direct social work practice with diverse populations. The MSW program will prepare students for direct practice in a variety of settings, including public, private and nonprofit agencies and organizations, in social services, child welfare services, human services, healthcare and mental/behavioral health.

The MSW degree requires the completion of 60 graduate units and may be completed in two or three years. Students will complete a field practicum in a regional agency or organization.

PROGRAM BENEFITS

• The MSW is the most desired degree in the social service field
• The program is accredited by the Council on Social Work Education (CSWE)
• In-person classroom instruction by MSW faculty members
• Focus on applied learning in the classroom
• Intensive field practicum internships in local agencies
• Cohort design guarantees classes are available as needed

“The internship that is part of the program was such a great experience that it turned into my job!”
– Nancy Nguyen, MSW, Graduate

LEARNING OUTCOMES
Student learning outcomes are defined by the accrediting body, the Council on Social Work Education and encompass the following nine competencies:

• Demonstrate ethical and professional behavior
• Engage diversity and difference in practice
• Advance human rights and social, economic and environmental justice
• Engage in practice-informed research and research-informed practice
• Engage in policy practice
• Engage with individuals, families, groups, organizations and communities
• Assess individuals, families, groups, organizations and communities
• Intervene with individuals, families, groups, organizations and communities
• Evaluate practice with individuals, families, groups, organizations and communities

PARALEGAL AND ADVANCED PARALEGAL CERTIFICATES

PROGRAM OVERVIEW
This fully online, nationally acclaimed program is designed to educate those who seek to assist trial attorneys, interview witnesses, investigate complex fact patterns, research the law and assist in preparing cases for courtroom litigation. The instruction is practice-oriented and related to those areas of the law in which paralegals are most in demand. The paralegal certificate program will teach you how to work as a full-time or part-time paralegal, or how to open your own freelance business. This program is open to the community, has no prerequisites and requires no application.

AUDIENCE
This program is designed for beginning as well as advanced legal workers or those interested in pursuing career options in this field.

REQUIRED COURSES
Paralegal Certificate Course
Advanced Paralegal Certificate Course
Both the introductory and advanced paralegal certificate must be completed to be recognized as a paralegal by the state of California.

PARALEGAL CERTIFICATE COURSE (90 HOURS/9 CEU)
An introduction to paralegal studies, providing the foundation for the study of becoming a paralegal. During the seven-week course, you will gain an understanding of the American legal system and learn how you can be of assistance in the field of law.

ADVANCED PARALEGAL CERTIFICATE COURSE (270 HOURS/27 CEU)
This course will provide you with a working knowledge of legal authority: how it is used in the litigation process and how to locate it through legal research. You will also learn the basics of law office management, substantive law (such as criminal law, domestic relations, real property law and bankruptcy), and informal and formal advocacy.

OTHER LEGAL CERTIFICATES
Employment Law
Medical Professional Legal Consultant
Legal Investigation
Legal Nurse Consultant Training
Legal Secretary
Software Essentials for the Law Office
Victim Advocacy
To view all legal studies certificates, please visit: https://www.legalstudies.com/vendor/csu-san-marcos/

PROGRAM OVERVIEW
The Master of Biotechnology: A Professional Science Master’s degree is designed to meet the needs of the biotechnology industry and associated organizations. The program combines advanced study of related science, professional preparation, business and real-world experience for biotechnology-oriented students. The purpose of the degree is to prepare students for careers in technology-related organizations with a breadth of workplace knowledge.

Designed to accommodate the schedules of working professionals, the program may be completed part time in five semesters with evening classes. The program includes: 1) laboratory/technology-rich exposure in biotechnology, 2) MBA-level business core courses and 3) industry-related fundamentals. In addition to dedicated faculty, the program provides leading-edge and real-world exposure from guest lecturers and instructors who are industry/business leaders in the San Diego biotechnology community.

PREREQUISITES
Admission to the program requires an undergraduate degree with a major in a bioscience, chemistry or related area. Alternatively, applicants with BA/BS degree in a related field or equivalent work/certification experiences may be considered for conditional admission. While a minimum of a bachelor’s degree is required, admissions will consider pertinent background, prerequisite courses and opportunity for successful completion.

Generally, applicants should have courses or experience in:
- Molecular cell biology or molecular/cellular biotechnology
- Microbiology or biology of microorganisms
- Statistics
- Chemistry and biochemistry

Applicants who have not completed an upper-division biochemistry course may be required to take CHEM 341 or 351.

ADMISSION REQUIREMENTS
- Two letters of recommendation
- A one-page personal statement describing reasons for pursuing this program
- Résumé/curriculum vitae
- One official transcript from each academic institution attended
- An undergraduate grade point average in all completed science and math courses of at least 2.75 or a GPA of at least 3.0 in the last 35 semester units of science and math

PROGRAMLOGISTICS
APPLICATION DEADLINE:
Rolling admissions
START DATE: Cohorts begin every fall semester
TIME: Weekday evenings
DURATION: Five semesters; 21 months
LOCATION: CSUSM
UNITS: 39
APPLICATION FEE: $70
TUITION: $825 per unit; $32,175 entire degree (plus university fees)
FUNDING: Eligible for financial aid, VA

Note: Visit the website for the most current program information, as additions are being sought to better suit international and veteran students as well as those who need greater lab experience and/or preparation for the program, industry and employment readiness.

I NATIONAL PROFESS I ONAL SCIENCE MASTER’S ASSOCIATION
YOUR FUTURE IN CYBERSECURITY STARTS NOW

Cybersecurity is one of the fastest-growing fields in the global marketplace and demand for trained professionals far outpaces supply. A recent industry study estimates that 4 million cybersecurity professionals are needed globally—an increase of 145%—to close the current skills gap.

Interested in finding your role in this burgeoning field? No matter where you are in your career, we have the program to get you started.

NO DEGREE?
This path gives you the courses you need to get a foothold in this rapidly expanding field.

NO CYBER DEGREE?
From an introductory course to your choice of certificate programs, this plan will help you take your career to new heights.

CYBER PROFESSIONAL?
Establish yourself as a leader in the industry with our unique master’s degree that combines scientific and technical expertise with business acumen. This is the only program of its kind in California.

Why wait? Check out your options at csusm.edu/el/sciencetech

Now fully online!
MASTER OF SCIENCE IN CYBERSECURITY

PROGRAM OVERVIEW
Cybersecurity is one of the fastest-growing fields in the global marketplace and industry studies show that demand for trained professionals far outpaces supply.

CSUSM has launched the Master of Science in Cybersecurity to meet a documented need for management-trained professionals “for technology-based companies, governmental agencies and nonprofit organizations” (NPSMA.org).

As a Professional Science Master’s (PSM) degree, this program uniquely combines advanced study of technical science skills, MBA-level business courses and professional experience through 38 semester hours of coursework and a culminating project with an industry partner. The goal of the MS in Cybersecurity is to train an expertly skilled workforce to fulfill the imminent needs of the emerging and evolving cybersecurity industry.

PROGRAM BENEFITS
• No prior knowledge of cybersecurity required
• Prepares those with a strong background in computer science for management positions in cybersecurity
• Combination of technical science and business courses addresses the need for advanced technical and business acumen in the field of cybersecurity

“The nonscience courses prepared me well for my current role. We had classes where we learned about business continuity and disaster recovery, and classes where we learned how to create policies and how to present to upper management. I can use something from every course I took.” – Ryan Miller, Graduate; Cybersecurity Systems Engineer, General Atomics Aeronautical Systems

• Designed for working adults with classes in the evening
• Cohort design guarantees classes are available as needed
• A semester-long capstone project includes onsite experience within the cybersecurity industry

ADMISSION REQUIREMENTS
• Bachelor’s degree in computer science or equivalent education background
• Applicants with a baccalaureate degree in a related field may be able to meet prerequisites with equivalent work experience in computer science and will be considered for conditional admission
• Admission requires a minimum 3.0 grade point average in upper-division computer science courses and at least a 2.5 undergraduate GPA in the last 60 semester units (or last 90 quarter units) attempted
• One official transcript from each academic institution attended
• A personal statement describing reasons for pursuing this program
• Résumé/curriculum vitae
• Two letters of recommendation

PROGRAM LOGISTICS
APPLICATION DEADLINE: Rolling admissions
START DATE: Cohorts begin every fall semester
DURATION: Five semesters (21 months)
LOCATION: Online
UNITS: 38
APPLICATION FEE: $70
TUITION: $825 per unit; $31,350 entire degree (plus university fees)
FUNDING: Eligible for financial aid, VA

Note: Select cybersecurity courses are available to the public. Please visit our website for further information.

FEDERAL DESIGNATION
The National Security Agency (NSA) and the Department of Homeland Security (DHS) have designated CSUSM as a National Center of Academic Excellence in Cyber Defense Education for its MS in Cybersecurity. The agencies examined all facets of the program in a stringent review process that places CSUSM among an elite group of universities addressing a critical shortage of cybersecurity professionals.

PROGRAM OVERVIEW

Begin or advance your career in IT! These online instructor-led courses will prepare you to pass the CompTIA A+, Network+ and Security+ certification exams. In addition, these courses will provide you with hands-on experience in these subject areas using online simulation resources.

A+ CERTIFICATION PREP

A+ certifies skills in entry-level PC technology. It is a vendor-neutral certification with an emphasis on the expertise needed to work as a computer service technician troubleshooting and repairing PCs. This 16-week online instructor-led course will prepare you to pass the latest CompTIA A+ certification exams. Gain hands-on experience in these subject areas using online simulation resources.

NETWORK+ CERTIFICATION PREP

Learn about networking concepts; infrastructure; network operations; network security; and troubleshooting and tools. Prepare for careers such as network field technician, network administrator, network analyst and tech support.

SECURITY+ CERTIFICATION PREP

Topics include: threats, attacks and vulnerabilities; technologies and tools; architecture and design; identity and access management; risk management; and cryptography and PKI. This certification helps pave the way to careers such as security architect, security, consultant, security or systems analyst.

PROGRAM BENEFITS

• Fully online
• Earn certification that is recognized by leading technology companies
• Use coursework and learning support materials developed by industry experts
• Reinforce instructor-led lessons and prepare for the certification exams with CompTIA study guides
• Cumulative project reinforces the practical concepts the exam covers
• No prerequisites or application. Open to the community!
• Gain valuable experience in the fields of computer networking and information security through this business-focused coursework featuring real-world scenarios
• Exam vouchers and materials included

EQUIPMENT REQUIREMENTS

• Computer sufficient to run virtual machines
• Webcam for synchronous discussions
• Internet connection

PROGRAM LOGISTICS

START DATE: Visit website for current schedule
DURATION: A+, 16 weeks; Network+ and Security+, eight weeks each
LOCATION: Online, instructor-led
FEE: A+, $1,795; Network+ and Security+, $1,595 each. Bundle and save: Network+ and Security+, $2,995; all three courses, $4,690. Tuition includes textbooks and certification vouchers.
DISCOUNT: Military, CSU Students, Staff, Alumni, Group Discount
FUNDING: WIOA, MyCAA, Workers’ Comp, TAA, Employer Training Benefit, Department of Rehabilitation, Amazon Career Choice, Payment Plan. Contact bramos@csusm.edu for more information or to receive a CSU student, staff or group discount!

• csusm.edu/el/certit

FALL 2021 | CSUSM EXTENDED LEARNING | CSUSM.EDU/EL/CATALOG
The median annual wage for information security analysts is $98,350 and employment for this group is expected to grow 32 percent by 2028, much faster than the average for all occupations.

PROGRAM OVERVIEW
Cybersecurity is one of the fastest-growing technology sectors and demand for jobs is expected to grow 18 percent annually through 2024. With an increased need for cyber professionals having the necessary technical and business skills, this is the perfect time to start or grow your career in cybersecurity.

If you have an undergraduate degree, but it’s not in cybersecurity, we can get you on the fast track toward a cyber career with one or both of our certificate programs.

AUDIENCE
• Students and individuals currently employed in business, government or other entities who want to develop expertise in the management side of cybersecurity but do not want to enroll in a full master’s program
• Individuals with any undergraduate degree who seek a career in cybersecurity
• Individuals with a strong background in computer science or information technology who seek a leadership position in the cybersecurity industry

PROGRAM BENEFITS
• Curriculum incorporates current real-world developments in the industry
• Students get hands-on experience on a secure network
• Evening classes accommodate working professionals
• Class availability is guaranteed through the cohort design

CYBERSECURITY TECHNOLOGIES
The Cybersecurity Technologies Certificate program focuses on security issues with technology configuration and management. Topics include operating system security, network security, secure software development and cryptography.

This certificate comprises four graduate-level courses, including Introduction to Cybersecurity. If you already completed the introductory course as part of the Cybersecurity Technologies Certificate, you must complete either Topics in Cybersecurity or Cryptography (MATH 503) with this certificate.

PREREQUISITES
• Fundamental Technologies in Cybersecurity Boot Camp as a refresher course
• Computer science degree or related work experience

CYBERSECURITY MANAGEMENT, RISK AND GOVERNANCE
• The Cybersecurity Management, Risk and Governance Certificate program focuses on developing and implementing an information security program. Topics covered include policy, governance, risk and organization.

PREREQUISITES
• Fundamental Technologies in Cybersecurity Boot Camp as a refresher course, or
• Related work experience in business or technology
• Degree in computer science not required

PROGRAM LOGISTICS
START DATE: Cohorts begin every fall semester
DURATION: Each certificate can be completed in one year
LOCATION: Online
UNITS: 12 for each certificate (or 13 with MATH 503)
FEE: $9,900 for each certificate, or $10,725 with MATH 503 ($825 per unit)
FUNDING: Contact us for funding options

SOFTWARE AND WEB DEVELOPMENT
CERTIFICATES

From 2018 to 2028, employment of software developers is projected to grow 21 percent (284,100 positions) and employment of web developers is projected to grow 13 percent (20,900 positions), both much faster than the average for all occupations.

PROGRAM OVERVIEW
Through our online IT Academy, you can develop the skills and experience you need to begin or advance your career in information technology, web development, cybersecurity, networking and more. Learn at your own pace and at times that work with your schedule.

PROGRAM BENEFITS
• Instructor-facilitated
• Video lesson presentations
• Mobile-ready
• National certification opportunity
• Textbooks and materials included
• Laptops available for a small fee
• 24/7 learner support
• CSUSM certificate of completion
• Clinical externship opportunity

FRONT-END WEB DEVELOPER
The front-end web developer content introduces you to front-end, or client-side, web development technologies, including, HTML, CSS and JavaScript. You learn how to make interactive applications that run inside a web browser and can communicate with a web server running remotely. You also learn how to use the version control program Git and collaboration website GitHub.

The front-end web developer program is designed to prepare you with the basic skills necessary to function as a front-end web developer in multiple technical, business and healthcare settings. Web developers serve in roles such as web site developer, web designer or webmaster. This course is designed to fully prepare you to sit for and pass the Microsoft MTA 98-375 exam. You are eligible for an optional externship with a local employer after successful course completion.

FULL-STACK WEB DEVELOPER
WITH RUBY ON RAILS
The full-stack web developer content introduces you to front-end, or client-side, web development technologies, including HTML, CSS and JavaScript. In addition to attaining the necessary skills to work as a front-end web developer, you will learn Ruby on Rails so you can build dynamic, database-backed web applications with the Rails web framework. You receive hands-on experience planning, designing, coding, securing, testing and deploying dynamic web applications. You also learn how to use Rails-flavored Ruby language features, Git, Heroku and other valuable development tools.

This program prepares you to design and develop websites and web applications so users can perform specific tasks, and to maintain websites that continue to meet user needs. This course is designed to fully prepare you to sit for and pass the Microsoft MTA 98-375 exam. You are also eligible for an optional externship with a local employer after successful course completion.

OTHER CERTIFICATES OFFERED
• Agile Development Specialist
• AWS Certified Cloud Administrator
• Certified Information Systems Security Professional (CISSP)
• CISCO Certified Entry Level Network Technician
• CompTIA A+, Network+ and Security+ Certifications, page 53
• Data Science Fundamentals
• Linux Systems Administrator
• MEAN Stack Developer
• Ruby on Rails Developer

CSUSM STAND-ALONE COURSES

The following CSUSM credit courses are offered online through Extended Learning for the Fall 2021 semester. These courses are open to students from other colleges and universities, qualified high school seniors and community members. Courses are fully transferable to other academic institutions, and up to 24 units taken as a nonmatriculated student can be counted toward a CSUSM degree.

For a full list of Fall 2021 credit courses offered through Extended Learning, visit csusm.edu/el/courses.

BIOL 104: PRINCIPLES OF BIOLOGY: HUMAN EMPHASIS

Principles of cellular, organismal and population biology with primary representation relating to the human organism. Includes study of cells, tissues and mammalian organ systems. Enrollment restricted to kinesiology majors. Three hours of lecture and three hours of laboratory.

DATE: Aug. 30 - Dec. 11, 2021
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

BIOL 160: MICROBIOLOGY FOR HEALTH SCIENCES

Basic concepts of microbiology, including classification, metabolic activity and the effect of physical and chemical agents on microbial populations. Host parasite interactions, infectious agents, methods of transmission and control are also discussed. Three hours of lecture and three hours of laboratory. This is a pre-nursing core course and enrollment is restricted to approved pre-health science students based on the nursing science impaction criteria.

DATE: Aug. 30 - Dec. 11, 2021
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

BIOL 175: INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY I

The first in a two-course series designed to introduce the principles of human anatomy and physiology for students in health and human services, including nursing. Taught from a systems perspective where students will learn basic physiological principles and mechanisms along with their associated anatomical basis. Material includes anatomical terminology, cell and tissue structure and function, basic biochemical and metabolic pathways and the integumentary, skeletal, muscular, digestive and excretory systems. Three hours of lecture and three hours of laboratory. This is a pre-nursing core course and enrollment is restricted to approved pre-health science students based on the nursing science impaction criteria.

DATE: Aug. 30 - Dec. 11, 2021
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

BIOL 176: INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY II

The second in a two-course series designed to introduce the principles of human anatomy and physiology for students in health and human services, including nursing. Taught from a systems perspective where students will learn basic physiological principles and mechanisms along with their associated anatomical basis. Material includes nervous system and the senses, and the endocrine, reproductive, cardiovascular and respiratory systems. Three hours of lecture and three hours of laboratory. This is a pre-nursing core course and enrollment is restricted to approved pre–health science students based on the nursing science impaction criteria. Prerequisite: BIOL 175.

DATE: Aug. 30 - Dec. 11, 2021
UNITS: 4
FEE: $350 per unit, plus student fees
REGISTER: csusm.edu/el/courses

Accelerate Your Studies During Winter Intersession 2022

Earn up to four units in just four weeks in a full range of courses during Winter Intersession 2022. Classes are open to college students, qualified high school seniors and community members without formal admission to the university. Credits are fully transferable to other institutions. Session dates are Monday, Dec. 20, 2021, to Saturday, Jan. 15, 2022. Visit csusm.edu/winter for more information.
CHEM 101: PREPARATORY CHEMISTRY
Prepares students for CHEM 105 or CHEM 150. Introduces students to fundamental chemical concepts and quantitative problem-solving skills in chemistry. Topics include atomic theory, chemical nomenclature, the periodic table, stoichiometry, atomic structure and chemical bonding. Intended for students who have not successfully completed high school chemistry or other preparatory courses within the last five years, or those students who need additional preparation before taking CHEM 105 or CHEM 150. Enrollment restriction: Students must be a declared major in BIOL, BIOC, BIOT, CHEM, KINE, MATH, NURS, PHYS.
DATE: Aug. 30 – Dec. 11, 2021
UNITS: 3
FEE: $350 per unit, plus student fees
